1864.

ACCOUNTS AND PAPERS:

1864.

THIRTY-SIX VOLUMES:—CONTENTS OF THE

FIRST VOLUME.

N. B.—*THE* Figures *at the* beginning of the line, *correspond with the* N° *at the foot of each* Paper; *and the* Figures *at the* end of the line, *refer to the* MS. Paging *of the Volumes arranged for The House of Commons.*

FINANCE, &c.:

Finance Accounts, I.—VII.:

370. Finance Accounts of the United Kingdom of *Great Britain* and *Ireland,* for the Financial Year 1863-64, ended 31st March 1864 - - - - - p. 1

Exchequer:

277. Account of all Monies received during the Year ended 31 March 1864, to the Account of Her Majesty's Exchequer, at the Bank of *England* and of *Ireland,* under the respective Heads of Public Revenue; the Amount of all Royal Orders and Treasury Warrants received, and of the Credits and Transfers made by the Comptroller General of the Exchequer; the Payments by the Bank of *England*; and the Balance remaining to the Account of the Exchequer at each Bank, on 31 March 1864 (per Acts 4 Will. 4, c. 15, and 17 & 18 Vict. c. 94) - 99

Exchequer Bonds:

464. Account of Exchequer Bonds payable in the Year ending 31st March 1865, unprovided for - - - - - - - - - - - - - 109

Public Income and Expenditure:

1. Account of the Gross Public Income and Expenditure for the Year ended the 30th September 1864; together with the Balances in the Exchequer at the Commencement and at the Termination of the Year, and the Amount of Funded and Unfunded Debt created or redeemed in the said Year; and, like Account for the Year ended the 31st December 1863 - - - - - - - 111

185. Account of the Gross Public Income and Expenditure for the Year ended the 31st March 1864; together with the Balances in the Exchequer at the Commencement and at the Termination of the Year, and the Amount of Funded and Unfunded Debt created or redeemed in the said Year - - - - 117

491. Account of the Gross Public Income and Expenditure for the Year ended the 30th June 1864; together with the Balances in the Exchequer at the Commencement and at the Termination of the Year, and the Amount of Funded and Unfunded Debt created or redeemed in the said Year - - - - 121

33. Account of the Public Income and Expenditure of the United Kingdom, in the Years ending the 31st March 1862 and 1863; distinguishing the Actual Payments for Expenses incurred in Collection and Management; Charges of the Public Debt; Expenses of the Civil Government; the Allowances to the Royal Family and the King of the *Belgians*; the Establishment of the Lord Lieutenant of *Ireland*; the Expenses of the Two Houses of Parliament, and the Civil Departments; the other Pensions on the Consolidated Fund, on the Gross Revenue, and Civil List; also, the Payments for the Administration of Justice, Diplomatic Expenses, and the Sums voted for the Army, Navy, and Miscellaneous Services; also, the Public Works, Bounties, Post Office, the Quarantine, and Warehouse Establishments; and all other Payments not coming under any of the foregoing Heads; with an Appendix, showing the several Items composing each Head of the Account (in continuation of Parliamentary Paper, No. 5, of Session 1863) - - - - - - - - - 125

Public Income and Expenditure—*continued.*

358. Account showing the particulars of the Sum of 7,702,627*l.*, as given in Return, No. 185, of Public Income and Expenditure, for the Year ending 31st March 1864, under the several Classes and Numbers of Account in each Class; and, Accounts, Salaries and Allowances of 185,718*l.*, and Miscellaneous Charges of 213,440*l.*, paid from the Consolidated Fund, for the same Year - p. 139

Public Debt:

305. Account of all Additions which have been made to the Annual Charge of the Public Debt by the Interest of any Loan that hath been made, or Annuities created, in the last Ten Years (1854 to 1863 inclusive); presented in pursuance of an Act 27 Geo. 3, c. 13, s. 72; and also showing how the Charge incurred in respect of the same has been provided for - - - - - - 143

475. Return showing the Amount of the Funded Debt of *Great Britain*, of the Redeemed Debt, of the Funded Unredeemed Debt, of the Unfunded Debt, of the other outstanding Balances, and of the Total of the Liabiltiies of *Great Britain*, on 1st January 1801; also, the Amount of the Balances in the Exchequer, or in the Hands of the Collectors, and of the Net Liabilities of *Great Britain*, after deducting these Balances, at that Date:—Similar Return for *Ireland*:—Returns of the Amount authorised by Parliament to be Raised by Loan in *Great Britain* in each Year, from 1st January 1801 to 1st January 1817, stating the Year, Chapter and Section under which such Loan was Raised, the Rate at which Borrowed, the Capital Stock Created, &c.:—Similar Return for *Ireland* - - - - - - - - - - - - - 149

Bank of England:

53. Amount of all Exchequer Bills, or Treasury Bills, and other Government Securities, purchased by the Bank of *England*, or on which any Sum or Sums have been lent and advanced for the Public Service by the Bank, in the Year ending 5th January 1864, showing what Amount of such Bills, before the making up of this Account, has been paid off and discharged, and the Amount of such Exchequer Bills, or Treasury Bills, or other Government Securities, which was in the hands of the Bank on 5th January 1864, pursuant to 59 Geo. 3, c. 76:—Balances of Sums issued for the Payment of Dividends due and not demanded, and for the Payment of Lottery Prizes or Benefits not claimed, and which remained in the hands of the Bank on the days next before the Issue from the Exchequer of Money for the Payment of Dividends on account of the National Debt for each of the Four preceding Quarters respectively, pursuant to 48 Geo. 3, c. 4:—Receipt and Expenditure of £.386,482. 6. 3. in One Year, from 31st December 1862 to 31st December 1863, by the Commissioners, appointed by 26 Geo. 3, for the Reduction of the National Debt - - 159

Banks (Scotland):

250. Names of all Banks existing in *Scotland* on 1st January, in the Years 1819, 1830, 1845, and 1864 respectively, with the Number of the Branch Banks belonging to each:—And, Amount of the Certified Issues of Notes, and of the Actual Issues, and of the Gold and Silver Coin held by each of them at the Earliest and Latest Dates after the passing of the Act of the Year 1845, for which they can be given, specifying in cases where a Bank has ceased to carry on business, whether it has been Amalgamated with any, and what Bank - - - 163

British Museum:

117. Correspondence between the Treasury and the *British* Museum on the Subject of providing Additional Accommodation for the several Collections belonging to that Establishment (in continuation of Parliamentary Paper, No. 97, of Session 1862):—And, Reports received by the Trustees from the Heads of Departments on the same Subject:—Also, Minutes of the Trustees on the Subject of providing Additional Accommodation for the several Collections belonging to that Establishment (subsequent to Parliamentary Paper, No. 97, of Session 1862) - - - - - - - - - - - - - 167

246. Income and Expenditure of the *British* Museum for the Financial Year ended 31st March 1864; Estimated Charges and Expenses for the Year ending 31st March 1865; of the Sum necessary to discharge the same; and Number of Persons admitted to visit the Museum in each Year from 1858 to 1863, both Years inclusive; together with a Statement of the Progress made in the Arrangement of the Collections, and an Account of Objects added to them, in the Year 1863 - - - - - - - - - - - - - 221

Bullion:

71. Amount of Bullion Purchased and Sold by the Bank of *England*, distinguishing Gold from Silver, and Bar Gold from Foreign Gold Coin, in each Month, from the 31st December 1862 to the 31st December 1863; also, the Excess of Payments to, or Receipts from, the Public, of *British* Gold Coin; and also, the Amount received from the Mint during the same Period (in continuation of Parliamentary Paper, No. 110, of Session 1863) - - - - p. 253

Charitable Estates and Trusts Acts:

83. Names of the Chief Commissioners, Commissioners, Secretaries, Inspectors, Accountants, First Clerks, Second Clerks, and all other Officials, who have been appointed under the Charitable Estates and Trusts Acts of 1853 and 1855; also, the Dates of their Appointments, and the Amount of Salary and Travelling Expenses each has received annually - - - - - 255

Charitable Funds:

40. Return made under Statute 23 & 24 Vict. c. 136, s. 18, "The Charitable Trusts Act, 1860," of Total Amount of the Capital, Stock, Shares and Securities transferred to the Official Trustees of Charitable Funds, in 1863:—Total Amount of Monies, other than Dividends or Interest, paid to or to the Account of the Official Trustees, and of the Investment thereof:—Capital, Stock, Shares, and Securities Sold or Retransferred by the Official Trustees during the same Period:—Aggregate Amount of the Capital, Stock, Shares, Funds and Securities, and the Balance of Cash held by the Official Trustees, on 31st December 1863 259

China (Votes of Credit):

314. Sums Voted in each Year since 1857, as Votes of Credit for the Expenses of the Naval and Military Operations in *China*, showing the Expenditure of the Sums so Voted, and the Amount surrendered to the Exchequer - - - 261

Civil Contingencies Fund:

463. Accounts showing the Receipts and Payments in connexion with the Fund, in the Year ended 31st March 1864; the Distribution of the Capital of the Fund at the Commencement and at the Close of the Year; and, the Total Outstanding Balances on the Old Account of the Vote for Civil Contingencies on the 31st March 1863, and the Disposal of those Balances up to the 31st March 1864:—Appendix, Report of the Commissioners of Audit, dated 24th June 1864 - - - - - - - - - - - - - 265

Civil List Pensions:

508. List of all Pensions granted between the 20th June 1863 and the 20th June 1864, and charged upon the Civil List:—(pursuant to Act 1 Vict. c. 2) - - 279

Coinage:

516. Account of all Gold, Silver and Copper Monies of the Realm, coined at the Mint, for each Year from the 1st January 1854 to the 31st December 1863 (in continuation of Parliamentary Paper, No. 447, of Session 1863) - - - 281

Crown and Government Property (Westminster):

186. Plan showing, by distinct Colour or Colours, all Land and Buildings belonging to or vested in the Crown, or in any Department of Government, situate between the *Thames* and *St. James's Park*, and extending from *Trafalgar Square*, on the North, to the Houses of Parliament, on the South; and also describing the manner in which the Property is held, and the Dates at which all subsisting Leases and Tenancies will expire - - - - - - - - 287

Customs Clerks:

519. Return of the Numbers, Ages, and Length of Service in each case, of Clerks belonging to the Establishment of Her Majesty's Customs, *London*, who have Resigned their Appointments during the Four Years ending 30th June 1864; specifying the Causes, if any were assigned, for such Resignation - - 303

Duchy of Cornwall:

76. Account of the Receipts and Disbursements of the Duchy of *Cornwall*, in the Year ended on the 31st December 1863 - - - - - - 307

Duchy of Lancaster:

72. Account of the Receipts and Disbursements of the Duchy of *Lancaster*, from the 22d December 1862 to the 21st December 1863:—Also, a separate Account of the Capital of the said Duchy, to same date - - - - p. 313

Dwelling Houses and Horses (Ireland):

207. Number of Dwelling Houses in *Ireland* valued in the Government Valuation at the Annual Value of Twenty Pounds and upwards:—And, Number of Horses not kept for the purposes of Agriculture, Trade, Business, or Professions in *Ireland* - - - - - - - - - - - - - 319

Embassies, &c.:

304. Total Cost of each of Her Majesty's Embassies, Missions, and Political Agencies in Foreign Countries:—Showing Number of Official Persons, Paid and Unpaid; Official Ranks and Titles; Amount of Salary and other Allowance, and Amount of Salary or Allowance provided at the Public Expense for any Chaplain, Interpreter, Officer or Servant:—Cost of Purchasing, Erecting any House, Chapel, or other Building; Cost of Outfit and Conveyance of Members; Office Expenses; and all other Charges:—And, Total Cost of any Special Mission or Commission, &c. &c. - - - - - - - - - - - - 323

Epping Forest:

435. Letter from the Right Honourable *Frederick Peel* to the Chairman of the Metropolitan Board of Works, relating to the Crown Forestal Rights over *Epping* Forest - - - - - - - - - - - - - 333

Felons' Property:

136. Amount of Felons' Property Forfeited to the Crown in each County, City, and Town in *England* and *Wales* in each of the last Sixteen Years; specifying how much of such Property was restored by the Crown, or paid over to, or detained by Grantees of the Crown, distinguishing the Names of such Grantees; and showing, also, the Expenses incurred in the Recovery and Appropriation of such Forfeited Property (in continuation of Parliamentary Paper, No. 502, of Session 1848) - - - - - - - - - - - - 337

Fire Insurances:

542. Account of all Sums paid into the Inland Revenue Office in *Great Britain* and *Ireland*, for Duty on Insurances against Fire, Quarterly, 1863; distinguishing the Amount of Allowance made to each Office for collecting the same in the Country, and in *London*, *Edinburgh* and *Dublin* respectively, with the Dates of such Payment; together with an Abstract showing the Gross Amount of Duty collected in the Year by each Company:—And, like Account of Sums insured by each Office on Farming Stock, for the same Period (in continuation of Parliamentary Paper, No. 381 of Session 1863) - - - - - 347

Foreign Bills of Exchange:

196. Amount received for Stamps on Foreign Bills of Exchange under the Act 17 & 18 Vict. c. 83, for the respective Years 1860 to 1863 inclusive - - - 357

Fortifications, &c.:

263. Account of the Monies raised under the Authority of the Acts 23 & 24 Vict. c. 109, and 25 & 26 Vict. c. 78, to provide for the Expenses of Fortifications, &c.; the Amount of Annuities created in respect of the same; the Monies issued out of the Consolidated Fund for the said Expenses; and the Sums remaining to be raised and issued, under the Authority of the said last-mentioned Act, on the 1st April 1864 - - - - - - - - - - - - - 359

Friendly Societies:

498. Report of the Registrar of Friendly Societies in *England* (pursuant to 18 & 19 Vict. c. 63, s. 45) - - - - - - - - - - - 363

155. Account of all Sums standing to the Credit of Friendly Societies on 20th November 1863, particularising the Gross Sums on which Interest was credited to that day, at the several Rates of Interest allowed under different Statutes 545

Friendly Societies (Scotland):

523. Report of the Proceedings of the Registrar of Friendly Societies in *Scotland*, in his Office of Registrar, and of the principal Matters transacted by Friendly Societies which have come under his cognizance during the past Year - - p. 547

Government Houses, &c.:

195. Returns of all Houses and Premises in the Occupation of any Government Department, Civil, Military, Naval, or otherwise, for which Rent is paid to the Department of Woods and Forests, specifying particulars (in continuation of Return, ordered the 28th day of July 1862, and Parliamentary Paper, No. 8, of Session 1863):—And, of all Houses and Premises in such Occupation for which any Sum of Money has been Paid by way of Purchase, or other Houses, Lands, or Premises given in Exchange, to the Department of Woods and Forests since 1851, &c. - - - - - - - - - - - - - 551

Government Property:

369. Return of the Appropriation of the whole or any part of the Sums voted in Aid of Local Assessments for the Relief of the Poor on certain Descriptions of Government Property, specifying the Amount paid in each District up to 31st March last (in continuation of Parliamentary Paper, No. 217, of Session 1863) - 557

Greek Loan:

5. Account of Monies paid out of the Consolidated Fund, under the Acts 2 & 3 Will. 4, c. 121, and 6 & 7 Will. 4, c. 94, for Interest and Sinking Fund on that part of the *Greek* Loan which is guaranteed by this Country under the Authority of the said Acts, and of the Amount repaid by the *Greek* Government on account of the same - - - - - - - - - - - - - 559

Hainault Forest:

166. Return from the Inclosure Commissioners, setting forth the several Allotments of the 528 Acres of the King's Woods in the late Forest of *Hainault* to the Parish of *Barking*, and of the 42 Acres to the Parish of *Dagenham*; showing the Names of the Proprietors claiming Allotments; the Nature of the Claim, whether for a House only, or for House and Land; the Amount of Rating to the Poor of such House or House and Land; and the Quantity of Ground allotted to each Claim - - - - - - - - - - - - - 561

Hill, Sir Rowland, K.C.B.:

120. Treasury Minute granting a Special Superannuation Allowance to Sir *Rowland Hill*, K.C.B., Secretary to the General Post Office - - - - - 565

146. Letter and Memorandum from Sir *Rowland Hill*, K.C.B., to the Commissioners of the Treasury, with reference to their Lordships' Minute granting him a Special Superannuation Allowance - - - - - - - - - - - 569

Income and Property Tax:

209. Gross Amount of Property and Income Tax received in *Great Britain* for each Year in the Quinquennial Periods ending 31st March 1858–9, and 31st March 1863–4, respectively; showing also the Amount contributed per Head of the Population:—And, similar Return for *Ireland* - - - - - - 573

565. Return showing the Number of Persons charged to the Income Tax for the Years ending 5th April 1862 to 1863, under Schedule (D); distinguishing the Number charged in each of certain Classes; from under 100*l.* a-year; 100*l.* and under 150*l.* a-year; to under 50,000*l.*; and 50,000*l.* and upwards; and the Amounts of Tax received from each Class:—Similar Return, under Schedule (E), to 5,000*l.* a-year and upwards:—Net Amount of Property and Income Tax for the same Years, classed under the several Schedules:—And, similar Return for *Ireland* (in continuation of Parliamentary Paper, No. 526, of Session 1863) - - - - - - - - - - - - - 575

566. Annual Value of all Real Property (including Railways and Canals) rated under Schedule (A) of the Income and Property Tax Act for the Year ending 31st March 1862, in all Parliamentary Cities and Boroughs in the United Kingdom, and in all Counties or Parliamentary Divisions of Counties, exclusive of Cities and Boroughs:—And, similar Return for the earliest Year subsequent to the imposition of the Income Tax in 1842 for which the Return can be given 583

Income Tax (Ireland):

484. Gross Amount of Income Tax Received; the Annual Values on which Income Tax was Charged; the Rate of Tax; specifying the Amounts Charged under each Schedule, A, B, C, D, and E, in each Year since the Imposition of the Income Tax in *Ireland* - - - - - - - - - - p. 591

Increase and Diminution (Public Offices):

169. Abstract of Accounts of every Increase and Diminution in 1863, in the Number of Persons employed in all Public Offices or Departments, or in the Salaries, Emoluments, Allowances, or Expenses, &c., distinguishing every Increase and Diminution in Retired Allowances or Superannuations, and the Grounds upon which every such Increase or Diminution shall have been made, granted or allowed - - - - - - - - - - - - - 593

GENERAL TOTAL, Great Britain - - - £.	745,747,909 5 8	- -	25,010,124 – 9

Note.—Under the Act 26 Vict. c. 25, s. 1 (1863), £. 24,000,000 Stock, at Three per Cent., standing in the books of the Bank of England to the credit of the Commissioners for the Reduction of the National Debt for Savings Banks, has been cancelled in the books of the Bank, and a corresponding amount written into the books of the Treasury and the Exchequer, as a charge for Savings' banks upon the Consolidated Fund; the interest of the Stock being payable half yearly (at Three per Cent. as before) to the National Debt Commissioners. As this does not involve any change in the amount of debt, or in the annual charge for interest, the transaction is not included in the above account.

The Act 10 Geo. 4, c. 27, which came into operation at the 5th July 1829, enacts that the sum thenceforth annually applicable to the reduction of the National Debt of the United Kingdom, shall be the sum which shall appear to be the amount of the whole actual Annual Surplus Revenue beyond the Expenditure of the said United Kingdom; and the following sums have been accordingly received by the Commissioners for the Reduction of the National Debt, including sums on account of Donations and Bequests, viz.:—

APPLICABLE BETWEEN	ON ACCOUNT OF The Sinking Fund. £. s. d.	Donations and Bequests. £. s. d.
31 Mar. and 30 June 1863 -	(a) 101 13 11	5,421 5 6
30 June and 30 Sept. 1863 -	(b) 69,794 18 6	7,409 – –
30 Sept. and 31 Dec. 1863 -	289,815 18 5	5,630 9 11
31 Dec. 1861 and 31 Mar. 1864	510,292 3 7	7,409 – –
£.	870,004 14 5	25,869 15 5

(a) Forfeited Deposits paid over to the Commissioners by the Paddington Savings Bank, pursuant to the 9 Geo. 4, c. 92, s. 34.

(b) £. 6,906. 14. 7. of this amount issued under the Act 16 Vict. c. 23.

A. Y. Spearman, Comptroller General.

CLASS V.—UNFUNDED DEBT.

No. 44.—AN ACCOUNT of the Unfunded Debt of *Great Britain* and *Ireland*, showing the Total Amount of Unfunded Debt in Exchequer Bills and Exchequer Bonds outstanding on the 31st March 1863; the amounts issued and paid off in the Year to 31st March 1864, and the Total Amount outstanding on the last-mentioned date; with the amount of the annual Charge for Interest thereon, as then estimated.

		Exchequer Bills.	Exchequer Bonds.
		£.	£.
Unfunded Debt on 31st March 1863		12,895,400	3,600,000
Amount issued in the Year ended 31st March 1864, viz.:			
Exchequer Bills:—Nil.			
Exchequer Bonds:—Nil.			
Amount paid off in the same period, viz.:			
Exchequer Bills:—			
Supply Bills, of 1846 and prior years, written off as cancelled	£. 3,300		
Bills purchased with Sinking Fund and cancelled	362,000		
Bills paid in for Duties (per Act 24 Vict. c. 5, s. 5), and cancelled	249,800		
Bills paid off in Money	1,744,300		
		2,359,400	—
Exchequer Bonds:—Series F, paid off 8th May 1863		—	1,000,000
Total Amount outstanding on 31st March 1864	£.	10,536,000	*2,600,000
Annual Charge for Interest thereon, on 31st March 1864 (estimated)		315,500	92,500

* £ 1,000,000 (G.), dated 8 November 1860, payable 8 November 1864, at £. 3½ per cent. per annum.
£. 600,000 (H.), dated 18 March 1861, payable 18 March 1865, at £. 3¾ per cent. per annum.
£. 1,000,000 (I.), dated 5 June 1862, payable 5 June 1865, at £. 3½ per cent. per annum.

No. 45.—AN ACCOUNT of Exchequer Deficiency Bills issued in the Year ended 31st March 1864, to meet the Charge on the Consolidated Fund, and of the sum required to be issued to meet the Charge on that day.

For amount of Bills issued and paid off in the Year, *vide* Account No. 1, pages 8 and 9.

Amount of Bills to be issued in the Quarter to 30 June 1864, to meet the Charge for the Quarter ended 31st March 1864	£. 722,329 16 ·1

Class VI.—DISPOSITION OF GRANTS (SUPPLY, AND WAYS AND MEANS).

No. 46.—AN ACCOUNT, showing, under their several Heads, how the BALANCES of the MONEYS granted for the Service of the United Kingdom for the Years after-mentioned, which remained unissued on 31st March 1863, and the Grants for the Year 1863-64, have been disposed of to 31st March 1864.

			2,253,431		1,050,000
7.	Bounties, &c., for Promoting Fisheries		21,018		16,964
8.	Public Works		879,261		844,222
9.	Payments out of the Revenue of Crown Lands, for Improvements, &c.		108,095		95,174
10.	Post Office; Charges of Collection and other Payments		2,131,338		2,084,217
11.	Quarantine Establishments		3,644		3,044
12.	Miscellaneous, not classed under the foregoing Heads		4,478,921		4,384,572
	TOTAL EXPENDITURE £.		72,151,786		70,464,069
	Excess of Income over Expenditure, including Fortifications				234,588
	£.		72,151,786		70,698,657
	Memorandum:—				
	The Amount of Terminable Annuities at the end of each Year, was		1,913,684		2,003,310
	In corresponding Perpetuities, as estimated by Mr. Finlaison		581,666		621,502
	Difference £.		1,332,018		1,381,808

* This sum is the net amount paid to the Bank of England after deducting 60,000*l.* for composition for Stamp Duty, and 123,078*l.* for allowance out of the profits of issue, per Act 7 & 8 Vict. c. 32, and does not include the management of the Government debt to the Bank. In 1862-3 the allowance for management was paid in gross, but at a reduced rate, per Act 24 Vict. c. 3.

† No part of this Allowance is at present paid for the use of King Leopold. The Trustees, after discharging certain Annuities and Pensions to the Establishment of the late Princess Charlotte, repay the Balance of the Annuity to the Exchequer. The sum so repaid in the last year was £. 36,090.

1863-4.

ACCOUNT, showing the PARTICULARS of the Sum of £.7,702,627, as given in the RETURN, No. 185, of PUBLIC INCOME and EXPENDITURE for the Year ending 31st March 1864, under the several Classes and Numbers of Account in each Class; And of the ACCOUNTS, "Salaries and Allowances" of £.185,718, and "Miscellaneous Charges" of £.213,440, paid from the Consolidated Fund for the same Year.

(*Mr. Augustus Smith.*)

Ordered, by The House of Commons, *to be Printed,*
6 *June* 1864.

PUBLIC DEBT.

AN ACCOUNT of all ADDITIONS which have been made to the ANNUAL CHARGE of the PUBLIC DEBT by the Interest of any Loan that hath been made, or Annuities created in the last Ten Years (1854 to 1863 inclusive); presented in pursuance of an Act 27 Geo. III., c. 13, s. 72; and also showing how the Charge incurred in respect of the same has been provided for.

(PRESENTED PURSUANT TO ACT.)

Ordered, by The House of Commons, *to be Printed,*
19 *May* 1864.

AN ACCOUNT of all ADDITIONS which have been made to the ANNUAL CHARGE of the PUBLIC DEBT by the Interest of any Loan that hath been made, or Annuities created, in the last Ten Years (1854 to 1863 inclusive); presented in pursuance of an Act 27 Geo. III. c. 13, s. 72; and also showing how the Charge incurred in respect of the same has been provided for.

In the year 1854 - - - - - - - - - - Nil.

In the Year 1855:

BY virtue of an Act, 18 Vict., c. 18, the sum of 16,000,000 *l.* was authorised to be raised for the service of the year 1855, upon the following terms, viz.:

The Contributors were entitled for every 100 *l.* contributed—

	£.	s.	d.
To 100 *l.* Capital Stock in Three Pounds per centum Consolidated Annuities, with Interest from 6 January 1855, amounting to -	16,000,000	–	–
And to an Annuity of 14 *s.* 6 *d.* for a term of Thirty Years, commencing 6 April 1855, amounting, per annum, to 116,000 *l.*			
The Annual Charge in respect of the said Capital of 16,000,000 *l.* Three Pounds per centum Consolidated Annuities, including 2,400 *l.* for Management, at 150 *l.* per million, is - - - -	482,400	–	–
And in respect of the said Annuity of 14 *s.* 6 *d.* for Thirty Years, including 174 *l.* for Management - - - - - -	116,174	–	–
£.	598,574	–	–

(The above Charge is authorised to be defrayed out of the Consolidated Fund.)

In the Year 1856:

	£.	s.	d.
BY virtue of an Act, 19 Vict., c. 5, Exchequer Bills to the amount of 3,000,000 *l.* were subscribed to be funded, and the Proprietors thereof were entitled for every 100 *l.* principal money contained in the said Bills, so subscribed, to 111 *l.* 2 *s.* 2 *d.* Capital Stock, in Annuities, at the rate of 3 *l.* per centum, whereby a Capital was created of - - - - - - - - - - - -	3,333,250	–	–
The Annual Charge in respect of the Annuities occasioned by the above Act is as follows, viz.:	£.	s.	d.
In respect of 3,333,250 *l.* Three Pounds per centum Annuities, including 499 *l.* 19 *s.* 9 *d.* for Management, at 150 *l.* per million - -	100,497	9	9

(The above Charge is authorised to be defrayed out of the Consolidated Fund.)

BY

BY virtue of an Act, 19 Vict., c. 6, the sum of 5,000,000 *l.* was authorised to be raised for the service of the year 1856, upon the following terms, viz.:

The Contributors were entitled for every 100 *l.* contributed—

	£.	*s.*	*d.*
To 111 *l.* 2 *s.* 2 *d.* Capital Stock Three Pounds per centum Consolidated Annuites, amounting to - - - - - - - - -	5,555,416	13	4

	£.	*s.*	*d.*
And the Annual Charge in respect of the said 5,555,416 *l.* 13 *s.* 4 *d.* Three Pounds per centum Consolidated Annuities, including 833 *l.* 6 *s.* 3 *d.* for Management, at 150 *l.* per million, is - -	167,495	16	3

(The above Charge is authorised to be defrayed out of the Consolidated Fund.)

BY virtue of an Act, 19 Vict., c. 21, the sum of 5,000,000 *l.* was authorised to be raised for the service of the year 1856, upon the following terms, viz.:

The Contributors were entitled for every 100 *l.* contributed—

	£.	*s.*	*d.*
To 107 *l.* 10 *s.* 7 *d.* Capital Stock Three Pounds per centum Consolidated Annuities, amounting to - - - - - - - - -	5,376,458	6	8

	£.	*s.*	*d.*
And the Annual Charge in respect of the said 5,376,458 *l.* 6 *s.* 8 *d.* Three Pounds per centum Consolidated Annuities, including 806 *l.* 9 *s.* 4 *d.* for Management, at 150 *l.* per million, is - -	162,100	4	4

(The above Charge is authorised to be defrayed out of the Consolidated Fund.)

In the Year 1859:

BY virtue of an Act, 9 Geo. 4, c. 92, ss. 50 & 51, the Commissioners for the Reduction of the National Debt, having applied the sum of 7,600,000 *l.* in the purchase of Exchequer Bills, between the 1 July 1855 and 30 June 1857, and certified the said purchase to the Treasury on the 6 January 1859, became entitled to an amount of Stock for the same to be placed to their account at the Bank of England, according to the conditions of the abovementioned Act, as follows, viz.:

	£.	s.	d.
Capital created in Three Pounds per centum Consolidated Annuities, according to the quarterly average prices of Three Pounds per centum Annuities, bought with the Moneys commonly called the Sinking Fund, during the same period - - - - - -	5,757,834	13	5
Ditto - ditto, in Three per centum Reduced Annuities - -	2,711,405	1	8
£.	8,469,239	15	1
And the Annual Charge in respect thereof, including 1,270 *l.* 7 *s.* 8 *d.* for Management, at 150 *l.* per million, is - - - - - -	255,347	11	6

(The above Charge is authorised to be defrayed out of the Consolidated Fund.)

In the Year 1861:

BY virtue of an Act, 23 & 24 Vict., c. 109, s. 3 (to provide for the expense of constructing certain Fortifications), the sum of 2,000,000 *l.* was authorised to be raised by the creation of Annuities for such Term, not exceeding 30 years, as the Treasury might decide:

	£.	s.	d.
The sum of 950,000 *l.* was raised in 1861 by the creation of Annuities expiring in 1885. The Annual Charge for these Annuities (including 90 *l.* 4 *s.* 5 *d.* for Management), amounts to -	60,239	4	5

(The above Charge is authorised to be defrayed out of the Consolidated Fund.)

In the Year 1862:

	£.	s.	d.
BY virtue of the same Act, the additional sum of 970,000 *l.* was raised by the creation of Annuities expiring in 1885. The Annual Charge for these Annuities (including 95 *l.* 15 *s.* 3 *d.* for Management), amounts to - - - - - - - - - -	63,938	15	3

(The above Charge is authorised to be defrayed out of the Consolidated Fund.)

In the Year 1863:

	£.	s.	d.
BY virtue of the same Act, and of an Act 25 and 26 Vict., c. 78, which authorises the raising of a further sum of 1,200,000 *l.* for the same purpose, and on the same terms, a sum of 820,000 *l.* was raised by the creation of Annuities expiring in 1885, the Annual Charge for which (including 82 *l.* 9 *s.* 9 *d.* for Management) is - - - - - - - - - - - -	55,075	9	9

(The above Charge is authorised to be defrayed out of the Consolidated Fund.)

Whitehall, Treasury Chambers,
May 1864.

F. PEEL.

PUBLIC DEBT.

AN ACCOUNT of all ADDITIONS which have been made to the ANNUAL CHARGE of the PUBLIC DEBT by the Interest of any Loan that hath been made, or Annuities created, in the last Ten Years; pursuant to Act 27 Geo. 3, c. 13.

(Presented pursuant to Act.)

Ordered, by The House of Commons, *to be Printed,*
19 *May* 1864.

305.

Under 1 *oz.*

PUBLIC DEBT, &c.

RETURN to an Order of the Honourable The House of Commons, dated 7 June 1864;—*for*,

RETURN "showing the Amount of the FUNDED DEBT of *Great Britain*, of the REDEEMED DEBT, of the FUNDED UNREDEEMED DEBT, of the UNFUNDED DEBT, of the other Outstanding BALANCES, and of the TOTAL of the LIABILITIES of *Great Britain*, on the 1st day of January 1801; also, the Amount of the BALANCES in the EXCHEQUER, or in the Hands of the COLLECTORS, and of the NET LIABILITIES of *Great Britain*, after deducting these BALANCES, at that Date:"

"Similar RETURN for *Ireland*:"

"RETURNS of the Amount authorized by Parliament to be Raised by LOAN in *Great Britain* in each Year, from the 1st day of January 1801 to the 1st day of January 1817, stating the Year of His Majesty's Reign, Chapter and Section under which such Loan was Raised, the Rate at which said Loan was Borrowed, the Capital Stock Created for each Loan, the Amount in Cash which might be Remitted to *Ireland* out of each of said Loans, the Capital Stock Created for the Cash so to be Remitted, and the Total Capital Stock Created from the 1st day of January 1801 to the 1st day of January 1817:"

"And, of the Amount of the LOANS Raised for the Service of *Ireland* in each Year, from the 1st day of January 1801 to the 1st day of January 1817, stating the Year of His Majesty's Reign, Chapter and Section under which said Loan was Raised, the Rate at which said Loan was Borrowed, the Capital Stock Created for each Loan, and the Total Capital Stock Created from the 1st day of January 1801 to the 1st day of January 1817."

Treasury Chambers,
12 July 1864.

F. PEEL.

(*Sir Edward Grogan.*)

Ordered, by The House of Commons, *to be Printed,*
12 *July* 1864.

RETURN showing the Amount of the FUNDED DEBT of *Great Britain*, of the REDEEMED DEBT, of the FUNDED UNREDEEMED DEBT, of the UNFUNDED DEBT, of the other Outstanding Balances, and of the Total of the Liabilities of *Great Britain*, on 1st day of January 1801; also the Amount of the Balances in the Exchequer, or in the Hands of the Collectors, and of the Liabilities of *Great Britain*, after deducting these Balances at that Date.

AL estimated Annual Charge for the Redeemed and Unredeemed Funded and Unfunded Debt of Ireland on 5 January 1801 - £. 1,572,351 7 10

* On the establishment of the Sinking Fund in Ireland in 1797, per Irish Act 37 Geo. 3, c. 27, the sum of 100,000 *l.* per annum, Irish ency (92,307 *l.* 13 *s.* 10 *d.* British), was granted for existing debts. Of this sum, 29,862 *l.* 8 *s.* 4 *d.* (British) was applied towards the ction of the debt of Ireland payable in England on account of the Loan of 1797, being 1 *l.* per cent. upon the capital of that Loan; and emainder was applicable towards the reduction of the Funded Debt in Ireland, created prior to 1797. The sum of 2,250 *l.* per annum, currency (2,076 *l.* 18 *s.* 6 *d.* British), the amount of Terminable Annuities expiring in 1797, was also to be applied towards the reduction e debt in Ireland prior to 1797.

† In these two amounts of Capital Debt and Annual Charge is contained the Capital Debt and Annual Charge in respect of 1,900,000 *l.* Irish r cents. payable in England. As this amount was raised by Acts of the Parliament of Ireland, prior to the Union, the Capital Debt and ual Charge have always been included as part of the Irish Debt, funded in Ireland, though payable in Great Britain.

‡ This amount is less by 375 *l.* than the sum stated in the Finance Accounts of 1801, and is the amended amount as corrected in the nce Accounts of 1811, and in the Report of the Committee of 1815, page 30, where the overpayment was allowed.

RETURN of the AMOUNT authorised by Parliament to be raised by LOAN in *Great Britain*, in each Year, from the 1st January 1801 to the 1st day of January 1817, stating the Year of his Majesty's Reign, Chapter and Section under which Loan was raised, the Rate at which said Loan was borrowed, the Capital Stock created for each Loan, the Amount of Cash might be remitted to *Ireland* out of each of said Loans, the Capital Stock created for the Cash so to be remitted, and the Capital Stock created from the 1st day of January 1801 to the 1st day of January 1817.

TOTAL for Great Britain	285,025,163 9 9	Money raised.	Stock created – £.	443,941,736 16 11	201,103 – 11	Long Annuities created.		

** A portion of this 3 *l.* per cent. Annuity, created in 1802, viz., the dividends on 6*l.* 19 *s.* 3 *d.* for every 100 *l.* raised, did not commence until from 5 January 1808.

* These two sums of 1,005,290 *l.* 0*s.* 2*d.* and 521,409 *l.* 6 *s.* 1 *d.* were raised in 1804 and 1805 to pay off similar amounts of 5 *l.* per cents., 1797 and 1802, the holders of which diss the conversion of these stocks, and elected to receive money, under the Acts 44 Geo. 3, c. 49, and 45 Geo. 3, c. 73.

† The total amounts of these Loans raised in 1805, 1807, and 1810, in Great Britain for Ireland, are here shown. These amounts exceed, by the sums paid for discount and ch receiving such Loans, retained by the Bank of England, the amounts as shown in Return, No. 296 of Session 1864, which are there stated to be the amounts as shown in Return, of Session 1822, and which are the amounts actually paid into the Exchequer.

‡ In the Loan of 14,600,000 *l.* in 1809, is included 600,000 *l.* raised for Portugal.

§ The total amount of this Loan, raised by 52 Geo. 3, c. 85, was 22,500,000 *l.* Of this amount, 2,500,000 *l.* was borrowed for the service of the East India Company. By 52 Geo. 3, c. 135, the East India Company were to pay into the Bank of England the amounts of the dividends, Sinking Fund, and management on the debt created in respect of of 2,500,000 *l.*, and the same was not to be charged upon the Consolidated Fund, except in case of default by the said Company.

‖ The amount actually raised for this Loan of 24,000,000 *l.* was 23,998,700 *l.* A subscriber thereto having neglected to make good his subscription of 2,000 *l.*, the amount of hi ments which he had paid, being 700 *l.*, was forfeited.

2.—Funded Debt created by the Conversion of Public Debt.

ddition to the amount of Stock and Long Annuities created in *Great Britain* for Money raised by Loans, as shown 1, the following additional amounts of Stock and of Long Annuities were created by the Conversion of Public Debt ring the same Period.

Amount of Public Debt converted into Stock.	Description of Public Debt converted.	Act.	Rate per Cent. at which such Public Debt was converted into Stock.	Capital Stock created by such Conversion.	Amount of Terminable Annuities granted in Addition to Stock so created.

		£.	56,350,000 – –	£.	89,282,875	60,729 3 4

*l, a sum of 4,500,000 *l.*, part of a Loan of 12,000,000 *l.*, per 51 Geo. 3, c. 49, chargeable on Great Britain, was authorised to be applied to the service of Ireland. The annual r the portion of the Loan applied to Ireland was as follows:—

	£. s. d.
Interest – – – – – – – – –	213,562 10 –
Sinking Fund – – – – – – – –	63,544 3 2
Management – – – – – – – –	2,006 14 4
Total – –	£. 279,113 7 6

le of this annual charge was defrayed by Great Britain, no distinct provision for the payment thereof by Ireland having been made in the usual way by Parliament.—(*See* Report Committee of 1815, Commons Paper 214, 1815, pp. 5 and 28.) But it was distinctly stated in Parliament that the charge so defrayed by Great Britain should be considered n to Ireland. (*See* Hansard, 20 May 1811.)

Act 54 Geo. 3, c. 76, does not appear to contain the usual clause providing for the payment, by Ireland, of the annual charge of the Debt created in respect of the sum of *l.* directed by s. 19 to be remitted to Ireland, and to be applied to the service of Ireland; neither can any such provision be found in any subsequent Act. The several upon this amount of Debt appear, however, to have been actually paid by Ireland, and to have been remitted to Great Britain from time to time when due. By reference to Budget brought before the House of Commons on 1 July 1814, by Mr. William Fitzgerald, the Chancellor of the Irish Exchequer, it will be seen that the amount of 5,500,000 *l.*, ised by this Loan, was included in his Estimate of Ways and Means for Ireland in this year, and that the annual charge for the corresponding amount of Debt created was in his Estimate of Expenditure, the necessary provision for this charge being voted in a Committee of Ways and Means on the same day. (*See* Hansard, and Commons Paper 814).

Part I.

COPIES of Correspondence between the Treasury and the British Museum on the Subject of providing Additional Accommodation for the several Collections belonging to that Establishment (in continuation of Parliamentary Paper, No. 97, of Session 1862):—And, of any Reports which have been received by the Trustees from the Heads of Departments of the British Museum on the same Subject.

Mr. *A. Panizzi* to the Assistant Secretary to the Treasury.

Sir, British Museum, 20 March 1862.

In obedience to the request of the Lords Commissioners of Her Majesty's Treasury, communicated to me by your letter of the 21st February last, I have had the honour of bringing under the notice of the Special Committee of Trustees appointed on the 10th of February, the question of the extent of site which should be acquired from the Commissioners of the Exhibition of 1851, for the purpose of providing for the collections proposed to be removed to Kensington Gore, in order that my Lords may enter into negotiation with those Commissioners; and I have been directed to submit to the Lords of the Treasury the accompanying copy of the statements made on the subject by Professor Owen, the superintendent, and by the heads of the departments of Natural History and other museum officers.

After fully considering those statements, and the additional verbal observations of Professor Owen, and the keepers of the departments of Zoology, Geology and Mineralogy, with whom the Committee conferred, the Committee directed me to state that they have reason to believe that a sufficient and suitable site might be obtained at Kensington Gore. The Committee suggest that not less than five acres and a half of ground be secured there for the future accommodation of the collections of Natural History now in Great Russell-street, strongly recommending to the consideration of Her Majesty's Government the importance of securing also the power of such further extension as the site will admit.

I am, &c.

G. A. Hamilton, Esq. (signed) *A. Panizzi*,
&c. &c. &c. Principal Librarian.

The Secretary to the Treasury to the Trustees of the British Museum.

Treasury Chambers,

My Lords and Gentlemen, 24 March 1862.

I am directed by the Lords Commissioners of Her Majesty's Treasury to acknowledge the receipt of Mr. Panizzi's letter of the 20th instant, relative to the site to be acquired at Kensington Gore for providing for the collections of Natural History in the British Museum, and to acquaint you that no time will be lost in acting upon the request conveyed in Mr. Panizzi's letter, subject only to the reservation that as some of the elements of Professor Owen's computations appear to admit of some possible reduction, and as the limitation to two stories may not be absolutely necessary, my Lords will reserve to themselves a degree of discretion with respect to the amount of space to be acquired, but will be careful to keep in view the projected scale of accommodation for the collections.

I am, &c.

The Trustees of the British Museum. (signed) *F. Peel.*

The Secretary to the Treasury to the Commissioners of the Exhibition of 1851.

Treasury Chambers,
24 March 1862.

My Lords and Gentlemen,

I AM directed by the Lords Commissioners of Her Majesty's Treasury to acquaint you that Her Majesty's Government have, in concert with the Trustees of the British Museum, arrived at the conclusion that the time has come when it is desirable to effect a removal of the collections in the several departments of Natural History from the present site of the British Museum.

I am commanded to transmit herewith copies of the Treasury Minute and of the subsequent correspondence on the subject, and to state that, in the judgment of Her Majesty's Government, it would be for the public advantage that a new site should be provided on your estate at Kensington Gore.

My Lords would therefore be glad to know, at your earliest convenience, whether you can offer to Her Majesty's Government an undivided site of not less than five or five-and-a-half acres, what would be the sum for which you would convey it to Her Majesty's Government for the purposes described, and whether you are able to indicate any means of possible future extension of the site or any other site on your property which might be available in case of necessity arising at a future date.

I am, &c.
(signed) *F. Peel.*

The Commissioners of the Exhibition of 1851.

Mr. *E. A. Bowring* to the Secretary to the Treasury.

Sir,

Whitehall, 2 April 1862.

I AM directed by Her Majesty's Commissioners for the Exhibition of 1851 to acknowledge the receipt of your letter of the 24th ultimo, transmitting copies of a Treasury Minute and of subsequent correspondence on the subject of the removal of the Natural History Collections from the present site of the British Museum; stating that, in the judgment of Her Majesty's Government, it would be for the public advantage that a new site should be provided for those collections on the Commissioners' estate at Kensington Gore; and inquiring whether the Commissioners can offer to Her Majesty's Government an undivided site of not less than five or five-and-a-half acres, what would be the sum for which they would convey it to Her Majesty's Government for the purposes described, and whether they are able to indicate any means of possible future extension of the site, or any other site on their property which might be available in case of necessity arising at a future date.

In reply, I am to request that you wi submit the following observations for the consideration of the Lords Commissi^{o}ners of Her Majesty's Treasury.

It will be in the recollection of their Lordships that on the occasion of the appointment of a Select Committee of the House of Commons, in the year 1860, on the subject of the British Museum, the Secretary to Her Majesty's Commissioners attended on their behalf before that Committee, to give evidence respecting the price at which the Commissioners were at that time disposed to part with a portion of their estate for the purposes of the British Museum. The evidence thus given* was to the effect that, for the public object in question, the price which would be asked by the Commissioners would be 10,000 *l.* per acre (or about one-half of what they had reason to know was the then actual value of the land), and 5,000 *l.* per acre for that limited portion where the necessity of arching over the ground, under the Commissioners' agreement with the Horticultural Society, would leave no ground-floor space available.

For the better understanding of the matter a plan of the Commissioners' estate is herewith enclosed, for the information of the Lords of the Treasury.

The portions of land marked respectively A, B, and C in the plan, were those especially alluded to in the abovementioned evidence; the portion marked C, occupying 70 by 150 feet, or about a quarter of an acre, being the plot where, as stated above, no ground-floor space would be available, and for which the price of 5,000 *l.* per acre only was therefore to be asked. The portion marked B (consisting

* British Museum Committee's Report, 1860. Minutes of Evidence, 3331 *et seq.*

(consisting of a solid block of upwards of four acres, of a depth throughout of 200 feet, except at the lower extremity, where it is 150 feet) is at present occupied by the Machinery Annexe of the Great Exhibition, a building of a strictly temporary nature; whilst the portion marked A consists mainly of land leased, for a short term of three years from Michaelmas last, to the Marquis of Normanby (forming the lower part of the garden to his house in the Kensington Road), whilst still earlier possession can be had of it, if necessary.

These three pieces of land constitute altogether an undivided site exceeding five acres, which Her Majesty's Commissioners are prepared to offer to Her Majesty's Government for the purposes of the Natural History collections of the British Museum, without, however, desiring on the present occasion to define more than approximatively the north and south boundaries of such site.

As respects your inquiry as to the sum for which the Commissioners would convey the site in question to the Government for those purposes, I am to state that although a period of nearly two years has elapsed since the abovementioned offer to part with the land for half its actual value was made by the Commissioners, and that offer cannot be considered as still binding upon them, yet that the Commissioners are still willing to adhere to it, of course on the understanding that all the expenses of every kind connected with the sale shall be defrayed by Her Majesty's Government.

It should here be stated that the abovementioned price of 10,000 *l.* per acre in reality represents a considerably smaller price than that asked by the Commissioners two years ago, in consequence of the loss of interest sustained by them in the interval which has since elapsed.

There will also be one or two minor items of expense that will fall upon the purchaser of the site which it may be convenient to specify before proceeding further.

Until the roads round the estate are taken-to by the parish or public roads, the various occupiers of frontages to them are required to contribute in definite proportions, according to their actual frontage, to the expense of the repair and maintenance of the roads in question.

Under this head, a certain outlay in connection with Prince Albert's Road will have to be defrayed by the Government, in the event of the acquisition by them of the site now under consideration, in the same manner as is already done by them in the case of the portion of the estate occupied by the Department of Science and Art (marked H on the plan), which possesses frontages to both Exhibition and Cromwell Roads.

In the meantime, however, the Commissioners for the Exhibition of 1862 have entered into engagements for expending a large sum on the repair and maintenance of the roads round the estate during the present year, which it is believed will result in their permanent improvement, to the advantage of the various occupiers of frontages to them, and leading, moreover, to a decrease in the abovementioned annual charge for maintenance. Under these circumstances Her Majesty's Commissioners have to propose, as an act of justice to the Commissioners for the Exhibition of 1862, and to the Guarantors of that Exhibition, that Her Majesty's Government shall agree to repay to those Commissioners such a proportion of the outlay now being made by them on the roads as may, in the judgment of the Government Surveyor after the close of the Exhibition, be fairly considered to represent the permanent improvement which it will effect to the half of Prince Albert's Road immediately adjoining the site thereon now proposed to be conveyed to the Government.

The stone kerb and channel now being temporarily laid down by the 1862 Commissioners, in front of the site in question, should also be purchased by the Government at a fair valuation, after the close of the Exhibition.

I am, in the next place, to request that you will call their Lordships' attention to the fact that the site now proposed to be placed at the disposal of Her Majesty's Government extends back to the wall of the arcades on the west side of the Horticultural Gardens, as shown in the accompanying plan, that wall being of the height of upwards of 20 feet. By the terms of the agreement between Her Majesty's Commissioners and the Royal Horticultural Society, the Commissioners have expressly reserved to themselves the right of erecting such buildings as they may think fit upon the arcades in question—a right which the Commissioners have actually exercised in the case of the permanent refreshment-rooms erected by them over the south arcades of the gardens. As, however,

ever, the site which it is now proposed to convey to the Government for the purposes of the British Museum only extends up to the back walls of the arcades (the arcades themselves being upwards of 20 feet wide), the abovementioned right, which is a valuable one in a pecuniary point of view, if exercised hereafter by the Commissioners, might have the effect of wholly obstructing the light and air at the back of the Museum buildings, in addition to shutting them out altogether from the sight of the gardens.

It has occurred to Her Majesty's Commissioners that Her Majesty's Government may think it desirable to take such steps as may secure them from the possibility of such a course being hereafter adopted; and I am to state the readiness of the Commissioners to enter into an agreement not to erect on the top of the arcades in the rear of the Museum buildings any structure, on condition of Her Majesty's Government agreeing, on the other hand, to defray the cost of providing a satisfactory permanent roof and balustrade, &c. to the arcades in question (the present roof being strictly temporary, and not available for the purposes of a promenade).

The enclosed estimate will give the necessary information as to the probable cost which would be entailed upon the Government by this arrangement.

In conformity with the spirit of the Treasury Minute of 15th February 1853, adopted at the period when the estate was the joint property of Her Majesty's Government and Her Majesty's Commissioners, the Commissioners have, of course, to stipulate that the architecture of the buildings which Her Majesty's Government may determine to erect on the estate for the purposes of the British Museum shall be subject to their approval, with the view of securing that unity of design in laying out the great central quadrangle of the estate which is so essential.

In reference to the latter part of your letter, inquiring whether Her Majesty's Commissioners are able to indicate any means of possible future extension of the site, or any other site on their property which might be available in case of necessity arising at a future date, I am to acquaint you, for the information of the Lords of the Treasury, that although the site in Prince Albert's Road, already spoken of, comprises all the land on the western side of the estate which Her Majesty's Commissioners are now able to place at the disposal of Her Majesty's Government, the plot marked F. on the plan, containing upwards of three acres, abutting on Exhibition Road on the eastern side of the quadrangle, is one which appears to be in all respects well adapted for the purpose, it possessing all the advantages of situation and proximity to the large open space occupied by the Horticultural Gardens enjoyed by the corresponding land in Prince Albert's Road. If purchased by the Government, the subsequent acquisition by them of the Eden Lodge estate (the property of Lord Auckland), marked G. on the plan, and of the triangular strip of land (the property of the Commissioners) lying to the east of it, and marked I., would place the Government in the possession of upwards of six acres on the eastern side of the estate, in addition to the five acres on the western side now offered to them.

Her Majesty's Commissioners would be willing to dispose of this plot F. to Her Majesty's Government at the present moment, at the same price as that already asked for by them for the land in Prince Albert's Road—viz., 10,000 *l.* per acre. They do not, however, feel that they would be justified, in the uncertainty in which they now are as to the demands which may be made upon them for the grant of sites on their estate for purposes such as those contemplated by them when they purchased it, in keeping this offer open for an indefinite period.

Under all the circumstances of the case, Her Majesty's Commissioners are willing to agree to part with the plot marked F. to Her Majesty's Government for the abovementioned price of 10,000 *l.* per acre, should the Government intimate to them their desire to purchase it at any time within 12 months from the present date; and although the Commissioners will not guarantee that, after the expiration of the period in question, the land shall be sold at that price, yet they are further prepared to engage to give to Her Majesty's Government the refusal of its purchase for a period of two years from the date of this letter, at such price as may at the time be agreed upon.

I have, &c.

The Secretary to the Treasury, (signed) *Edgar A. Bowring.*

(Enclosure.)

ESTIMATE referred to in the accompanying Letter.

	£. s. d.
To take off the present roof, to square building western side (K in plan), provide and fix stone pillars, wrought-iron girders and joists, wood fillets and concrete, and finish on same with mineral rock asphalte, and make good brickwork and rainpipes to same, will amount to the sum of Eight hundred and thirty-two pounds - - - - - - -	832 –
Take off the present roof of the Western Central Arcade, and put wrought-iron joists, concrete, and asphalte as last described over ditto, finish on top of same with Minton's tiles of the pattern now being used in new galleries, South Kensington Museum; put slate channel at back with outlets and rainpipes, and connect same to drain at back of arcade, and make all good, will amount to the sum of Four thousand one hundred and six pounds - - - - - - - - - -	4,106 – –
(If, instead of putting asphalte under the tiles, a bed is formed of two courses of plain tiles laid on the concrete in Portland cement, and Portland cement floated surface on ditto, ¾ inches thick, a saving will be effected of 135 *l.* This could not be guaranteed watertight.)	
To build brick parapet to West Central Arcade, with piers at intervals, and bricks on edge coping same as to Northern Arcades, will amount to the sum of One hundred and four pounds - - - - - -	104 – –
To take down the present cement panel of balustrade in return of western square building, next Central Arcade, provide and fix rubbed Portland stone steps, landing and curbs, brick spandrils and bearing walls, including extra wrought-iron joists to strengthen the bearing, will amount to the sum of One hundred and seventy-four pounds - - -	174 – –
Memo. In the above Estimates credit is given for old materials.	
Also to provide and fix Portland stone balustrade to Western Central Arcade, the same as to Northern Arcades, or of equal value, will amount to the sum of Seven hundred and eighty-nine pounds - - -	789 – –
£.	6,005 – –

(signed) *George Smith & Co.*

13, South-street, Grosvenor-square,
27 March 1862.

The Secretary to the Treasury to the Commissioners of the Exhibition of 1851.

Treasury Chambers,
10 April 1862.

My Lords and Gentlemen,

THE Lords Commissioners of Her Majesty's Treasury have had before them Mr. Bowring's letter of the 2nd instant, on the subject of the sale to Her Majesty's Government of land at South Kensington, required as a site for the collections of Natural History in the British Museum; and their Lordships have directed me to acquaint you that they accept, subject to the approval of Parliament, the proposal conveyed in Mr. Bowring's letter as a liberal offer on your part, and an advantageous arrangement for the public. Their Lordships propose to purchase the plots marked A and B on the plan which accompanied Mr. Bowring's letter on the terms named, viz., 10,000 *l.* per acre, leaving the question of a further acquisition over the plots C and D, or either of them, for consideration after communication with the Trustees of the British Museum. This communication will take place forthwith.

My Lords agree to the proposals regarding the contingent charge to be thrown on Her Majesty's Government on account of the roads; and also, that on consideration of your surrendering your right to build over the arcade of the Horticultural Gardens, bordering on the intended site of the Museum, the expense of re-roofing that portion of the arcade should be borne by the Government.

The question whether the expense of this work should be paid for, on estimate, to you, or whether the work should be executed at the charge of the Government,

PLAN

OF THE

KENSINGTON GORE ESTATE

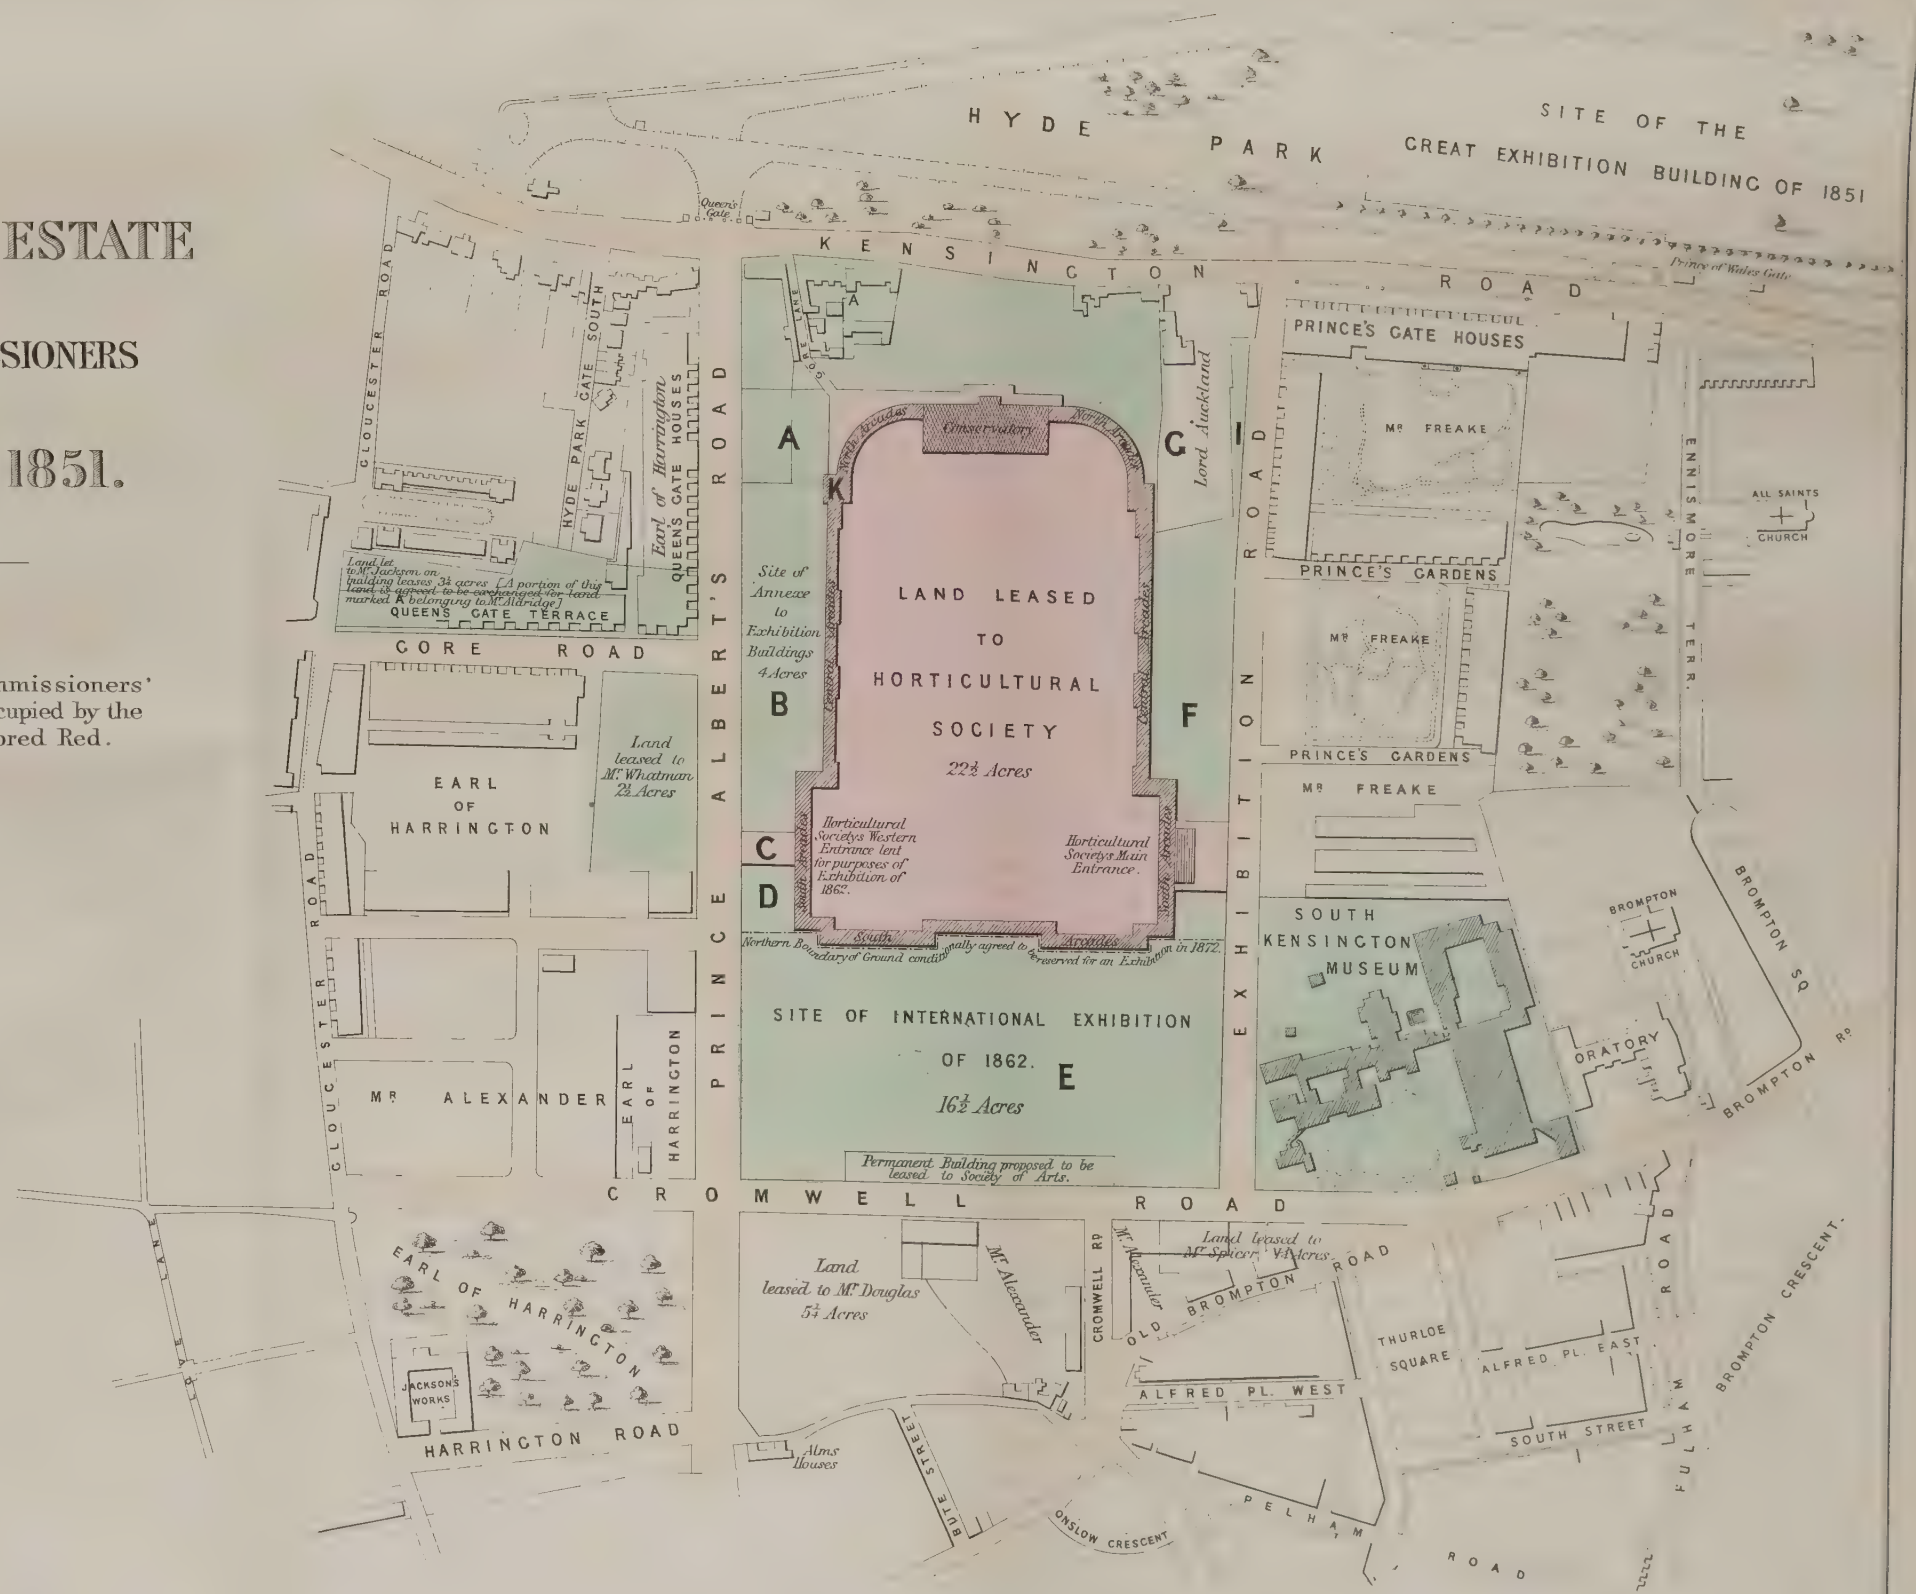
OF

HER MAJESTY'S COMMISSIONERS

FOR THE

EXHIBITION OF 1851.

N.B. The green color indicates the Commissioners' Estate, except that portion of it occupied by the Horticultural Society, which is colored Red.



SCALE OF FEET.

100 50 0 100 200 300 400 500 600 700 800 900 1000 FEET

№117.—Ordered, by the House of Commons, to be printed, 11 March 1864

ment, on a plan to be approved of as a part of the building of the Museum, may be left for further consideration.

As regards the time at which the purchase-money should be paid, my Lords consider that the arrangements for that purpose will naturally depend upon the time at which you will be prepared to surrender the site, after the settlement of the conveyance. Their Lordships, however, apprehend that the annexe to the Exhibition of 1862 can hardly be cleared away from the ground before the winter months, when little can be undertaken towards the advancement of the building. It will not, therefore, be expedient to make any provision in the estimates for the present year for the cost of the site; but as they are aware that you are burthened with a mortgage of the property, they will be prepared to make a reasonable allowance on account of interest on the purchase-money, from the time at which you may be in a position to transfer the property.

My Lords agree to the proposal by which they will have the option of purchasing the plot marked F on the plan, at the price of 10,000 *l.* per acre within a year from the present time, and the refusal of its purchase, at a price to be agreed upon, for the further term of one year.

I am, &c.

The Commissioners of the Exhibition of 1851. (signed) *F. Peel.*

The Secretary to the Treasury to the Trustees of the British Museum.

Treasury Chambers,
10 April 1862.

My Lords and Gentlemen,

With reference to Mr. Panizzi's letter of the 20th ultimo, relative to the acquisition of a site at South Kensington for the Natural History Collections in the British Museum, I am directed by the Lords Commissioners of Her Majesty's Treasury to transmit herewith, for your information, copies of a letter and its enclosures from the Secretary to the Commissioners of the Exhibition of 1851, on the above-mentioned subject, together with copy of a letter directed by their Lordships to be returned thereto.

I am, &c.

The Trustees of the British Museum. (signed) *F. Peel.*

Mr. *Panizzi* to the Secretary to the Treasury.

Sir, British Museum, 3 May 1862.

I am directed by the Committee of the Trustees of the British Museum, appointed on the 10th of February last, to acknowledge the receipt of your letters of the 24th March and 10th of April, with enclosures, and to state, for the information of the Lords Commissioners of Her Majesty's Treasury, that the Committee have taken the above documents into their consideration, and have ordered me to submit the following observations to their Lordships.

1. With reference to the extent of site which is considered requisite for the accommodation of the British Museum Collections of Natural History at South Kensington, the Committee would recommend the purchase of the whole space (A. B. C. D.) on the west side of the Horticultural Society's Gardens, as described in Mr. Bowring's letter to the Treasury dated the 2d of April. As to the architectural arrangements of the intended building, the present impression of the Committee is in favour of a building of two stories; but the Committee would wish this point, and others connected with the form and internal dispositions of the building, to be carefully considered by architectural authorities before giving a decided opinion. The accompanying copy of a report from the superintendent of the departments of Natural History, on these points, is submitted for the consideration of Her Majesty's Government.

2. I am also to call the attention of the Lords of the Treasury to that part of the Committee's report (Parliamentary Return, No. 97, p. 11) which recommends the removal of the ethnographical collections and of the portraits and pictures now in the ornithological rooms from the present Museum building. Physical Ethno-

graphy might properly accompany the Natural History Collections; as to objects illustrative of the manners and customs of men, the Committee venture to suggest that the South Kensington Museum might be a proper place for them.

3. In making provision for the reception of the portraits and pictures now in the Museum, Her Majesty's Government may perhaps think fit to relieve the Trustees of the British Museum from the charge of those pictures, which, although forming part of the Trust, are exhibited at the National Gallery, at the South Kensington Museum, and recently, it is said, elsewhere.

4. The Committee think it desirable that in the Act of Parliament which will have to be passed, authorising the removal of certain objects from the present Museum premises, it should be left to the discretion of the Trustees, with the concurrence of Her Majesty's Government, to decide, in case of doubt, whether certain objects should be removed or not, providing at the same time against the permanent repeal of Section IX. of 26 Geo. 2, c. 22, which is understood to order that no part of the collections shall be carried out of the precincts of the Museum.

5. The Committee wish to invite the reconsideration, on the part of the Lords Commissioners of Her Majesty's Treasury, of their determination (announced in their letter of the 10th of April to the Commissioners of the Exhibition of 1851) to postpone making provision for beginning the new building until after the present year. It appears to the Committee that it would be desirable to proceed with that building without any delay whatever.

6. I am particularly desired to call the attention of the Lords Commissioners of Her Majesty's Treasury to that part of the report above referred to (Parliamentary Return, No. 97, p. 22), wherein it is stated "that the new building facing Montague-street, the building for the bookbinder . . . . . and the construction of the new principal staircases should be commenced immediately," and that the alterations "which will be required on the east side of the King's Library" should be rapidly completed. The proposed adaptation of those parts of the existing building to other than the present purposes cannot be proceeded with until provision is made for the reception of the objects which are to be removed from their present localities.

I have, &c.

The Right Hon. Frederick Peel, M. P., &c. &c. &c.

(signed) *A. Panizzi*,
Principal Librarian.

(Enclosure.)

Department of Natural History, British Museum,
19 April 1862.

Collections of Natural History, arranged and prepared for public exhibition, are best seen and examined in galleries lit from above.

Few of the series can be properly studied and compared in rooms lit by side-windows.

The series of specimens which would be located with least disadvantage in galleries with side-windows are those of geology, of osteology, of the class mammalia, and of physical ethnology.

The remaining series of the natural history, especially the mineralogy, the birds, the shells, the corals and other zoophytes, the insects, crustacea, arachnidæ, annulata and other vermes, the fishes and reptiles, all the smaller specimens preserved in spirits, with the botany, should be seen in galleries lit by skylights, at the angle between the wall and roof, as in the Museum of the College of Surgeons.

A room lit by side-windows has this disadvantage, that it affords the smallest extent of that service, viz., vertical or wall space, which is most essential for systematically arranged and exhibited specimens. Not only is so much of the wall which is perforated by the windows, but the spaces between these inlets of the light, are unavailable for exhibition purposes; consequently the side of the gallery with the windows is virtually lost.

In a museum building of three stories a large proportion of the arranged series would be seen under circumstances detracting from their utility to science, and their attractive display for the public.

The proportion of the Natural History relegated to the upper story would include as much of the most attractive series as could there be arranged, under a mode of lighting showing them to the best advantage to the general visitor, and most favourably to the scientific student. But this part of the museum would be the most difficult of access, and many who had traversed the galleries of a ground-floor and of a first-floor would probably be deterred, by the toil of another staircase, from mounting to those galleries where only the specimens could be properly or best displayed, including the choicest and most beautiful parts of the Natural History series.

Finally,

Finally, in reference to the economy of watching, the greater the proportion of galleries in one vista and on one floor, the more easily are they overlooked; according to the number of stories and staircases, the number of attendants must be increased for effective supervision of visitors.

(signed) *Richard Owen.*

The Assistant Secretary to the Treasury to the Committee of the Trustees of the British Museum.

My Lords and Gentlemen, Treasury Chambers, 12 May 1862.

With reference to Mr. Panizzi's letter of the 3d inst, further relative to the increased accommodation required for the collections in the British Museum, I am directed by the Lords Commissioners of Her Majesty's Treasury to acquaint you, that my Lords prefer postponing for a time any further communication to the Commissioners for the Exhibition of 1851 regarding the site to be acquired at South Kensington, as it is understood that Her Majesty's Government has the option of purchasing the whole or any portion of the space comprised in the plots marked A, B, C, D, on the Plan; and the extent of the space which will be required must depend in great measure on the description of building to be erected thereon.

My Lords will be prepared to enter into further communication with you on the subject of the design for the building; and they will only observe at present that the report of the Superintendent of the Departments of Natural History does not appear to them to be conclusive in favour of the adoption of a plan for a building of two stories, with a view only to internal requirements; and having regard to the extent of ground to be covered, and to the character of the private houses erected in the neighbourhood, they incline to think it deserves serious consideration whether, for the sake of architectural effect, the Museum building should not be of a lofty elevation.

Their Lordships will cause the Bill to be submitted to Parliament, to be framed in accordance with your suggestions in regard to the power to transfer portions of the collections of the Trustees to other institutions or departments of Government.

With respect to your wish that my Lords should re-consider their determination to postpone making provision for the new building until after the present year, I am to observe that such determination had reference only to the preparation of an estimate to be submitted to Parliament for the purchase of the site, &c., but as soon as possession of the ground is given to Her Majesty's Government, my Lords will be prepared to authorize the commencement of the works for the new buildings on plans to be previously approved by them.

My Lords contemplate the commencement of the new building at the Museum, facing Montague-street, the building for the bookbinder, and the construction of the new principal staircase, and the completion of the alterations which will be required on the east side of the library.

I am, &c.

The Committee of the Trustees of the British Museum. (signed) *Geo. A. Hamilton*

Mr. *Panizzi* to the Secretary to the Treasury.

Sir, British Museum, 12 July 1862.

The General Meeting of the Trustees of the British Museum, held this day, have taken into their consideration the situation in which they are placed by the Vote of the House of Commons on the 19th May last, upon the Bill introduced by Her Majesty's Government at the instance of the Board of Trustees.

I am directed by the Trustees to express their earnest hope that the subject of increased accommodation to the collections of the British Museum may engage the attention of Her Majesty's Government during the ensuing recess, and that they may be favoured, as soon as may be convenient, with an intimation of the views to which Her Majesty's Government may now incline.

I have, &c.

The Secretary, Treasury. *A. Panizzi.*

The Secretary to the Treasury to the Trustees of the British Museum.

My Lords and Gentlemen, Treasury Chambers, 21 July 1862.

I AM directed by the Lords Commissioners of Her Majesty's Treasury to acknowledge the receipt of Mr. Panizzi's letter of the 12th inst. on the subject of the increased accommodation required for the collections of the British Museum, and I am to state, that in conformity with the intention already announced in Parliament since the Vote on the British Museum Bill, Her Majesty's Government will not fail to prosecute the subject during the recess, with a view to an early proposal to Parliament in the ensuing Session.

I am, &c,

The Trustees of the British Museum. (signed) *F. Peel.*

Mr. *Panizzi* to the Secretary to the Treasury.

Sir, British Museum, 13 July 1863.

I AM directed by the Trustees of the British Museum to transmit to the Lords Commissioners of Her Majesty's Treasury the accompanying reports on the want of space for the British Museum collections, and to recommend the subject to the early consideration of Her Majesty's Government.

See page 41 of this Return.

I have, &c.

A. Panizzi,

Principal Librarian.

The Secretary, &c. &c. &c. Treasury.

The Assistant Secretary to the Treasury to the Trustees of the British Museum.

My Lords and Gentlemen, Treasury Chambers, 23 July 1863.

THE Lords Commissioners of Her Majesty's Treasury have had before them Mr. Panizzi's letter of the 13th instant, enclosing reports on the want of space for the collections of the British Museum, and their Lordships have directed me to acquaint you that Her Majesty's Government will revert to the consideration of this subject before the next Session of Parliament shall commence.

I am, &c.

The Trustees of the British Museum. (signed) *Geo. A. Hamilton.*

Mr. *Panizzi* to the Secretary to the Treasury.

Sir, British Museum, 27 July 1863.

I HAVE had the honour of receiving and of laying before the Trustees your letter of the 23d instant, and I am directed to return to the Lords of Her Majesty's Treasury their thanks for that communication.

I am further to state that the inconveniences mentioned in my letter of the 13th instant are increasing daily; the Trustees therefore hope that, as soon as their Lordships have come to a determination on the subject, the same will be communicated to them.

I have, &c.

The Secretary, Treasury. *A. Panizzi.*

Mr. *Panizzi* to the Secretary to the Treasury.

Sir, British Museum, 11 January 1864.

WITH reference to my letter of the 13th July last, and Mr. Hamilton's reply of the 23d of that month, acquainting me, for the information of the Trustees, that Her Majesty's Government would revert to the consideration of the subject of the want of space for the collections of the British Museum before the next

next Session of Parliament, I am directed by the Trustees to acquaint you, for the information of the Lords Commissioners of Her Majesty's Treasury, that the attention of the Trustees has been called to an advertisement* issued by the Commissioners of Her Majesty's Works and Public Buildings, referring, as it appears, to a building proposed to be erected for the reception of the Natural History Collections now in this Museum; and I am to request that the Lords Commissioners will be pleased to furnish to the Trustees the plans and particulars proposed to be forwarded to architects, together with such additional information as their Lordships may deem proper to give to the Trustees on a subject so intimately affecting the welfare of the collections which are to continue to be vested in them for the public use, wherever those collections may be placed.

I beg leave at the same time to remind the Lords Commissioners of the hope of the Trustees, expressed in my letter of the 27th July last, that as soon as their Lordships should come to a determination on this subject, the same might be communicated to the Trustees.

I have, &c.
(signed) *A. Panizzi.*

The Right Honourable Frederick Peel, M.P.,
&c. &c. &c.

The Assistant Secretary to the Treasury to the Trustees of the British Museum.

My Lords and Gentlemen. Treasury Chambers, 13 January 1864.

With reference to Mr. Panizzi's letter of the 11th instant, relative to an advertisement which has appeared in the public papers inviting architects to send in designs for buildings proposed to be erected on the site of the International Exhibition for the reception of the Natural History Collections of the British Museum, I am directed by the Lords Commissioners of Her Majesty's Treasury to acquaint you that my Lords regret that the advertisement should have appeared in the public papers without the previous communication with you which you have been given to expect. My Lords learn that it has been published prematurely through some inadvertence on the part of the Board of Public Works and Buildings, in anticipation of expected instructions from this Board. Their Lordships have, as yet, received only such general information as has enabled them to concur in the suggestion for commencing the new building on the eastern front of the site, but they have requested the First Commissioner of Works to furnish them with details of the plans proposed, which will be communicated to you as soon as they are received

I am, &c.
(signed) *Geo. A. Hamilton.*

The Trustees of the British Museum.

The Assistant Secretary to the Treasury to the Trustees of the British Museum.

My Lords and Gentlemen, Treasury Chambers, 21 January 1864.

I am directed by the Lords Commissioners of Her Majesty's Treasury to transmit herewith, with reference to Mr. Panizzi's letter of the 11th instant, copy of a Report from the First Commissioner of Works, dated the 18th instant, with a printed particular and plan of the new buildings proposed to be erected on the portion of the site of the Exhibition of 1862, purchased by Her Majesty's Government.

My Lords have requested the First Commissioner of Works to furnish an explanation on the question raised in Mr. Panizzi's letter of the 18th instant, regarding the space proposed to be allotted for the Natural History Collection of the British Museum.

I am, &c.
(signed) *Geo. A. Hamilton.*

The Trustees of the British Museum.

---

* For copy of advertisement, *see* p. 45.

(Enclosure.)

My Lords, Office of Works, &c., S.W., 18 January 1864.

I HAVE the honour to acknowledge the receipt of Mr. Hamilton's letter of 13th instant, with reference to plans for building on the site of the International Exhibition, purchased by Her Majesty's Government for purposes of science and art; and I have to express my regret that, owing to circumstances to which I need not now advert, the advertisement alluded to in the letter from Mr. Panizzi, written by direction of the Trustees of the British Museum, should have appeared in the public papers before I received this communication from your Lordships.

It is important that the data on which a proposal may be securely founded for the erection of a building fitted for the exhibition of the Natural History Collections of the British Museum on the site recently purchased at South Kensington, should be in the possession of Her Majesty's Government before the time at which all the estimates must be laid upon the table of the House of Commons; and it was necessary that I should take steps, without further delay, for obtaining a plan and estimate of such a building. I have accordingly prepared particulars and a plan to be communicated to the architects, who accept the invitation to submit designs, and I now enclose a copy of the particulars and plan for the information of the Trustees of the British Museum.

I am, &c.

The Right Honourable the Lords Commissioners of Her Majesty's Treasury. (signed) *W. Cowper.*

The Assistant Secretary to the Treasury to the Trustees of the British Museum.

Treasury Chambers,

My Lords and Gentlemen, 23 January 1864.

I AM directed by the Lords Commissioners of Her Majesty's Treasury to transmit herewith copy of a Report, dated the 20th instant, from the First Commissioner of Works, relative to the inquiry contained in Mr. Panizzi's letter of the 18th instant, respecting the proposed new buildings to be erected on the site of the Exhibition of 1862, for the Natural History Collections of the British Museum.

I am, &c.

The Trustees of the British Museum. (signed) *George A. Hamilton.*

(Enclosure.)

My Lords, Office of Works, &c., S. W. 20 January 1864.

IN reply to Mr. Hamilton's letter of 19th instant, requesting that I should furnish to your Lordships the means of answering an inquiry addressed to your Lordships by the Trustees of the British Museum, on the 18th instant, I have the honour to state, that in order to provide such data as my department is expected to furnish for the consideration of the best way of turning to account the site at South Kensington, purchased by Her Majesty's Government for purposes of science and art, I have issued a general invitation for designs for laying out that site, and for erecting on a portion of it a building capable of containing all those collections of which the removal from the British Museum to South Kensington has been contemplated. Those designs which are approved and the estimates of their cost will materially assist the Government in coming to a decision as to whether any building shall be erected at South Kensington for the Natural History Collection, and if so, what should be the size and character of it. An attempt to come to a conclusion upon these points at the present moment would be premature; but, as it was necessary to define as clearly as possible the subject matter of the architectural competition, and to state the amount of accommodation to be set out in the designs, I have prescribed to the architects that their designs shall provide that extent of floor and wall space which appeared, in my own opinion, and in the opinion of the Superintendent of the Natural History Department, and of others, to be amply sufficient for the present and prospective wants of the Institution.

I may state, however, that before any architect is actually commissioned to prepare the drawings for such a building, care should be taken that no more accommodation is provided than is necessary; and that such questions as that which has been raised in the letter of the Trustees of the British Museum, as to the number and size of the rooms allotted to the keepers and their assistants, and to workshops requiring good or special lights, should be carefully and minutely investigated.

I am, &c.

The Right Hon. the Lords Commissioners of Her Majesty's Treasury. (signed) *W. Cowper.*

Mr. *Panizzi* to the Lords Commissioners of the Treasury.

My Lords, British Museum, 23 January 1864.

I am directed by the Trustees of the British Museum to acknowledge the receipt of your Lordships' letter of the 21st instant, and the copy of a Report from the First Commissioner of Works transmitted therewith; I am also to acknowledge the receipt of your Lordships' letter of this day's date (which arrived while the Trustees were in deliberation), with its enclosed copy of a second communication to your Lordships from the First Commissioner of Public Works, dated the 20th instant.

I am to submit to your Lordships that the Standing Committee of the Trustees are unable, with the imperfect information they now possess, to form any opinion upon the calculations with regard to the space required in the new Museum buildings at South Kensington, as stated in the paper communicated to your Lordships by the Office of Works; and the Trustees request that more complete information may be forwarded to them as soon as possible, if they are to be considered in any degree responsible for the amount of accommodation on which the plans are to be founded.

I have, &c.
A. Panizzi,
Principal Librarian.

The Right Hon. the Lords Commissioners of Her Majesty's Treasury.

The Assistant Secretary to the Treasury to the Trustees of the British Museum.

My Lords and Gentlemen, Treasury Chambers, 26 January 1864.

I am directed by the Lords Commissioners of Her Majesty's Treasury to acquaint you, with reference to Mr. Panizzi's letter of the 23d instant, requesting further information respecting the proposed new buildings at South Kensington, for the Natural History Collections of the British Museum, that my Lords have desired the information for which you ask to be furnished; and I am to state that no plans will be finally adopted by Her Majesty's Government, except upon previous communication to you.

I am, &c.
(signed) *Geo. A. Hamilton.*

The Trustees of the British Museum.

The First Commissioner of Works to the Lords Commissioners of the Treasury.

My Lords, Office of Works, &c., S. W., 1 February 1864.

In reply to your Lordships' letter of the 26th instant, with reference to furnishing information to the Trustees of the British Museum as to the building proposed to be erected on the site of the Exhibition of 1862, I beg to state that when the designs now in course of preparation have been received, I shall be in a position to furnish to the Trustees the information required, to enable them to express an opinion upon the arrangement, dimensions, and number of rooms that ought to be allotted to the Collection of Natural History.

In determining on the first building to be erected on the site of the Exhition, regard should be had to the following consideration: The building should form part of a general design for laying out the whole of the site, and it should have the architectural dignity that is suitable to a National Museum; convenience and economy should be combined as much as possible; the rooms should be lighted in the most favourable manner, and should be adapted to the display of a large number of objects without waste of space; they should be arranged for the convenience of the public, and of the keepers, and their assistants; and the accommodation provided should be sufficient for the exhibition of that part of the collection which it is important to show the public, and should be capable of extension as the collection increases.

These, with other considerations, should be brought into view at the same time, and it would have been unfortunate if the Trustees had been obliged to commit

commit themselves to an opinion on the extent of space to be provided for exhibition irrespective of other considerations. But the published opinion of Professor Owen fortunately supplied the data on which the competing architects might base their designs; and they were accordingly referred to a Plan prepared under the direction of Professor Owen in 1862, and explained in a publication of his of the same year, and presented to Parliament in 1863; and in order to render the instructions as precise as possible, the architects were told that, in addition to the galleries marked upon that Plan, a Library, Lecture Room, and 25 rooms for keepers and their assistants in attendance on the collection, were to be set out. Thus a clear and definite instruction could be given to the architects, without precluding that full consideration which will, I hope, be given hereafter to the question of the extent of accommodation that ought to be provided.

I am, &c.

The Right Honourable the Lords Commissioners of Her Majesty's Treasury. *W. Cowper.*

The Secretary to the Treasury to the Trustees of the British Museum.

Treasury Chambers,
3 February 1864.

My Lords and Gentlemen,

With reference to previous correspondence on the subject of the proposed new buildings to be erected on the site of the Exhibition of 1862, I am directed by the Lords Commissioners of Her Majesty's Treasury to transmit herewith copy of a further report, dated the 1st instant, from the First Commissioner of Works, together with copy of the reply which my Lords have caused to be returned to it.

I am, &c.

The Trustees of the British Museum. (signed) *F. Peel.*

(Enclosure.)

Sir, Treasury Chambers, 3 February 1864.

The Lords Commissioners of Her Majesty's Treasury having had before them your report of the 1st instant, further, relative to the building proposed to be erected on the site of the Exhibition for 1862, for the Natural History Collections of the British Museum; and their Lordships have directed me to acquaint you, with reference to your statement that "when the designs now in course of preparation have been received, you will be in a position to furnish to the Trustees the information required to enable them to express an opinion upon the arrangement, dimensions and number of rooms that ought to be allotted to the Collection of Natural History," that it will be the most convenient course that any communication on the subject with the Trustees of the British Museum should be made through the medium of this Board, as their Lordships are not only responsible to Parliament generally for arrangements for providing fitting accommodation for the Collections of the British Museum, but, as you are aware, have in this particular case undertaken to confer with the Trustees previously to the adoption of any plan for providing them with additional space.

I am, &c.

The First Commissioner of Works. (signed) *F. Peel.*

Part II.

COPIES of Reports which have been received by the Trustees from the Heads of Departments of the British Museum, on the Subject of providing Additional Accommodation for the several Collections belonging to that Establishment (from the 22d of February 1862, the date of the last Letter in Parliamentary Paper, No. 97, 1862):—Also, Copies of Minutes of the Trustees of the British Museum, on the Subject of providing Additional Accommodation for the several Collections belonging to that Establishment (from same date as above).

Extract from the Minutes of the Trustees.

At a Standing Committee, 22 February 1862.

Read two letters from the Treasury, one addressed to the Trustees and one to the Principal Librarian, both relating to the plans for increased accommodation in the Museum.

Referred to the Committee appointed at the special general meeting of the 10th instant; the Principal Librarian to obtain reports from Professor Owen and the heads of the Natural History Departments on the question asked in the Treasury letter addressed to the Principal Librarian.

Letter from the Principal Librarian to the Superintendent of the Natural History Departments.

Dear Sir, 25 February 1862.

The Lords Commissioners of Her Majesty's Treasury have requested me to bring under the notice of the Special Committee of the Trustees, appointed on the 10th instant, the question of the extent of the site which should be acquired for the purpose of providing for the collections proposed to be removed from the present British Museum buildings. In order to facilitate answering their Lordships' question, I beg that you will be good enough to let me know the superficial amount of space which you would consider requisite for the several departments of Natural History, for the purpose of arranging, preserving and exhibiting, in a fitting manner, collections worthy of this country, as well as of its capital, and intended, not only for the special advantage of students and scientific men, but, generally, for the rational amusement and instruction of all classes, now and for some time to come.

I shall be obliged by your affording me the above information on or before Tuesday, the 4th of March, to be laid before the Committee which is to give an answer to the inquiries of the Government.

Believe me, &c.
(signed) *A. Panizzi.*

Professor Owen,
&c. &c. &c.

Similar letter to the above, bearing the same date, addressed to each of the Keepers of the Natural History Departments; viz.,—

The Keeper of the Department of—

Zoology (Dr. Gray).
Geology (G. R. Waterhouse, Esq.).
Mineralogy (N. Story-Maskelyne, Esq.).
Botany (J. J. Bennett, Esq.)

With the following alteration,—"your department," instead of "the several Departments of Natural History," lines 8 and 9.

Similar letter, also addressed to the Keeper of the Department of Oriental, British, and Mediæval Antiquities and Ethnography (S. Birch, Esq.), with the following variations:—"the Ethnographical Collection in a fitting manner, worthy of this country, as well as of its capital, now and for some time to come," in lieu of all of the first paragraph after "exhibiting," line 10.

Extract from the Minutes of the Trustees.

At a meeting of the Committee appointed at the Special General Meeting on the 10th February, for carrying on communications with the Treasury relative to their Lordships' Minute of * 13th November 1861, and the report thereon of the Committee appointed on the † 3d December,—

6 March 1862.

Read, the Minute of the Special General Meeting on the ‡ 10th ultimo, appointing this Committee; and the Minute of the Standing Committee on the § 22d February, referring to this Committee two letters from the Treasury.

The two Treasury letters (dated 21st and 22d February) were then read.

Letters, dated the 25th ultimo, were read, from the Principal Librarian to the Superintendent, and to the heads of the Natural History Departments, as well as to the Keeper of the Oriental and Mediæval Antiquities.

Professor Owen's and Dr. Gray's statements, in answer to the Principal Librarian's letters, were read; similar statements from Mr. Waterhouse, Mr. Maskelyne, Mr. Bennett, and Mr. Birch, were laid before the Board.

Resolved, That the whole of these statements be privately printed, and that a copy be sent to each member of this Committee. That this meeting do adjourn to Tuesday the 18th instant, at eleven o'clock.

* For this Minute, *see* Parliamentary Return, No. 97, 1862, p. 3.
† Ib. p. 10.
‡ Ib. p. 22.
§ *See ante*, p. 15.

Statements of the superficial Amount of Space requisite for the several Departments of Natural History, addressed to the Principal Librarian, by the Superintendent and Keepers of those Departments; also, Statement from the Keeper of the Department of Oriental and Mediæval Antiquities of the superficial Amount of Space requisite for the Ethnographical Collection, addressed to the same.

From the Superintendent of the Natural History Departments.

My dear Sir, 6 March 1862.

I have received your letter of the 25th February, begging me to let you "know the superficial amount of space which I would consider requisite for the several departments of Natural History, for the purpose of arranging, preserving, and exhibiting, in a fitting manner, collections worthy of this country, as well as of its capital, and intended not only for the special advantage of students and scientific men, but, generally, for the rational amusement and instruction of all classes, now and for some time to come;" your request having reference to one from the Lords Commissioners of Her Majesty's Treasury in regard to the extent of the site which should be acquired for the above purposes.

In

In reply I have to state that, agreeably with a Report on this subject printed, with a plan, in the "Return relating to the British Museum" delivered to the House of Commons on the 16th March 1859, I am of opinion that a superficial space of not less than 5 acres should be provided for the above objects, and under the comprehensive views of their application stated in your letter.

In that estimate it was calculated to provide, in a building of two stories, for the exhibition of no larger proportion of specimens in each class than is shown in the series of Birds, Shells, and Minerals now exhibited, as systematically arranged classes, in the galleries of the present Museum; and the prospect of "time to come," in regard to provision of space for additions, was limited to the period of 30 years. Other requisite data, on which this estimate was made in 1859, and is now repeated in reference to additions received from that time, are:—

1st. The number of specimens of the several classes in each department of Natural History now in the Museum.

2d. The number of such specimens exhibited to public visitors.

3d. The superficial space occupied by such arranged exhibitions.

4th. The number of the known species of each class.

5th. The number and nature of the desiderata, especially in relation to the space they would require for exhibition, to be added to present acquisitions, in order to bring up the several collections to the proposed condition—"worthy of the country as well as of its capital."

DEPARTMENT OF ZOOLOGY.

Class Mammalia.

The number of specimens (not osteological) belonging to this class, now in the Museum, is about 5,300.*

The number of specimens stuffed and placed in the wall-cases and on the floor of the exhibition rooms (1, 40, 41, Plan No. III.) is 3,525. These occupy a space the superficial area of which is 6,600 square feet, equivalent to a gallery of 220 feet by 35 feet.

In this space only one-fourth of the specimens are sufficiently displayed: those in the cases being packed from two to five deep: some of those on the floor stand side by side in close rows: others are affixed to the walls too high for useful examination—whence it appears that the present space allotted to the Class Mammalia suffices for the proper exhibition of about 1,000 stuffed specimens, and those chiefly of the smaller members of the class.

The number of known species of Mammalia at the present date is not less that 3,500.

The specimens of each species required "for students and scientific men" must include a male, a female, and young, showing characters of immaturity and of growth, amounting to 7,500 specimens for the illustration of the class as now specifically determined and named.

The Mammalian organization is that under which an individual animal attains the greatest bulk. A museum destined "to afford rational amusement and instruction to all classes" should exemplify the peculiar property of the class as manifested by the hugeness of certain of its members. In the present Mammalian Gallery the giraffe is the largest adult specimen shown, and a walrus of 14 feet in length occupies the greatest space as a single specimen.

Among the chief Mammalian desiderata, and these most easy of acquisition, are full-sized adult specimens of the species of elephant (*Elephas Asiaticus*, *El. Africanus*, *El. Sumatranus*). In the present space there is a young Asiatic elephant, one-fourth the full size, and a suckling African elephant.

There are important desiderata in the series of rhinoceroses and tapirs. Full-sized examples of the largest bears, seals—especially the elephantine species, now verging to extinction—also of manatis and dugongs, are wanting. And the Mammalian Gallery of a British Museum of Zoology should be estimated with a view to display one full-sized specimen of one of the species of the larger Cetacea.

Our desiderata chiefly include the species that make most demand upon exhibition space, and the principle of selection must operate in restricting the choice for stuffing and exhibition from the 7,500 specimens exemplifying the Class Mammalia as at present known.

The ratio at which this knowledge has been acquired may be estimated by the fact that of one order, the *Marsupialia*, of which, in 1830, 50 species were recorded, there are now known and named 350 species. The discovery of one of the largest of the quadrumanous order dates but 15 years back: and a glance at the proportion of the intertropical earth yet unexplored justifies expectations of many new forms and species, and warns us of the demands that may be made upon exhibition space for this class in a National Museum of Zoology.

This

* I have not received the return of the precise number asked for, from the Keeper of the Department.

This space must be estimated in reference to the convenient display, accessible to scrutiny, of every part needed by the science; and not merely for such disposition of the individual specimen, but for orderly systematic array of the series, enabling the intelligent visitor to discern the extent of the class, and the student to trace the kind and order of the variations which have been superinduced upon its fundamental characters.

For such exhibition of selected specimens from the known species of Mammals, leaving space for the reception of subsequent acquisitions during 30 years—under a system of arrangement showing how the Mammalian type is progressively modified and raised from the Monotreme to Man, and exemplifying the gradations by which one order merges into another—I estimate the Mammalian Gallery to require a length of 850 feet, with a breadth of 50 feet, or a superficial area of 42,500 feet.

Class Aves.

The number of specimens, exclusive of bones, eggs and nests, of the Class of Birds, in the Museum, is about 25,000.*

The number of specimens stuffed, arranged, and exhibited to public visitors is about 14,000.

The number of species now known and named is about 8,000.

For the purposes of science each species of bird requires to be exemplified by a male and female in mature plumage, and by the young, in one or more stages of immature plumage.

The proportion of the known class, including 12,794 stuffed specimens, which is exhibited in the General Gallery,† occupies, in a crowded manner, cabinets 10 feet in height, arranged along about 900 feet of vertical or wall space.

Birds are most attractive to the sportsman; and the largest proportion of the zoological collections of the foreign traveller usually appertains to the feathered class. The rate of increase of the knowledge of this class may be conceived by the fact that Gould, in three years' life amongst the wilds of Australia, discovered new species the descriptions of which occupy the chief part of his great work, in nine folio volumes, on the Birds of Australia. A like amount of additions may be expected from the interior of Africa, from Madagascar, from Borneo, from New Guinea, and from the vast proportion of Australia yet unexplored by the naturalist collector.

Coupling this prevision of the requirements of space for 30 years' additions of new species with the data of our present possessions and desiderata of the Class of Birds as it is now known, and exercising the same discretion in the selection of specimens for exhibition which has governed the present display of the proportion of the examples of the class now in the Museum, I estimate that a gallery of 800 feet in length by 40 feet in width, or a superficial area of 32,000 square feet, should be assigned to the Class *Aves*.

Class Reptilia.

The number of specimens of this class, exclusive of skeletons and bones, in the Museum is about 7,000, representing about 1,600 species. The number of specimens stuffed, arranged, and exhibited to public visitors is 910. They occupy the wall-cases of a room 52 feet by 22 feet, and the wall-surface above the cases of this room and of an adjoining room, which is 20 feet by 21½ feet; but the specimens so suspended are beyond the reach of useful inspection. The number of known species of the Reptilian class is upwards of 2,000. Some of the crocodiles attain a length of from 20 to 25 feet. Some of the turtles are of large size. The different stages of the metamorphoses of the frog, toad, *Hyla*, *Pipa*, and other leading forms of *Batrachia*, should be exhibited. Those of the common frog should be illustrated by enlarged wax-models for the instruction of public visitors.

For the proper exhibition of the Class *Reptilia*, as it is now known, with due provision for future accessions, a gallery of 300 feet by 40 feet, giving an area of 12,000 feet, would be required.

Class Pisces.

The number of specimens of this class, exclusive of the osteological ones, in the Museum is about 19,000, representing about 3,000 species. The number of specimens stuffed or otherwise prepared and exhibited to public visitors is 1,913. They occupy the wall-cabinets of two rooms, equivalent to a gallery of 70 feet in length by 22 feet in width; also the wall-surface above the cabinets, where no proper examination or comparison of the specimens can be made. The great majority of this class of animals is preserved in store, in basement-vaults.

The number of known species of *Pisces* is upwards of 8,000.

The largest known fish is a British species—the basking shark (*Selache maxima*, Cuvier), which attains a length of upwards of 30 feet. Specimens have been cast ashore on the south coast of England and on the western isles of Scotland; but it is still a desideratum in the National Collection. The large tropical sharks are either not represented, or not by specimens of full size, and these cannot be properly exhibited. The Tænioid fishes (*Trachypterus*,

---

* I have not received the return of the exact number asked for, from the Keeper of this Department.

† As distinguished from the "British" Collection, in Room 24, Plan No. III.

(*Trachypterus, Gymnetrus*, &c.), specimens of which have been captured of from 12 feet to 30 feet and upwards in length, and which are among the phenomena suggesting to mariners the idea of the "great sea-serpent," ought to be exhibited of the full size. The chief stages in the growth of such species as the salmon, which stages are known by the local terms "parr," "smoult," "grilse," &c., should he exhibited.

In a gallery of 400 feet in length by 40 in width, giving an area of 16,000 feet, the principle of selection must be followed in exhibiting a connected series of the ordinal and family modifications of the Class of Fishes, as it is now known, allowing a moderate reserve of space for future novelties and acquisitions in that class.

Osteology.

A collection of Osteology is as essential to the illustration of the Vertebrated Classes as a Conchological collection is to that of the Molluscous Classes. Nor ought the size of an animal to be a bar to the attainment of adequate space for the exhibition of its skeleton in a national museum of Natural History. In the order *Cetacea* the proportions of skeletons would exceed that of the stuffed specimens, especially of those of largest bulk. The genera *Balæna, Balænoptera, Physeter, Hyperoodon* should be represented by the skeleton of the largest species in each. My estimate of the space for the Osteological Gallery is based on the conviction that such skeletons will be there exhibited. In regard to other and more populous orders of Mammalia, the articulated skeletons would be exhibited in smaller numbers than the stuffed and mounted skins. The proportion of skeletons would be much less in the Class of Birds; it would be rather more in that of Reptiles, and still more in that of Fishes.

I estimate, therefore, that for the exhibition of the Vertebrate Osteology a gallery of 800 feet in length by 40 in width, giving an area of 32,000 feet, would be required.*

Sub-Kingdom Mollusca.

After the Class of Birds, the most complete display of the preserved parts of a natural group of animals is that of the shells of the *Mollusca.* The floor of a gallery, 278 feet in length by 40 feet in width, is appropriated to this series, in which are displayed to public visitors about 100,000 specimens, belonging to about 10,000 species of Mollusca. About 45,000 specimens are stored in drawers or in the vaults.

The private collection of Mr. Cuming contains shells belonging to 16,000 species of Mollusca; and the annual increase of specimens of new species is great.

Shells, however, are but the skeletons or hard exuviæ of the Molluscous animal, in the great majority of which more or less of the soft parts protrude from the shell in the living animal, and a large proportion of the animal is exposed in the locomotive shell-bearers. Wax models are needed to give the visitors of a museum an idea of the true outward form and character of the Mollusk; and if such representations be restricted to but one species of a genus, a proportionate increase of exhibition space will be needed. Moreover, a part only of the Molluscous group can be represented by shells: the class *Tunicata;* the entire orders of *Gymnosomata, Nudibranchiata, Inferobranchiata,* and *Dibranchiata;* half of the *Tectibranchiata,* the families *Limacidæ, Oncidiadæ, Firolidæ,* &c., are all "naked Mollusks;" as are odd genera, here and there, in some of the Testaceous orders. Wax models, coloured after nature, and specimens preserved in spirits, of the above naked kinds are needed to complete a consistent exposition of the Molluscous province. A certain proportion of fossil shells, selected from the duplicates of the Palæontological series, should be added, to show how the wide gaps in the series of recent Mollusca had formerly been supplied by species now become extinct.

Under the foregoing considerations, I estimate that a gallery of 300 feet by 50, giving an area of 15,000 feet, would be required for the Molluscous series; the principle of selection governing the arranger in the same degree in which it is exemplified in the display of the proportion of shells now shown *on the floor only* of a narrower gallery of that length.

Sub-Kingdom Articulata.

Of Insects 150,000 species are known: the collective number of the species of the other Articulata classes — *Arachnida, Myriapoda, Crustacea, Cirripedia, Epizoa, Annulata, Entozoa*—is about 70,000. (I have not received the returns of the present numbers of specimens of these classes respectively.) The instances remarkable for bulk, such as the Japanese spider-crab, of 10 feet and upwards from the tip of one claw to that of the opposite, are exceptional; but smallness of size is met by multiplicity of species. The classes *Annulata* and *Entozoa*, the sub-class *Epizoa*, some *Cirripedia*, and other *Crustacea*, most *Arachnida*, and a few *Insecta*, require to be preserved in antiseptic fluid, or to be represented by enlarged wax models. The Museum arranger must be restricted by the selective principle in a much greater degree than in the foregoing classes, in giving a systematic display of those of the Articulate province in a gallery of 250 feet in length by 50 in width, giving a superficial area of 12,500 feet.

Sub-Kingdom

* In the Museum of Zoology at Leyden, 30 skeletons of *Cetacea* occupy a gallery of 200 feet in length. In 1847 the British Museum possesssed 1,765 specimens of Mammalian Osteology, appertaining to 742 species of Mammals. In 1861 it possessed 4,255 specimens, belonging to 1,300 species.

Sub-Kingdom Radiata.

The number of specimens of Corals and other Zoophytes in the Museum is about 4,000, of which 2,296 are exhibited to the public visitor on the floor of the Mammalian Saloon. The number of specimens of *Echinodermata* in the Museum is about 2,000: of these about 1,500 specimens are exhibited on the floor of the room (No. 25, Plan III.) containing the exhibited Fishes. Of about 1,000 specimens of Amorphozoa, or Sponges, 278 are exhibited. In the Radiate province of the Animal Kingdom certain *Medusæ* attain a breadth of two feet, and the Brain-stone coral may exceed a yard in diameter, and be nearly a yard in height. But the Curator of the Museum of a maritime nation must estimate the space for the Radiate animals, under the expectation of acquiring and exhibiting illustrations of the growth and structure of coral reefs, by means of adequate masses, exemplifying the law of growth and order of superposition of the different kinds of coral-forming zoophytes which build up the atolls and fringing reefs in various parts of the tropical and warmer temperate latitudes.

For the Radiate or Zoophytic province, including the Amorphozoa or Sponges, a gallery will be required of 250 feet in length by 50 feet in width, giving an area of 12,500 feet.

Physical Ethnology.

No collection of Zoology can be regarded as complete which does not contain illustrations of the physical or Natural History characters of the Archencephalous class, or Bimanous order. Such illustrations of the various human races, or families, are afforded by casts of the entire body and of characteristic parts, as of the head, face, hand, and foot; also by the bony framework, especially the skull, and by the brain preserved in spirits.

Casts of the entire body, for the aims of the ethnologist, should be coloured after life. The attention of philosophical travellers and colonists has of late been directed to this exigency in philosophical zoology; and the site selected for a National Museum of Natural History should afford for the department of Physical Ethnology a gallery of 150 feet in length by 50 feet in width, giving an area of 7,500 feet.

British Natural History.

In the present Museum there is assigned to the Zoology of the British Islands a gallery of 84 feet in length by 24½ feet, giving an area of 2,058 feet; it is well filled by the specimens which can be exhibited in a dried state. For a complete view of the British Fauna there should be space, likewise, for the numerous species that can only be exhibited preserved in antiseptic fluid, or represented by wax models. But, to meet the requirements of the cultivators of the Natural History of their own island, a British Flora should be combined with this department. Limiting, however, the grounds of the present estimate to the space needed for the known species of, and future accessions to, British Zoology, a gallery should be provided of 100 feet in length by 40 wide, giving an area of 4,000 feet.

The following has been the ratio of increase in the department of Zoology during the last five years:—

Date.	No. of Additions.
1857	48,044
1858	42,691
1859	33,307
1860	25,222
1861	16,121

DEPARTMENT OF GEOLOGY.

Section Palæontology.

Of the animals that have calcareous or fossilisable parts in their structure, the number of known extinct species greatly exceeds that of the known existing forms; and the knowledge and acquisition of such fossil species proceed at a more rapid rate. In 1860 the British Museum possessed 120,000 registered specimens of Fossils, of which as many were exhibited as could be closely packed in cases along an extent of wall of 899 feet linear, and in 34 table-cases, where room for them could be had, on the floor of the Gallery of Mineralogy. At the present date the collection consists of 153,000 specimens. The number of specimens exhibited to the public visitor is about 50,000.

Estimating the space for a National Museum upon a prospective view of future annual accessions, a larger proportion should be allotted to the galleries of Palæontology than to those of the corresponding classes of Zoology. And this is in strict accordance with the nature of things. Existing animals represent the phase of life of the present world, or of the

the modern epoch in our earth's history. Extinct animals exemplify the phases of life of a score of equivalent epochs, or of as many past or former worlds. No specimens of Natural History so much excite the interest and wonder of the public, so sensibly gratify their curiosity, are the subjects of such prolonged and deep contemplation as the reconstructed skeletons of large extinct animals. Our present space permits us to exhibit four of these—the *Megatherium*, the *Mastodon*, the *Megaceros*, and a species (not the largest) of *Dinornis*. In other European museums are other instances of such reconstructions of forms of life that have long since passed away.* A collection of all such specimens might be made at a comparatively small cost. A fossil bone, and a coloured plaster cast of it, are not distinguishable at first sight, scarcely by sight at all. The artificial junction of a series of casts of the bones of an unique fossil skeleton produces a result, as in the instance of our own *Megatherium*, as good for all the purposes of public exhibition as the articulated skeleton itself. A complete series of the casts of the *Megatherium* would be deemed the equivalent of such a series taken from the bones of a fossil skeleton of another species, now peculiar to some Continental museums. Requisite space for exhibition being provided, reciprocal interchange of casts would furnish museums with the co-adjusted frameworks of the most remarkable extinct animals that have hitherto been restored. The fossil specimens, whether exhibited or not, are arranged zoologically, according to genus, order, and class.

The term "Geology," applied to the department of Fossils, is a misnomer. The British Museum does not possess any series of rock specimens, illustrative of the structure of the crust of the earth, and of the order of super-position of its strata. There is no space provided for such Geological Collection, nor for a corresponding selection of characteristic fossils, arranged "stratigraphically." In estimating, therefore, that a gallery for the collections truly "geological," as well as "palæontological," should be not less than 850 feet by 50 feet, giving an area of 42,500 feet, it will be understood that the selective principle must be restrictively applied in the exhibition of the specimens to public visitors.

The following has been the ratio of increase in the Collection of Palæontology, during the last five years:—

Date.	No. of Additions.
1857	9,880
1858	7,300
1859	3,600
1860	10,000
1861	5,432

Mineralogy.

The pure, and for the most part, crystallized bodies, representing the elementary composition of rocks, have always attracted the eye, and excited the desire of possession, by the combined qualities of form, colour, lustre, and imperishable density, and by the conventional value attached to rarity. Minerals rank, with birds and shells, amongst the most beautiful classes of Natural Objects: they consequently rival those classes in the great proportion and connected arrangements of the specimens exhibited in the British Museum to the public visitor.

In a gallery of 270 feet by 36 feet in width, restricted by doorways and wall-cases to 247 feet of length, 20,827 specimens of minerals are arranged for the most part in table-cases; the total number of specimens in the British Museum being 50,307.

In 1857, 15,000 specimens were exhibited in the same superficial space. The subsequent additions have brought the number of exhibited specimens to nearly 30,000: the average annual addition to the Mineralogy since 1856 having been about 3,000.

A Mineralogical Collection, to be complete in its applications, should possess multiples of the same species, in sufficient numbers, and of a sufficient number of species, to be arranged in distinct series, having different aims:

1st. The *classificatory* series; including the main bulk of the Collection, exemplifying the natural arrangement of minerals according to the system adopted by the keeper of the department. The present series, arranged on the combined basis of chemical composition and geometrical forms, is the only one for which space is now allotted for exhibition.

2d. The *geometrical* series; illustrative of the varieties of crystalline forms exhibited by each mineral, including models representing these varieties in symmetrical proportions, on a scale dispensing with the need of a lens, and requiring from a student only the use of the hand-goniometer.

3d. The *elementary*, or elementarily-instructive series; illustrative of the chief characters in the determination of mineral species, such as degrees of lustre, varieties of cleavage, of colour, &c.

4th. The

* In the Berlin Museum, *e.g.*, the *Zeuglodon*, 70 feet in length; in the Hunterian Museum, the *Mylodon* and *Glyptodon*, &c. &c.

4th. The *technological* series; exemplifying the Wernerian, or other improved classification and nomenclature of colours, with their synonyms in different languages, whereby manufacturers and others might learn precisely the colour and shade signified by such terms. Minerals, of all substances, best lend themselves to this economic application, by the completeness of the series of gradations of colour, and by the determinateness and durability of such shades and gradations.

5th. The "*teratological*" series; including what have been termed "monstrous crystals;" those, viz., that assume deceptive forms by undue enlargement of particular planes, by the development of twin-structures, and other complex departures from normal type.

6th. The "*pseudo-morphic*" series; exemplifying the transitional capacities of the hardest and seemingly imperishable or least alterable substances:—silex replacing or replaced by other and very different stones; gems degraded by the substitution of matter less durable and dense than their own; the least stable minerals mimicking the most imperishable, &c. &c.

With the Gallery of Mineralogy must be associated:—

A room with a special light applicable to the goniometrical observations.
A laboratory for investigating the chemical composition of minerals.
A lavatory, with the lapidaries' tools and machinery.
A room, so arranged and furnished as to afford the public visitor the opportunity of observing the exquisitely-beautiful phenomena of polarised light as exemplified in the Mineral Kingdom, and applicable to the discrimination of minerals.

Combining the foregoing view of the uses of a Collection of Mineralogy with the known ratio of annual increase, I estimate that there should be appropriated to it a gallery of 600 feet by 40 feet, giving an area of 24,000 square feet.

DEPARTMENT OF BOTANY.

Botany being a department of Natural History, the Museum should, for its consistent completeness, include a collection illustrative of the characters and structures of the Vegetable Kingdom, as it now exists.

The department of Palæontology has always included a series of the fossil remains of extinct plants. Our knowledge of these remains may be not less limited than of the least known classes of fossil animals. The coming week may bring to us a phytolite requiring comparison with recent botanical specimens distinct from any in the small series which may be illustrative of the Fossil Botany already in the Museum.

The Botanical Department in its present state of completeness, is an indispensable instrument for a co-ordinate progress of the Fossil Botany with the other classes of the Palæontological series.

It includes the Sloanian Herbarium, the Banksian Herbarium, the additions made subsequent to the transfer of these Herbaria to the British Museum, now about three times their collective extent; a collection of manuscripts, including those of Solander; a collection of drawings, many thousands in number.

On the understanding that the public exhibition is to be restricted to illustrations of vegetable structure and wax models of fungi, &c., not otherwise capable of being displayed, a space of not less than 200 feet by 40 feet, giving an area of 8,000 square feet, should be appropriated to the Botanical Department. In this estimate is included space for the studies of the keeper and assistants, in regard to which the constant and indispensable use of the microscope requires that such studies should have a side-light, if possible looking to the north. The space for the Herbarium and exhibited specimens is calculated on the wall surface being wholly appropriated to cases, the galleries being lit from above.

LIBRARY.

With the Banksian Herbarium, the Banksian Manuscripts, drawings, and other collections of Natural History, the Banksian Library of Natural History, classified and catalogued by Dryander expressly for the use of the naturalist, was transferred to the British Museum as an integrant and essential part of the Natural History Collections so bequeathed, as an indispensable instrument, by and through which these collections were named, and are still made available to science. In equity, and agreeably with the prime intention of the donor, the Banksian Library of Natural History ought to accompany the Natural History Collections.

It would form the basis on which subsequent works on Natural History,—most of which have been purchased by the Trustees, and will remain in the British Museum,—would have to be added by fresh purchase in the New Museum of Natural History.

For the general Natural History Library so formed, I estimate that a gallery of 100 feet by 50, giving an area of 5,000 feet, should be provided.

General

General Considerations.

The Departmental Libraries would require to be on a larger scale than at present, probably double their present extent. But the space for the Departmental Library, together with that for the offices, or studies of the keeper and assistants, has been included as an element in the estimate for each class of Natural History previously given.

Those estimates have also been prepared inclusive of another general consideration, applicable alike to all the galleries open to public inspection.

In the present galleries and rooms allotted to the exhibition of the different classes and sections of classes of Natural History, the gangways and other interspaces left for the passage of public visitors are more or less inadequate. They are very inconveniently and sometimes dangerously crowded on the occasions of public holidays.

With the increase of objects exhibited, with the improvements in the mode and order of exhibition, with every additional attraction consequent on the advantages offered by adequate space in a new building, the number of visitors may be expected to increase.

Each year brings vast additions to the population of the metropolis, each new railroad tends to augment the number of its visitors. Increased facilities of transit from one part of London to another are in rapid progress, and are likely to materially affect the numbers for which easy passage room should be provided in a National Museum.

The progress of visitors is perpetually checked by objects which attract attention, as variable as are the tastes and knowledge of the visitors.

I have, therefore, taken as an element in each of my previous estimates of space, the provision of wider passages and gangways in the several departments and galleries than now prevail, consequently a different proportion of the occupied to the unoccupied space. The provision of decent and suitable conveniences for the thousands who may visit the Museum has been also foreseen in the spaces assigned to the several galleries.

Of extraneous buildings not immediately connected with the works and aims of a Natural History Museum, I have reduced my estimate to the minimum.

Official residences, with servants and especially with children, are elements of danger, when forming part of, or very contiguous to, the Museum. They should not exceed the number requisite. Two residences for officers, a dwelling for the functionary combining the qualities of policeman and fireman, one for a chief porter or housekeeper, and one for the superintendent of the warming apparatus, might require a space of 80 feet by 40, giving an area of 3,200 feet.

In this estimate I have had in view the probability of the application of part of the basement-floor to some of the smaller dwellings; as well as to the workshops of the formatori, fossil-sculptor, lapidary, carpenter.

In estimating the amount of space for the public exhibition of the National Collections of Natural History I have also been governed, besides the statistical grounds, by considerations of the peculiar functions to be performed by such collections, and of the public benefits which are looked for mainly, if not exclusively, in the galleries of a British Museum.

Were their contents destined for mere amusement—for gratifying the gaze of the passer-by—such specimens only of each class need be selected for public exhibition as are remarkable for singularity of size or form, beauty of colour, or other catching quality.

Were the collections to subserve the primary instruction of the uninformed, those specimens only need be selected for exhibition which exemplifiy the characters of the classes, orders, families, or principal genera; and a small exhibition of this elementary nature would suffice for such educational end.

The application of a National Museum of Natural History to the requirements of professed naturalists, as an instrument in the advancement of their respective science or branch of science, is consistent with modes of preservation and storage of specimens—as of dried unstuffed skins in boxes; shells, insects, minerals, smaller fossils, in cabinet drawers; involving a comparatively small amount of space for the specimens.

But there are other aims besides those of the public showman, the elementary school, and the scientist's study. The one Metropolitan Museum of Natural History of a great nation has appliances and obligations of a distinct and peculiar, if not superior, kind.

The proportion of each class of natural objects there to be seen should be such as will impart more than a mere elementary idea of the class; it should give an adequate idea of its known extent; of the changes in, or departure from, the fundamental characters of the class; it should exemplify the gradations by which one genus or order merges into another, and how the type of the class may have risen from that of a lower, and may be mounting to that of a higher class. Such a comprehensive and connected view of a class of animals, plants, or minerals, necessitates a gallery of proportionate size.

To the Metropolitan Museum of Natural History, the public, moreover, resort in quest of special information on some particular subject. The local collector of birds, shells, insects, or fossils; the intelligent wage-man, tradesman, or professional man, whose tastes may lead him to devote his modicum of leisure to the pursuit of a particular branch of Natural History, expects to find, and ought to find, the help and information sought in the galleries of a public museum. He comes to the gallery in the confidence of seeing the series of exhibited specimens so complete and so displayed, as to enable him to identify

his own specimen with some one there ticketed with its proper name and locality. Such worthy visitors are not unfrequently averse to inquire for, or intrude upon the time of, the officer in charge of the department in order to obtain the piece of information which a mere elementary or otherwise restricted display of specimens would fail to impart.

I feel strongly, by 30 years' experience of the requirements of visitors to a public museum, that this is a general and reasonable expectation of the British public, based on a well-grounded view of one of the uses of their National Collections, which would be unfulfilled, with much consequent disappointment, were the proportion of exhibited specimens to be below the scale estimated to meet that, and other above-defined aims.

In the fulfilment of such aims, however, the principle of selection might, and would still guide the arranger of the several classes in the proportionate space which I have estimated should be allotted to each.

And, in conclusion, I would remark that such space once being provided for a consistently proportional display of every class, giving a comprehensive view of the entire range of Natural History from man to the mineral, the increase of exhibition-space would not need to keep pace with the increasing number of the added species of the several classes; the stored proportion of specimens would increase with the increasing number of known species; and this, at least, is certain, that such a necessity for space as now presses would never recur.

Subjoined is a summary of the superficial amount of space which I consider requisite for the chief divisions, requiring separate galleries, of a National Museum of Natural History:—

	Length.	Breadth.	Superficial Area in Square Feet.
Mammalian Gallery - -	850	50	42,500
Avian Gallery - - -	800	40	32,000
Reptilian Gallery - - -	300	40	12,000
Piscine Gallery - - -	400	40	16,000
Osteological Gallery - -	800	40	32,000
Molluscous Gallery - -	300	50	15,000
Articulate Gallery - - -	250	50	12,500
Radiate Gallery - - -	250	50	12,500
Ethnological Gallery - -	150	50	7,500
British Natural History Gallery	100	40	4,000
Geological Gallery - - -	850	50	42,500
Mineralogical Gallery - -	600	40	24,000
Botanical Gallery - - -	200	40	8,000
Library - - - -	100	50	5,000
Residences - - - -	80	40	3,200
	TOTAL Area - - - *Ft.*		268,700

Equal to six acres and about an eighth. Add for architectural requirements, for light, access, galleries, halls, symmetry and ornament, say three acres, and the whole would call for a building of two storeis upon about five and a half acres.

I am, &c.
Richard Owen.

A. Panizzi, Esq.,
&c. &c. &c.

From the Keeper of the Zoological Department.

Dear Sir, 4 March 1862.

In reply to your letter of the 25th February, I beg to observe that the Zoological Department occupies at present nearly 45,000 (44,980) superficial feet of area, affording nearly 60,000 superficial feet of wall-space; and that I believe the addition of 10,000 superficial feet of area, to be devoted to an Osteological Room and additional studies, will afford sufficient space for "the purpose of arranging, preserving, and exhibiting, in a fitting manner, collections worthy of this country as well as of its capital, and intended not only for the special advantage of students and scientific men but, generally, for the rational amusement and instruction of all classes, now and for some time to come."

A carefully-selected, well-preserved, and well-exhibited collection, of moderate extent and capable of ready inspection, is not only sufficient to give "to all classes" of the public a complete idea of the arrangement of the Animal Kingdom, but is far more useful and effective "for their rational amusement and instruction" than a collection spread over miles of glass cases, containing multitudes of specimens which must all appear alike to their eyes; inasmuch as fifty different kinds of the rats or of the sparrow tribes, for instance, present no appreciable differences when so exhibited, and can only be determined to be distinct by students or scientific men, after removal from the cases for close inspection, examination, and measurement. Such an exhibition of the entire Animal Kingdom, containing every animal of general interest, on account of peculiarities in its habits, manners, and organization, and giving as much scientific information as it is possible to convey by an exhibition, can be well displayed within the space above specified.

On the other hand, students and scientific men greatly prefer to have the specimens for examination kept in cases occupying but small space in comparison, which admit of their being much more easily handled, compared, and measured, and where they are only exposed to the light and dust during the time necessary for their examination and arrangement. All specimens of peculiar value, as being the types of described species, ought especially to be preserved in this manner, as otherwise they are liable to gradual deterioration and destruction by exposure to light and dust; and the certainty of identification, which forms so important a part of the history of science, is entirely lost. In like manner the anatomist and palæontologist finds his labours very greatly facilitated by the Collection of Bones being kept in separate boxes, and thus admitting of the ready comparison of the same bone in different animals or in their fossil allies.

Specimens thus preserved occupy, proportionally, a very small space. Thus a collection of Birds, quite equal in extent to that exhibited in the long gallery, and occupying the entire wall-space of a room having an area of 13,500 feet, is kept in boxes in a room having an area of no more than 900 feet. The Collection of Insects, which would require an area of glass table-cases of 65,000 feet for their display, is kept in cabinets in a room with an area of 1,500 feet, in which they can be examined with incomparably greater ease and convenience than if they were displayed in table-cases; while if they were to be so displayed, the entire scientific value of the collection would be destroyed in a very few years. Even shells are greatly injured by exposure, and so much have I seen reason to regret the injury thus occasioned, that were the Cumingian Collection, for example, to be added to the Museum, I should earnestly recommend its being kept in cabinet drawers, as it is at present. In this form the collection to which I refer, which is regarded as the most complete in the world, occupies two small rooms in a common dwelling-house, while its display in table-cases would require a gallery quite as large as that in which the Birds and Shells of the Museum are at present exhibited.

My reasons for these conclusions have been given at greater length in my evidence before the Select Committee of the House of Commons (printed by order of the House) of the 10th August 1860, to which I beg to refer you for more ample details. Subsequent careful consideration of the subject, and frequent conversations relating to it with my brother naturalists, have served only to strengthen my conviction that they afford the only true and proper basis for "arranging, preserving, and exhibiting in a fitting manner a zoological collection worthy of this country as well as of its capital, and intended not only for the special advantage of students and scientific men but, generally, for the rational amusement and instruction of all classes."

I will only add one consideration with reference to the ratio of increase in the collections. They have now reached such an extent that this increase cannot be expected to preserve the same numerical ratio as before;—even with a larger grant for their extension, the annual addition of 40,000 specimens, which had been the average for several years previous to 1860, having in that year fallen to less than 26,000, and in 1861 to 17,000.

I am, &c.

John Edward Gray.

A. Panizzi, Esq.,
&c. &c. &c.

From the Keeper of the Geological Department.

Dear Sir, 4 March 1862.

In answer to your letter of the 25th February, I beg to state that I have taken the utmost pains to arrive at just conclusions with respect to the question which it contains; and I think it desirable to inform you, in the first place, of certain particulars which have influenced those conclusions.

At present the Fossil and Mineral Collections are, to a certain extent, mixed together in a gallery of 416 feet in length and 36 feet in width; and this gallery is divided into six rooms, two of which are entirely devoted to fossils, and the remaining four have the mineral table-cases arranged in two rows, occupying the central part of the room, whilst the sides of the rooms are occupied by small table-cases, or by wall-cases containing fossils. Besides the space thus furnished, a room (known as the "New Room") has rather recently been added for fossils; it is attached to the side of the gallery, and contains a very considerable portion of our Geological Collection (arranged in table and wall-cases), but has never been opened to the public, being fitted up as temporary offices for the officers of the two departments.

The total area of the rooms entirely devoted to fossils, and required by the fossil table-cases in the Mineral Rooms, I find to be 7,619 square feet.

The number of table-cases in the public rooms occupied by fossils is 34, besides which there are 7½ table-cases in the "New Room;"—the tables being 7 feet 8 inches in length and 4 feet 6 inches in width, and each table on an average holds about 1,000 specimens of arranged fossils.

The drawers under the tables hold, on an average, about 6,000 specimens; hence the total number contained in a table-case is about 7,000 fossils. These are, of course, of small size. The entire linear extent of the wall-cases is 899 feet.

The total number of fossils in the department has been carefully estimated, and even to a great extent counted, and is found to be about 153,000. Of these the number of exhibited specimens is 50,000, and the unexhibited specimens 103,000. Of the latter above 8,600 are arranged, ready for exhibition, in the New Room; and with regard to the remainder (some of which are duplicates), a large share belong to the Invertebrate Classes. These latter my colleague Mr. Woodward is well acquainted with, and he is of opinion that among them are about 20,000 specimens which it is desirable to exhibit; that is, in accordance with the plan hitherto adopted in the department, which is to exhibit every species, and often many varieties of each. As a rule the larger objects (unless they are duplicates) are all exhibited.

Of the specimens in store, belonging to the Vertebrate Classes, I conclude that about 15,000 might be exhibited.

To complete the exhibition of the fossils belonging to the Invertebrate Classes, an extra room, capable of holding 20 table-cases, would be required; such a room, in fact, as No. III. of the present gallery. The walls of this extra room (if it were lighted from above) would furnish space for 177 feet run of wall-cases, thus providing at least twice the area required to arrange the unexhibited specimens of the Vertebrate Classes.

This room is 83 feet 6 inches in length.

In a new gallery there would still be required space for the wall-cases in three of the present Mineral Rooms (I., II., and IV.), equal to 277 feet.

To provide for this and further accommodation an extra room of 100 feet in length would be desirable.

We should then possess—

	Length.	
	Ft.	*In.*
A room equal to the Room No. VI. of the present gallery - - - - - -	69	10
A second room equal to Room No. V. -	55	6
A third (extra) room, equal to Room No. III.	83	6
A fourth room, equal to the present "New Room" - - - - - - -	83	0
A fifth (extra) room - - - - - -	100	0
Total Length - - -	391	10

The present gallery is 36 feet in width, and would certainly be improved by an increase in the breadth of the central and side gangways; and it appears to me that an additional six feet is not only desirable for this purpose, but would likewise furnish the means hereafter

after of altering the arrangement of the cases in certain rooms, by which a very great increase of the exhibiting-space would be acquired.

Furthermore, if we allow about 8 feet for partition-walls between the rooms, and take the entire length of the gallery at 400 feet, and its width at 42 feet, the whole area in superficial feet would be 16,800. In this estimate allowance has been made for doorways between the rooms of 5 feet 10 inches in width, and for four other doorways leading out of the gallery. Such a gallery, I am convinced, would not only amply hold our present collection, but likewise furnish space for a considerable period (probably about 15 years); after which time, if the acquisitions increase in something near the same ratio as they have hitherto done (which I think very improbable), the length of the gallery would require to be enlarged at the rate of about 8 feet per year; that is, if the system of exhibiting everything be adopted (even to small and obscure objects, which cannot be distinguished when seen through the glass), which I think extremely undesirable.

If this principle be carried out, collections of Natural History may become so extended that visitors would scarcely be able to walk through the galleries.

There are many other reasons (exclusive of expense) which readily suggest themselves, upon reflection, why these collections should be kept in reasonable bounds. I hold the opinion, most strongly, that such a gallery as I have indicated should be regarded as permanent, and that the principle of selection in the objects exhibited should be adopted.

It only remains for me to call attention to a very important adjunct to this gallery—the offices and rooms for students—which I think might be provided by an area of about 2,000 square feet.

A. Panizzi, Esq.
&c. &c. &c.

I am, &c.
Geo. R. Waterhouse.

From the Keeper of the Mineral Department.

Dear Sir, 4 March 1862.

I BEG to acknowledge your letter of the 25th of February. I will divide my reply to it into four parts. In the first I will state what space would, in my opinion, be required for the exhibition of the Mineral Collection, on the most complete and imperial scale, for the present, and for the immediate future.

I will in the second place give an estimate of what further space would be likely to be required, on that extended scale of exhibition, between this date and the year 1900.

I will then qualify these estimates by a statement of my own views on them; and I will finally state what rooms I consider to be necessary for the purposes of the staff of the department.

I. The four rooms devoted to the Mineral Collection, in the North Gallery, present a united length of 263 feet, exclusive of doorways, of which three occur in walls intersecting the gallery from north to south. This space is reduced, by the vertical cases attached to those walls, to a total length of floor of 247 feet.

On the floor of this gallery, besides six half table-cases and a few isolated tables in various positions, 60 table-cases stand in two lines, interrupted in their continuity by the cross-walls alluded to. The cases have each a width of 4 feet 6½ inches, which leaves an average of 3 feet ½ inch for passage between them. This is reduced, by the need of wider gangways at intervals, to about 2 feet 10 inches or 2 feet 11 inches average passage.

A gallery uninterrupted in its length by cross-walls, and admitting an average gangway of 3 feet 6 inches, and four gangways of 5 feet between the cases, would require to be 255 feet in length to hold our existing table-cases.

I am of opinion that the exhibition of such specimens at present in drawers as (on a most liberal scale of exhibition) it would be at all desirable to place in the cases, coupled with the distribution over a rather less crowded space of some of the minerals now arranged in the table-cases, would demand four new cases, and that a further addition of 12 table-cases would meet all our requirements up to the year 1870. These 16 cases would, on the scale proposed, require an addition to the length of the gallery of 64 feet.

I would further record my opinion that the present galleries are too narrow. It is most desirable that, besides wall-cases and the two rows of table-cases, there should be a series of pyramidal or otherwise conveniently-formed cases, placed along the centre of the room, for the exhibition of specimens especially remarkable for size or beauty, or in which might be arranged particular collections that may require especial advantages of light and position in respect to the eye. Among the latter I might specify a series of small and perfect crystals, artificial as well as natural, or specimens selected to form a Technological Collection, &c. For this purpose our present central avenue of 6 feet 9 inches is not sufficient; and I should wish to see another six feet added, in a new gallery, to the present width of 36 feet, making a width of 42 feet.

The gallery, then, that I conceive would be requisite for the largest and most complete exhibition of the Mineral Collection, with the development it may be expected to have taken by the year 1870, would have the proportion of 320 feet length and 42 width, and, besides supplementary cases, would contain 76 table-cases.

II. Calculating on an increase in the same ratio—which, in fact, involves an advance of about 6 feet 3 inches per annum—the year 1900 would witness the Mineral Collection consisting of 121 cases, and having a length of about 510 feet.

This estimate is formed on the supposition that our increase continues to be as rapid as it has been of late years. It also involves the assumption on my part of a very high proportion of exhibited specimens as compared with those reserved in drawers.

III. I have put out these numbers in order to furnish data, founded on my experience, from which calculations may be made of the amount of space which the Mineral Collection may hereafter require, supposing the number of reserved drawers supplementary to the exhibited collection to be reduced to a minimum. My own view, however, is in favour rather of the increase than of the diminution of the proportion of these reserve drawers. It is very much a question of administration which view is the correct one. I believe myself that the average addition of one table-case per annum would contain all that ought to be exhibited, if the table-cases be devoted only to those minerals which, by their beauty, their crystalline form, their variety of colour, or chemical composition, or which within a certain limit, by their representation of various localities, illustrate in the most remarkable way the species to which they belong.

The less valuable specimens, and those that are retained (as so many are) solely as representing the product of some particular locality, or the association, in some manner interesting or instructive, of any particular mineral with other minerals, would in the majority of instances be retained in glazed drawers, so secured that they might be examined by any one with authority to do so, even without withdrawing the glass. This I believe to be the way to make a national mineral collection meet the requirements specified in your letter; in fact, to make it exhibit all its fine and most instructive specimens, without their being too much diluted, so to say, by those inferior in beauty and interest; and the limits I would propose for the space to be devoted to such an exhibition of the collection would be much smaller than those above given. I believe that a gallery of 425 feet in length by a breadth of 42 feet would in this way suffice for, and would admirably exhibit, the finest collection of minerals that the world will contain in the year 1900.

I have said nothing about the devotion of the wall-space to subsidiary and illustrative collections. It would suffice for, and, if the light be properly introduced, would permit the exhibition in the best manner of collections of rock specimens, of pseudo-morphus minerals, of crystallographic models, and various series illustrating the terminology and technology of Mineralogy.

IV. It only remains for me to state what rooms and conveniences will be requisite for carrying on the business of the department. These consist of—

A commodious sitting-room for the keeper, with book-cases and wall cases around it.

Two rooms for assistants.

A room for holding the balance, and adapted for goniometrical observations. It is important that this room should have a south window, the bottom of which should not be higher from the ground than the level of an ordinary table; and the room should be of such dimensions as to enable the instrument to be placed at 20 feet distance at least from the window.

A workroom, containing a lavatory. In this room apparatus for cutting, slitting, polishing, &c. could be placed.

A laboratory, provided with a chimney having a good draught, with gas and water, and (if steam be employed to heat the building) with steam laid on to it.

A carpenter's shop ought also to be attached to the department.

I do not specify the proportions desirable for these several rooms, but I consider it important that they should not be too small.

The laboratory, the goniometrical room, and the keeper's room should neither of them be less in area than a room of from 20 to 25 feet by 18 feet.

The areas corresponding to the dimensions suggested in the several clauses of this letter would be as follows:—

1. (i.) The space required to hold the present collection, with convenient interspaces between the cases, and with 16 additional feet for four new table-cases, would be afforded by a gallery of 271 feet long by 42 wide, the area of which would amount to 11,382 feet.

(ii.) Space needed until 1870, on a very liberal estimate of the proportion of the collection to be exhibited:—A gallery (including the last-mentioned) of 320 feet by 42 feet; area, 13,440 feet.

2. Space likely to be needed until the year 1900, on the same estimate of the proportion of exhibited specimens:—A gallery (including the former) of 510 feet by 42; area, 21,420 feet.

3. Estimate of the total space wanted until the year 1900, on the supposition of a proportion of minerals, much larger than the previous estimate, being retained in reserve drawers:—A gallery of 425 by 40 feet; area, 17,850 feet.

4. The

4. The area requisite for rooms and passages to be attached to the department may be roughly estimated at about 60 feet by 42, if all were on one floor, amounting to a space of 2,520 square feet.

I am, &c.

A. Panizzi, Esq., D. C. L.,
&c. &c. &c.

Nevil Story Maskelyne.

From the Keeper of the Botanical Department.

Dear Sir, 3 March 1862.

I BEG to acknowledge the receipt of your letter of the 25th February, requiring me to "state the superficial amount of space which I would consider requisite for my department, for the purpose of arranging, preserving, and exhibiting, in a fitting manner, collections worthy of this country as well as of its capital, and intended not only for the special advantage of students and scientific men but, generally, for the rational amusement and instruction of all classes, now and for some time to come."

In reply, I have to state that the two rooms at present occupied by the General Herbarium and other arranged materials contain about 3,000 square feet of floor-space, surrounded by about 300 feet in length of walls; and, the light being obtained from above, nearly the whole of the wall-space is capable of being appropriated to cases. Were the whole of this space devoted to Herbarium cases only, there is room for the addition of two-thirds to our present number; and, consequently, the same amount and quality of space would suffice for any probable extension of our collections, with a view to maintaining them, in the words of the Minute, in a state "worthy of this country as well as of its capital," for many years to come. One of these rooms is provided with a gallery, containing cases for the reception of specimens not laid in to the General Herbarium, but which it is most desirable to have at hand for arrangement and reference; and if both were so furnished, sufficient space would be given for these collections, in the most convenient and accessible form.

The present Exhibition Rooms contain nearly 2,000 superficial feet of floor-space, surrounded by rather more than 200 feet in length of walls, also lighted from above; and I do not think that any larger space is needed for an exhibition of Structural Botany, the uses and applications of plants being more appropriately shown in the Economical Museums of Kensington and Kew.

About 500 square feet of floor-space, immediately adjoining the Herbarium, and lighted as at present by side-windows, are required for officers' studies; and a thoroughly dry and well-lighted storeroom, somewhat larger than the present, containing about 1,000 superficial feet of floor-space, and 100 feet in length of walls, would suffice for the preservation of specimens of less importance, or such as could not well be placed in the Herbarium or Exhibition Rooms.

The required amount of floor-space, subject to the conditions of lighting indicated above, may be summed up as follows:—

	Square Feet.
1. For Herbarium, and materials immediately connected with it	3,000
2. For Exhibition	2,000
3. For Officers' Studies	500
4. For Stores	1,000
	6,500

A. Panizzi, Esq.
&c. &c. &c.

I beg, &c.
John J. Bennett.

From the Keeper of the Department of Oriental and Mediæval Antiquities.

Dear Sir, 3 March 1862.

IN reply to your letter of the 25th February, ordering me to furnish for the Trustees an account of the superficial amount of space required for the proper exhibition of the present Ethnographical Collections of the British Museum, and for the probable increase for some time, to lay before Her Majesty's Government, allow me to report the following details of the space occupied by this branch of the department.

The room assigned for the display of the Ethnographical Collections measures 94 feet long by 23 feet wide and 20 feet high, and the superficial extent of wall-cases contained in it amounts to 1,794 square feet of frontage, with a depth of 1 foot 6 inches. In addition to this there are five cases placed in the middle of the room, estimated to afford

506 square feet of frontage, besides 270 square feet occupied by the Javanese Collection, temporarily placed in the British Room; while other objects, not at present exhibited for want of space, are estimated to require 90 square feet, all which must have cases of a similar depth of 1 foot 6 inches at least. The actual requirements, therefore, for even provisionally exhibiting the collections, must be calculated as 2,660 square feet, with cases having a depth of 1 foot 6 inches. But to display the collections to advantage, so that each object may be properly seen (for many of them at present are literally piled upon one another and not even visible to the eye, owing to the want of room), a space double that which they at present occupy, or about 5,500 superficial square feet would be required in a room or rooms not less in size than two of the dimensions of the present Ethnographical Room. Such room or rooms would not do more than provide for the proper exhibition, due preservation, and necessary incorporation of the whole present collections; several of those objects which are at present placed on the top of the cases could then be better exhibited, and brought nearer the eye of the spectator.

In addition to the smaller objects which it is proposed to remove, there is a considerable collection of Hindu, Persian, and Mexican sculptures and incriptions, and other heavy objects in wood and stone, at present provisionally placed in rooms of the basement, which have to be provided for in future arrangements. The actual number of superficial square feet occupied by these objects is 240; but they would require double, if not treble, that amount of space for arrangement and exhibition. These objects, however, although connected with the Ethnographical Collections, belong rather to the classes of Antiquities, of which part of the Ethnographical Collections are composed, and the space has therefore been mentioned separately.

With respect to the accommodation which it might be desirable to prepare for the future enlargement of the Ethnographical Collections, it is not possible to do more than form a general idea on the subject. Those of the Museum consist principally of objects presented to the Institution, and specimens which were not of the nature of antiquities have been rarely purchased. Although, therefore, they form an excellent nucleus for future development, they can by no means be considered as representing the Ethnographical Collections of a nation whose commerce and empire are so extensive, and which possesses such great facilities for collecting specimens of this class. An Ethnographical Collection which would embrace the principal objects in use amongst the oriental, semi-civilised, and barbarous races of mankind, would require at least a series of rooms not less extensive than those of the upper floor of the west wing of the Museum, or a gallery of 400 feet long by 45 feet wide. It is a collection, too, which might be rapidly formed, which might be augmented by extensive additions at once, and would constantly increase as well as attract much public interest and attention.

Believe me, &c.

A. Panizzi, Esq.,
&c. &c. &c.

S. Birch.

---

7 March 1862.

[The Principal Librarian deems it his duty to lay before the Committee the following documents, and to have them privately printed, together with the foregoing]:—

My dear Sir,

British Museum, 6 March 1862.

I WROTE to Dr. Gray on the 24th of February, requesting a Return of the number of specimens, with the number exhibited to the public, of each of the following classes in the Department of Zoology:—

1. Mammalia.
2. Aves.
3. Reptilia.
4. Pisces.
5. Mollusca.
6. Insecta, including Arachnida.
7. Crustacea, with Myriapoda and Cirripedia.
8. Annulata, with Entozoa.
9. Echinodermata.
10. Zoophyta, with Spongiæ.

In reply, I have received the inclosed of the 4th March from Dr. Gray, with an approximate estimate of the number of specimens in the Zoological Department generally, and a mis-statement of the return I asked for.

As this Return is of much importance at the present time, I am compelled to request the intervention of authority to obtain it from the Keeper of the Department of Zoology.

Believe me, &c.

A. Panizzi, D.C.L.,
&c. &c. &c.

Richard Owen.

Dear Professor Owen, Zoological Department, 4 March 1862.

In reply to your letter of the 24th February, requesting a Return of the number of specimens in the Zoological Department, together with the superficial area occupied by the different classes, I send you the following particulars. I cannot vouch for their perfect accuracy, but they are as correct an estimate as I can form in the limited time allowed for collecting the materials:—

1. The number of specimens of all classes exhibited in the public rooms is about	140,000
2. The number of specimens, arranged in glass cases, in drawers, or in boxes, for the use of students, is about	489,000
3. The whole number of specimens is about	629,000

The specimens not exhibited in the public rooms are much more easily accessible to students in their present condition; and I should earnestly deprecate their public exhibition, even if there were ample space for the purpose.

A large portion of them constitute the general collection of Insects and Crustacea, which would require for their exhibition in table-cases an area of 65,000 superficial feet; that is to say, a space equal to five galleries of the size of that now occupied by the Birds and Shells, and would, if so exhibited, be utterly destroyed in the course of a very few years. The same may be said of the collection of Animals in Spirits. A large portion also consists of local collections, such as the Shells of Mazetland, of Cuba, of the West Indies, and of M. D'Orbigny's Voyage, the Insects of Madeira, &c., &c., which are types of the species described in certain works, and neither intended or adapted for exhibition in the public rooms.

The superficial area which the Zoological Collections in the Museum at present occupy amounts to 45,000 square feet, divided as follows among the several classes:—

	Square feet.
Mammalia, about	11,505
Birds	14,550
Reptiles	2,330
Fish	3,100
Osteology	2,900
Insects, Crustacea, and Arachnidæ, &c.	3,100
Shells: Mollusca	14,200
Radiata	5,480
Sponges	500
British Zoology	2,550
Studies and Laboratories	2,235
	62,450

The excess of the sum of these numbers over the entire amount of superficial area, arises from the fact, that in the public exhibition rooms, in which the wall-cases and table-cases are occupied by different classes, the space has necessarily been twice counted; but as this double occupation is evidently necessary, otherwise either the walls or the floors would be left vacant, and the space consequently thrown away, the actual amount of space is given in the smaller number.

John Edward Gray.

Natural History Department.

My Dear Sir, 7 March 1862.

As you have informed me that my Report is ordered to be printed, I should wish this reply to my request for a Return of the number of specimens in each of the principal Classes of Animals, specifying the number of specimens exhibited to the public visitors, in each class, to be appended to it.

Believe me, &c.

A. Panizzi, D.C.L., (signed) *Richard Owen.*
Principal Librarian.

Extract from the Minutes of the Trustees.

At an Adjourned Meeting of the Committee appointed for carrying on communications with the Treasury relative to their Lordships' Minute of 13 November 1861, and the Report thereon, 18 March 1862.

Read the Minutes of the last meeting of this Committee.

The Committee had before them the Treasury Minute of 13th November 1861, the Report of the Special Committee thereon, and the two Treasury Letters, dated respectively the 21st and 22d February, received on the 22d, and referred to this Committee by the Standing Committee on the same day.

The Committee took into consideration the statements respecting the amount of space required, which were before them at their meeting on the 6th instant, and which had since been privately printed and sent to each member of the Committee, as directed at that meeting.

After conferring with Professor Owen, Dr. Gray, Mr. Waterhouse, and Mr. Maskelyne, it was resolved, that a letter, as follows, be written to the Treasury.

(*See* letter dated 20th March 1862, from A. Panizzi to G. A. Hamilton, Esq., in the foregoing Correspondence, Part I. of this Return, page 2.)

Extract from the Minutes of the Trustees.

At a Standing Committee, 12 April 1862.

The principal librarian laid before the Board a letter from the Treasury, dated the 10th instant, transmitting a copy of a letter and its enclosures from the secretary to the Commissioners of the Exhibition of 1851, together with copy of a letter directed by their Lordships to be returned thereto, on the subject of the proposed acquisition of a site at South Kensington, for the natural history collections in the British Museum.

Ordered, that these papers be referred to the Special Committee appointed for carrying on communications with the Treasury on this subject.

(*See* the foregoing Correspondence, Part I. of this Return—The Secretary to the Treasury to the Trustees of the British Museum, with enclosures, p. 7.)

The Superintendent of the Natural History Departments to the Principal Librarian.

Dear Sir, 19 April 1862.

Observing in the communication from the Treasury, which you gave me the opportunity of perusing, a reference to a building of three stories as being, possibly, applicable to the purposes of a Museum of Natural History, I send a memorandum on the subject of such a building, which, although it embodies remarks previously made before the Committee of the House of Commons and the Special Committee of Trustees relative to the Treasury Minute of the 13th November 1861, may deserve consideration before the final determination as to the extent of ground-space to be purchased for the site of the proposed Museum of Natural History.

Believe me, &c.

A. Panizzi, Esq. (signed) *Richard Owen.*

Report from the Superintendent of the Natural History Departments.

19 April 1862.

Collections of natural history arranged and prepared for public exhibition are best seen and examined in galleries lit from above.

Few of the series can be properly studied and compared in rooms lit by side windows.

The

The series of specimens which would be located with least disadvantage in galleries with side-windows are those of geology, of osteology, of the class mammalia, and of physical ethnology.

The remaining series of the Natural History, especially the mineralogy, the birds, the shells, the corals, and other zoophytes; the insects, crustacea, arachnida, annulata, and other vermes; the fishes and reptiles; all the smaller specimens preserved in spirits, with the Botany, should be seen in galleries lit by skylights, at the angle between the wall and roof, as in the Museum of the College of Surgeons.

A room lit by side-windows has this disadvantage, that it affords the smallest extent of that surface, viz., vertical or wall-space, which is most essential for systematically arranged and exhibited specimens. Not only is so much of the wall which is perforated by the windows, but the spaces between these inlets of the light are unavailable for exhibition purposes. Consequently, the side of the gallery with the windows is virtually lost.

In a museum building of three stories, a large proportion of the arranged series would be seen under circumstances detracting from their utility to science and their attractive display for the public.

The proportion of the Natural History relegated to the upper story would include as much of the most attractive series as could there be arranged under a mode of lighting showing them to the best advantage to the general visitor, and most favourably to the scientific student. But this part of the museum would be the most difficult of access; and many who had traversed the galleries of a ground floor and of a first floor would probably be deterred by the toil of another staircase from mounting to those galleries where only the specimens could be properly or best displayed, including the choicest and most beautiful parts of the Natural History series. Finally, in reference to the economy of watching, the greater the proportion of galleries in one vista and on one floor, the more easily are they overlooked; according to the number of stories and staircases, the number of attendants must be increased for effective supervision of visitors.

(signed) *Richard Owen.*

Extract from the Minutes of the Trustees.

At a meeting of the Committee appointed for carrying on communications with the Treasury relative to their Lordships' Minute of 13th November 1861, and the Report thereon, 29th April 1862.

The Minutes of the last meeting of this Committee were read.

Read a letter from the Treasury, dated the 24th March,* also one dated the 10th April,* with a copy of Mr. Bowring's letter to the Treasury, dated 2d April, and a copy of the Treasury answer to that letter, dated 10th April.

* *See* the foregoing correspondence.

Read Professor Owen's letter, dated the 19th April, and his report of the same date on the relative merits of a building of two stories and one of three stories for the public exhibition of Collections of Natural History.

The printed Returns† to the House of Commons, of the correspondence between the Treasury and the British Museum, on the subject of providing additional accommodation for the several collections, was before the Board.

† No. 97, 1862.

The Principal Librarian was directed to write to the Treasury as follows:—

(*See* the foregoing Correspondence, Part I. of this Return.—Mr. Panizzi to the Secretary to the Treasury, 3d May 1862.)

Extract from the Minutes of the Trustees.

At a General Meeting, 10 May 1862.

The Minutes of the Meeting of the Special Committee, held on the 29th April last, were read, and the letter to the Treasury therein was approved.

Extract from the Minutes of the Trustees.

At a Meeting of the Committee appointed for carrying on communications with the Treasury relative to their Lordships' Minutes of 13th November 1861, and the Report thereon, held in the Library of the House of Commons on 12th May 1862,

The Committee had before them a Bill brought in by Lord Palmerston and the Chancellor of the Exchequer to enable the Trustees to remove portions of the collections from the British Museum.

The Counsel of her Majesty's Government having been requested to attend, the Trustees conferred with him, and suggested a few alterations in the Bill, which he was desired to communicate to the Chancellor of the Exchequer.

Report from the Superintendent of the Natural History Department.

10 July 1862.

Professor Owen begs to report the subject of accommodation for the officers of the Natural History Departments, especially for those of Geology and Mineralogy and for the Superintendent, as pressing for re-consideration.

Since the subject received the full attention given to it by the Trustees, which led to the adoption of the plan resolved, December 12th 1857, to be carried out with the least possible delay, the circumstances calling for that resolution, through the great and inevitable annual increase of specimens, and of the work connected with them, have become still more urgent.

The plan adopted by the Trustees in 1857 continues, in the opinion of the Superintendent, to be the best adapted to meet the exigencies of the case.

(signed) *Richard Owen.*

Report from the Principal Librarian.

11 July 1862.

In submitting Professor Owen's Report of the 10th instant, Mr. Panizzi begs to call the attention of the Trustees to the following summary of their proceedings respecting the addition of space required for the Museum generally.

Parl. Paper, 379, 1858, p. 49.

Commencing with the 12th December 1857, the date of the Minute referred to by Professor Owen in his report, it was on that day that the Standing Committee resolved that accommodation be provided for the officers of the Natural History Departments on the roof of the Print-room; that this resolution be carried out with the least possible delay, and that a sum of 1,900 *l.* be inserted in the estimates for the purpose.

At a Special Meeting of the Standing Committee, 22d January 1858, it was resolved:—

Ib., 379, 1858, p. 55.

1. That there was no vacant space belonging to the Trustees sufficient to provide for the deficiency of exhibition rooms.

2. That in providing adequate space, it was very desirable to contemplate future and progressive, as well as actual and immediate requirements.

3. That the best mode of so providing appeared to be the purchase of land north of the Museum, as recommended by Mr. Smirke.

Ib., p. 56.

Application having been made to the Treasury to sanction the immediate erection of the studies over the Print-room, determined on by the Standing Committee at their meeting of the 12th of December 1857, their Lordships replied that it appeared to them undesirable to incur expense for the partial accommodation of one of the departments of the Museum until the general question of providing additional space had been considered by Her Majesty's Government.

Ib., p. 59.

At the suggestion of their Lordships, therefore, the Standing Committee, on the 1st of May 1858, ordered, that the erection of these studies be postponed, and at their next meeting (May 8th) they declined to sanction a further application to the Treasury on the subject.

Ib., p. 60.

Ib., p. 60.

On

On the 14th June 1858, the Trustees addressed the Treasury on the urgency of the demands for increased accommodation, and requested information of the views of Government regarding the general question before adverted to. Parl. Paper, 379, 1858, p. 64, 65.

On the 15th February 1859, the attention of the Lords of the Treasury was again called to the question of increased accommodation, and again on the 14th of November of the same year. Ib., 126, 1859, p. 25. Ib., 87, 1860, p. 6.

In consequence, the First Lord of the Admiralty, the Secretary of State for the Home Department, and the Chancellor of the Exchequer, directed that a Special General Meeting of the Trustees be called to consider the subject.

A Special General Meeting was accordingly held on the 26th November 1859, when a Committee was appointed to consider the expense of purchasing land, and building thereon, either in Bloomsbury or at Kensington. Ib., p. 7.

On the 7th December the Lords of the Treasury intimated that they were awaiting further communication from the Trustees on the subject. Ib., p. 8.

On the 7th January 1860, the Special Committee agreed on their report as to the expense of purchasing ground and building thereon, either in Bloomsbury or at Kensington, showing a large saving in favour of the latter site. Ib., p. 11.

This report was considered at a Special General Meeting on the 21st of the same month, when a resolution was passed, That it was expedient that the Natural History Collections be removed from the British Museum, inasmuch as such an arrangement would be considerably less expensive than providing sufficient space for them in immediate contiguity with the present building. Ib., p. 20.

In May 1860 a Select Committee of the House of Commons was appointed to inquire how far and in what way it might be desirable to provide increased space for the extension and arrangement of the collections of the British Museum, &c.

That Committee recommended the purchase of the whole of the ground immediately surrounding the Museum to meet the requirements of the several Departments of Natural History, of Prints and Drawings, and of Antiquities, making it a primary object to isolate the Natural History Collections as far as possible from all others in the same locality. Report, p. xi. Ib., p. xii.

Further communications relative to the want of space were addressed by the Trustees to the Treasury on the 29th October 1860, and on the 28th May and 12th November 1861. On the 23d of the last-named month, the Treasury Minute, dated the 13th, was forwarded to the Trustees, in which their Lordships stated their views on the two questions: 1st, Whether the collections were to remain united? 2d, If they were to be severed, which of them should be removed from the Museum? The Lords Commissioners of Her Majesty's Treasury expressed their opinion that the Executive Government alone ought to bear all the responsibility of whatever proposal might be made to Parliament. Parl. Paper, 97, 1862, p. 2, 3. Ib., pp. 3 sqq.

Their Lordships came to the conclusion that some of the collections ought to be removed, and that the Government would be prepared at the proper time to make proposals to the Commissioners of the Exhibition of 1851 for the provision of adequate space at Kensington to receive at first the Mineralogical and Palæontological Collections, and, ultimately, if thought desirable, all those of the Natural History Departments. Their Lordships then invited the Trustees to prosecute the further examination of the question.

The Treasury Minute was accordingly considered at a Special General Meeting on the 3d December 1861, when a numerous body of the Trustees attended, including the three Principal Trustees, seven Members of the Government, seven other Official Trustees, the Royal Trustees, three Family Trustees, and eight elected Trustees. Ib., p. 8.

Resolutions were then passed approving generally the proposals contained in the Treasury Minute, and appointing a Special Committee to consider the best mode of carrying them out. This Committee consisted of a Principal Trustee, a Member of the Government, a Family Trustee, and two elected Trustees, who, on the 21st of January 1862, agreed upon a report recommending the removal of the whole of the Natural History as well as Ethonography; also that the space so vacated be allotted among the several departments remaining; that various alterations and additions be made to the present buildings, and that further separate buildings be erected on the ground already belonging to the Trustees. Ib., pp. 9 sqq.

This report was read before a Special General Meeting on the 10th February, when 24 Trustees were present, and when it was unanimously resolved that the recommendations of the report be adopted, and that a Committee be appointed to carry

carry on communications with the Treasury relative to the extension of the plan adverted to in their Lordships' Minute of 13th November, and in the above-mentioned report of the Special Committee.

The Committee so appointed consists of a Principal Trustee, a Member of the Government, a Family Trustee, and four elected Trustees.

Parl. Paper, 97, 1862, p. 23.

On the 22d February last, the Lords of the Treasury expressed their willingness to co-operate with this Special Committee both generally and for the purpose of arranging the details of any enactment that might be required. Several communications have accordingly passed between the Treasury and the Special Committee.

The result of the Bill submitted to the House of Commons in accordance with the above proceedings is known, but the various resolutions thus solemnly adopted by the Trustees still remain in force.

(signed) *A. Panizzi.*

Extract from the Principal Librarian's Précis, 11 July 1862.

Read at the General Meeting, 12 July 1862.

The House of Commons, on the 19th May, put off for three months the second reading of a Bill, brought in by Mr. Chancellor of the Exchequer and Viscount Palmerston, to enable the Trustees of the British Museum to remove portions of their collections.

Extract from the Minutes of the Trustees.

At a Standing Committee, 12 July 1862.

Read a report, dated 10th July, from Professor Owen, urging the reconsideration of the subject of accommodation required for the officers of the Natural History Departments, and referring to the Minute of the 12th December 1857 thereon.

Read also a report from the Principal Librarian, submitting a summary of the proceedings of the Trustees since 12th December 1857, respecting the addition of space required for the Museum generally :—

Resolved—Having weighed the facts contained in the report of the Principal Librarian of the 11th instant, the Standing Committee feel precluded from entertaining Professor Owen's recommendation, but refer the two reports now read to the consideration of the General Meeting to be held this day.

Extract from the Minutes of the Trustees.

At a General Meeting, 12 July 1862.

Read the report of the Principal Librarian, and that of Professor Owen, referred to the consideration of the General Meeting by the Standing Committee this day.

Resolved—That the Principal Librarian write the following letter to the Secretary of the Treasury.

(*See* letter, dated 12th July 1862, from the Principal Librarian to the Secretary to the Treasury, in the foregoing correspondence, Part I. of this Return, page 9.)

Extract from the Minutes of the Trustees.

At a Standing Committee, 26 July 1862.

Read a letter from the Treasury, dated 21st July,* in reply to the communications made to their Lordships by direction of the last General Meeting, on the subject of the increased accommodation required for the collections of the British Museum.

---

* *See* the foregoing Correspondence, Part I. of this Return.—The Secretary to the Treasury to the Trustees of the British Museum.

Report from the Keeper of the Department of Mineralogy.

8 October 1862.

Mr. Maskelyne having found the Gorackpur meteorite to contain new minerals of a very interesting character, is extremely anxious to perform a simple analysis of them.

He believes that the old erection on the roof, formerly employed as a photographic room, would answer the purpose completely for so simple an operation; one which in fact will need no other heat than that which a common spirit lamp might supply.

He begs respectfully of the Trustees that they will accord him permission to use the room in question for the purpose, as no danger can possibly accrue from its employment.

(signed) *N. Story-Maskelyne.*

Extract from the Minutes of the Trustees.

At a Standing Committee, 11 October 1862.

Read a report from Mr. Maskelyne requesting permission to make use of the photographic room for the analysis of new minerals found in the Goruckpore meteorite.

The Trustees, having conferred with Professor Owen,—

Ordered—That Mr. Maskelyne's report be referred to Professor Owen, with a request that he will inform the Trustees whether there is any room in the parts of the basement occupied by the Natural History Departments, which, in his opinion, could be safely appropriated to the uses mentioned by Mr. Maskelyne.

The Keeper of the Department of Printed Books to the Principal Librarian.

Dear Sir, 7 November 1862.

I had an interview yesterday with Professor Owen and Professor Maskelyne respecting the room in the basement, which the latter gentleman wishes to have fitted up as a laboratory for the chemical analysis of minerals. It is that which was formerly used as a ladies' cloak room, situated in the north-east angle of the building.

There appear to me to be two objections to the use of this room for the purpose proposed.

One is its close proximity to the Library, being directly under one of the old reading rooms, in which books are now catalogued, and in which also books offered for sale are examined. Moreover, the approach to it from the Mineral Gallery is by a staircase leading past the galleries and most exposed parts of the Library.

The other objection is the annoyance and danger which may result from the gases thrown off from the minerals in the course of analysis. If minerals be kept in the laboratory, which I presume would be the case, as Professor Maskelyne informs me that it would be fitted up with shelves, the consequences of any accidental fire would be very serious. Professor Owen, in a report dated 21 April 1858, alluding to the possibility of such an accident resulting from the use of the blow pipe in the Mineral Gallery, says, "The deadly gases eliminated by heat from many of the minerals would paralyze any efforts on the spot to quell the fire, with probably fatal consequences to those who might persist in such attempts."

Feeling these objections so strongly as I do, I must decline taking upon myself the responsibility of consenting to the appropriation of the room in question to the purposes of a laboratory.

(signed) *J. Winter Jones.*

A. Panizzi, Esq., &c.

Report from the Superintendent of the Natural History Departments.

7 November 1862.

Professor Owen has examined the parts of the basement story occupied by the Natural History Departments in regard to their safe applicability to the analytic processes required in the investigation and determination of minerals.

He regrets to say that there is no part, room, or compartment, which combines, with safety, the conditions as to light and ventilation which Professor Maskelyne deems essential to the required laboratory. And he ventures to suggest that such workroom might best be constructed, in reference to the conditions of the present location of the mineralogy, as a detached building in the ground within the precincts of the Museum property.

(signed) *Richard Owen.*

Extract from the Minutes of the Trustees.

At a Standing Committee, 8 November 1862.

Professor Owen reported, with reference to Mr. Maskelyne's request, and the minute of the last meeting thereon, that no part of the basement of the Departments of Natural History could be applied for the purposes of a laboratory, and he suggested the erection of a detached building, for chemical analysis, within the precincts of the Museum.

A letter, dated 7th instant, was read from Mr. Jones on this subject.

Resolved—"The Trustees, reserving their opinion as to the general question upon the point of space, request that Mr. Smirke report to them upon Professor Owen's suggestion."

The Architect to the Principal Librarian.

Dear Sir, 29 November 1862.

In compliance with the desire of the Trustees that I should report upon Professor Owen's suggestions in respect to a laboratory, I beg to state that I have conferred with Professors Owen and Maskelyne on the subject, and I have received from the latter gentleman a very detailed description of the nature of the building required and its fittings.

Two suggestions have been made to me, viz.:

1. To build a detached laboratory, within the precincts of the Museum, at the north-west corner.

2. To convert to the use of the Museum a building in the immediate neighbourhood of the Museum, which it appears was built and fitted up especially as a chemical laboratory.

With regard to the first suggestion, a building very well adapted to the purpose could be erected in conformity with Professor Maskelyne's views, at the cost of about 242 *l.*

With respect to the second suggestion, the existing building, which seems in every way very complete and which comprises a small residence, can be rented by the year, as I understand, for 55 *l.* per annum; the fittings to be taken at a valuation, which is stated will amount to about 50 *l.*

I am unable to advise which of these two plans is preferable, as the question appears to depend mainly upon the probability of the permanence of the present arrangements of the Museum; either plan will satisfactorily meet the requirements of the department.

(signed) *Sydney Smirke.*

A. Panizzi, Esq., &c.

REPORT from the Keeper of the Department of Mineralogy.

10 December 1862.

MR. MASKELYNE has the honour to report regarding the request he has often made for a small laboratory, that he believes an erroneous opinion is entertained by the Trustees as to the nature of the specimens on which his experiments would be made.

In no case would the very small portions of a mineral submitted to analysis consist of entire specimens, and only on the rarest occasions would they be other than small chips or fragments of comparatively no value. In the very exceptional case in which it might become desirable to take for an analysis a portion of a valuable specimen exhibited in a table case, Mr. Maskelyne would consider himself bound to ask the Trustees for their sanction to his doing so. But such occasions would be extremely rare, the material for an analysis being readily furnished, in all ordinary cases, by such fragments as would result from the shaping of a specimen, and which would otherwise be thrown away.

Trusting that this explanation will remove the difficulty arising from the necessity of specimens remaining in the Museum, Mr. Maskelyne begs to recommend, on the ground of its great convenience, the little laboratory at No. 1, Torrington Street, which is less than three minutes' walk from the Mineralogical Gallery.

The rent of it from year to year is 55 *l.* The fixtures in it may be valued at about 50 *l.*, and another 50 *l.* might be requisite for fitting it with a few essential pieces of apparatus.

(signed) *N. Story-Maskelyne.*

REPORT from the Superintendent of the Natural History Departments,

11 December 1862.

PENDING the proposition of removal of the Natural History Collections, a temporary laboratory, hired from year to year, would seem to be the more economical method of supplying the want which Professor Maskelyne so strongly feels.

The proximity of the proposed locality to the Museum would reduce the inconvenience of the occasional absence of the keeper from his gallery to a degree so small as to be more than compensated by the increased value and instructiveness of the mineral collection by his analyses.

EXTRACT from the Minutes of the Trustees.

At a General Meeting, 13 December 1862.

READ a letter from the Treasury, dated 21st July,* in answer to the letter written to their Lordships by direction of the last General Meeting, upon the subject of want of space at the Museum.

* *See* the foregoing Correspondence, Part I. of this Return, page 10.

EXTRACT from the Principal Librarian's Précis, 13 December 1862, read at a General Meeting on the same day.

AN answer has been received from the Treasury to the letter written by direction of the last General Meeting, upon the want of space at the Museum; it states the intention of the Government to prosecute the subject during the recess.

Extract from Minutes of the Trustees.

At a Standing Committee, 13 December 1862.

Read Mr. Smirke's letter of the 29th November last, also Mr. Maskelyne's Report of the 10th December, and Professor Owen's Report of the 11th December.

Resolved—"That the suggestion mentioned in Mr. Smirke's letter to convert to the use of the Museum, a building in its immediate neighbourhood, as a laboratory for the analysis of minerals, be adopted, in preference to the suggestion to build a detached laboratory within the precincts of the Museum, at the north-west corner.

"That the house No. 1, Torrington-street, be rented by the year for the above purpose, as recommended in Mr. Maskelyne's Report of the 10th December, and in Professor Owen's Report of the 11th December, at not more than 55 *l.* per annum. That a sum, not exceeding 50 *l.*, be expended in the purchase of the fixtures now in the house, and that a further sum, not exceeding 50 *l.*, be expended in the necessary additional apparatus.

"That the Lords Commissioners of the Treasury be requested to concur in this expenditure.

"That a draft of the necessary regulations to be observed in all cases of the removal of minerals, or other objects, from the Museum, to the said house, and from that house to the Museum, be submitted to the Trustees at the next meeting of the Standing Committee."

Report from the Deputy Principal Librarian.

8 January 1863.

Mr. Jones has the honour to report, with reference to the order of the Trustees at the last meeting of the Standing Committee, that a draft should be prepared of the necessary regulations to be observed in the removal of minerals to or from the laboratory in Torrington-street, intended to be hired for the use of the keeper of the Mineral Department, that, as the proposed measure has not met with the concurrence of the Lords of the Treasury, Mr. Jones has deferred the preparation of further regulations, no change having taken place in the circumstances, to meet which the regulations already in force were framed.

(signed) *J. Winter Jones.*

Extract from the Minutes of the Trustees.

At a Standing Committee, 10 January 1863.

Read a letter from the Treasury, dated 29 December 1862,* stating, in relation to the acquisition of a laboratory for the analyzation of minerals by Mr. Maskelyne, that, pending the decision of the course which may be taken on the question of the more general development and extension of the Museum, which is under the serious consideration of Her Majesty's Government, their Lordships are of opinion that it would not be expedient to attempt to provide, at present, for the purpose indicated by Mr. Maskelyne.

The Trustees directed that the receipt of this letter be acknowledged.

The Deputy Principal Librarian's Report, stating that, in consequence of the above-mentioned letter, he had deferred the preparation of any further regulations in connexion with this subject, was approved.

* *See* the foregoing Correspondence, Part I. of this Return.

Extract from the Deputy Principal Librarian's Précis, 11 February 1863. Read at the General Meeting, 14 February 1863.

The Lords of the Treasury have expressed an opinion, that pending the decision of the course which may be taken in the question of the general development and extension of the Museum, now under the serious consideration of Her Majesty's Government, it will not be expedient to attempt to provide a laboratory for the analyzation of minerals by Mr. Maskelyne.

Report from the Superintendent of the Departments of Natural History.

9 July 1863.

The vote of the 15th June having provided space for Museums of Art and Science, and specifically for the Natural History Collections, Professor Owen begs to report on the urgency of acquiring, as speedily as circumstances may permit, the requisite accommodation for the existing Collections of the Natural History.

The proportion of these collections unexhibited and in store, their crowded accumulation in the store-vaults, the fact of entire series, such as that of the comparative osteology, much in request for study and comparison, remaining unexhibited, and with difficulty accessible for its proper purposes in science, have been subjects of successive reports during past years; but there is a consequence of the continuance of this state of things which more particularly impels the Superintendent of the Natural History Departments to urgency in his present representation. Zoological specimens may, with due care and constant attention, be kept in a condition for ulterior exhibition during a few years, more or less, of storage; but beyond that time they decay or perish, through the diminished power to resist the influences attending accumulation in dark and crowded store-rooms; and the Superintendent has grave reasons to fear that, notwithstanding the great proportions of the labours of the Natural History staff in combating the causes of deterioration and decay, both consequences are now or will shortly become imminent.

(signed) *Richard Owen.*

Memorandum of the Principal Librarian upon the above Report.

In submitting this report to the Trustees, and urging on them its favourable consideration, the Principal Librarian begs not only to confirm the facts stated by the Superintendent of the Natural History Department, but to add that the other collections in the Museum (with the exception of the Library) are labouring under the same disadvantages as the Natural History Collections; and in confirmation of this the Principal Librarian begs only to refer to the Antiquities under the sheds which now disfigure the colonnade. The contracted space for students, particularly in the Manuscript Department, prevents the public from deriving from that magnificent collection the advantages which it might, nor can the visitors at large be now provided with those necessary accommodations for their comfort and health which they have a right to look for when they visit a great National Museum, all this owing to want of space.

10 July 1863. (signed) *A. Panizzi.*

Extract from the Minutes of the Trustees.

At a Standing Committee, 11 July 1863:

Read a report from Professor Owen, dated 9th July, urging the necessity of acquiring the requisite accommodation for the Natural History Collections.

Read, also, the Principal Librarian's remarks on this report, stating that the

other collections in the Museum (with the exception of the Library) were labouring under the same disadvantages as the Natural History Collections.

Ordered, That a copy of these documents be transmitted to the Treasury, and recommended to the early consideration of Her Majesty's Government.

(*See* the foregoing Correspondence—Mr. Panizzi to the Secretary to the Treasury, 13 July 1863.)

Report from the Keeper of the Department of Mineralogy, 22 July 1863.

Mr. Maskelyne has the honour to call the attention of the Trustees to the great and constantly increasing need of a small Laboratory for this Department.

Mineralogy, if it be akin to the sciences more strictly called Natural History, on account of its including a system of morphology, and being also a classificatory science, yet differs from them not only in its morphological system being an exact mathematical science, but also in that the most fundamental properties and characteristics of minerals are those of which chemical analysis alone takes cognizance. To arrange a great collection of minerals, nay, even to purchase with the requisite confidence many of the specimens it requires, implies that the means are at hand for making the chemical investigations requisite in determining their true characters.

In the British Museum, the simplest of these methods of investigation are forbidden.

Mr. Maskelyne begs respectfully to assure the Trustees, that he can now no longer feel that he is properly discharging his duty to them and to the public, without the means essential to his doing so being provided to his department.

Whatever be the ultimate destination of these departments, much time must elapse before they are accommodated under new conditions. The space, as well as the expense of such a temporary room as is required, would be very small.

(signed) *Nevil Story-Maskelyne.*

Memorandum of the Superintendent of the Natural History Departments on the above Report.

The localities for such Laboratory have been examined and reported on; the one in the yard appears to be most free from objection.

(signed) *Richard Owen.*

Extract from the Minutes of the Trustees.

At a Standing Committee, 25 July 1863:

Read a letter from the Treasury, dated 23d July,* stating that Her Majesty's Government would revert to the consideration of the want of space for the collections in the British Museum, before the next Session of Parliament.

* *See* the foregoing Correspondence, Part I. of this Return, p. 11.

Ordered, That the receipt of this communication be acknowledged with thanks,† and with the expression of a hope that, as the inconveniences mentioned in the Principal Librarian's letter to the Treasury, dated the 13th of July, are increasing daily, the determination to which the Government may come, will be communicated to the Trustees as soon as possible.

* * * * * *

Read a report from Mr. Maskelyne, dated 22d July, and Professor Owen's note thereon.

A motion, that application be made to the Treasury for their Lordship's concurrence in the expenditure of 242 *l.* in building a Laboratory within the precincts of the Museum, was not carried.

---

† *See* the foregoing Correspondence—Mr. Panizzi to the Secretary to the Treasury, 27th July 1863.

Extract from the Minutes of the Trustees:

At a Standing Committee, 8 August 1863.

The Principal Librarian's letter to the Treasury, dated the 27th July, respecting the want of space in the British Museum, was approved.

Report from the Keeper of the Department of Mineralogy, 29 October 1863.

Mr. Maskelyne has the honour to suggest to the Trustees that, whatever may be the decision come to in the next Session of Parliament with respect to the continuance of the Natural History Departments on their present site or their removal to another, a provision, whether temporary or otherwise, be made for supplying to his department so essentially requisite an appendage as a small Laboratory.

Mr. Maskelyne respectfully begs at the hands of the Trustees, that they will show this mark of their consideration for an officer who feels himself in a very embarrassing position with regard to his power of discharging his duties to the Trustees, and to the National Collection under his charge.

(signed) *Nevil Story-Maskelyne.*

Memorandum of the Superintendent of the Natural History Departments on the above Report.

Professor Owen begs permission to refer the Trustees to the Resolution of their Standing Committee of 12th December 1857, as, in his opinion, making the best provision, under the circumstances, for the exigency again pressed upon their consideration by the Keeper of the Mineralogy.

(signed) *Richard Owen.*

Extract of a Report from the Keeper of the Department of Mineralogy, 29 October 1863.

A room is much needed for the assistant in this Department.

Memorandum of the Superintendent of the Natural History Departments, in regard to the above.

The Resolution of the Standing Committee, "that accommodation be provided for the officers of the Natural History Departments on the roof of the Print-room, and that the work be carried out with the least possible delay," 12th December 1857, would best provide for this exigency.

(signed) *Richard Owen.*

Extracts of a Report from the Principal Librarian, 27 November 1863.

The Principal Librarian begs to represent to the Trustees that the proposal submitted by the Keeper of the Mineralogy in his Report of the 29th of October on furniture and fittings, that a room should be provided for an assistant, ought to be made the subject of a special Report to be considered by the Standing Committee.

* * * * * *

The Superintendent of the Departments of Natural History observes, at the foot of Professor Maskelyne's Report, that the Resolution of the Standing Committee of the 12th of December 1857, that accommodation be provided for the officers of the Natural History Departments on the roof of the Print-room, would best provide for this exigency. The Trustees will recollect that the Treasury requested that the carrying out of that Resolution be postponed till the then pending question of the separation of the collections should be decided. Not only has that question been decided in the affirmative at more than one general meeting of the Trustees, but a comprehensive plan of building was approved unanimously by them at a Special General Meeting on the 1st of February 1862, and afterwards received with satisfaction by the Lords of the Treasury. It is part of this plan, printed by order of the House of Commons on the 11th of March 1862, to remove entirely the roof of the Print-room, mentioned in the Minute of the 12th of December 1857; the Standing Committee cannot, therefore, act on this Minute, thus annulled. A copy of the Minute of the 10th of February 1862, with building plans, printed as above, was sent to all the officers of the British Museum on the 2d of April following; it is, therefore, well known to Professor Owen.

Moreover, on the 11th of July last, the Standing Committee ordered that a copy of a report by the Superintendent of the Department of Natural History, respecting the want of space for the collections, and the remarks thereon by the Principal Librarian, be transmitted to Her Majesty's Government with a recommendation for their early consideration; an answer has been received that the Government will revert to the consideration of this subject before the next Session of Parliament. No step can, therefore, be taken by the Standing Committee with respect to any alteration or enlargement of the Museum buildings.

Extracts from the Minutes of the Trustees.

At a Standing Committee, 12 December 1863:

Read the Principal Librarian's Report of the 27th November upon Mr. Maskelyne's Reports of the 29th October, and upon Professor Owen's remarks thereon.

* * * * * *

The Trustees, having referred to the Resolution of 12th December 1857, and to the records of the subsequent proceedings upon the question of providing additional accommodation,

Resolved, That pending the consideration of this question by the Government, the Trustees do not think themselves at liberty to take any steps for providing the additional accommodation asked for in the Natural History Departments

* * * * * *

Report from the Principal Librarian, 7 January 1864.

The Principal Librarian begs to call the attention of the Trustees to an advertisement by the Commissioners of Her Majesty's Works, inviting designs from architects for two new Museums, and offering to communicate the required "particulars" to such architects as may apply for them. It is rumoured that one of the two Museums is destined to receive the Natural History Collections now in the British Museum.

Supposing that to be the fact, the Trustees may, perhaps, consider it expedient to ask for information on the subject. If the arrangements decided on in 1862 be adhered to, the Natural History Collections, now in the British Museum will, even if removed hence, continue to be vested in the Trustees; it would, therefore, be desirable that the Trustees should have an opportunity of considering the "particulars" of the building intended for these collections, and of making, before it be too late, such observations and proposals for the preservation and usefulness of the collections, as they may consider advantageous to the public for whom they are Trustees.

(signed) *A. Panizzi.*

Copy of Advertisement referred to above.

To Architects.—The Commissioners of Her Majesty's Works and Public Buildings give notice that they are prepared to receive designs from architects for two new Museums, to be erected on part of the land at South Kensington, recently purchased by the Government, and used in 1862 for the International Exhibition. Plans of the ground, together with a statement of the premiums and other particulars, will be forwarded to architects on application by letter, addressed to the Secretary, at Her Majesty's Office of Works, 12, Whitehall-place, London.

January 1864.

Extract from the Minutes of the Trustees.

At a Standing Committee, 9 January 1864:

Read the Principal Librarian's report of the 7th instant, calling the attention of the Trustees to an advertisement issued by the Commissioners of Her Majesty's Works and Public Buildings.

Resolved, That the Principal Librarian write to the Treasury stating that the attention of the Trustees having been directed to an advertisement referring, as it is supposed, to a building proposed to be erected for the reception of the Natural History Collections in the Museum, the Trustees request that their Lordships will be pleased to furnish them with information on the subject.

* * * * * *

The attention of the Standing Committee having been directed to certain communications between members of Her Majesty's Government and Officers of the Museum—

Resolved, That all such communications relating to the government, management, buildings, and collections in the Museum ought, in the first instance, to be made through the Principal Librarian, and by the Principal Librarian submitted to the Trustees.

Professor Owen having attended the Board and admitted that he had had some communications of the nature above alluded to, the Principal Librarian was directed to send him a copy of the above Resolution.

Letter from the Principal Librarian to the Superintendent of the Natural History Departments.

Dear Sir, British Museum, 11 January 1864.

In transmitting for your information the enclosed Minute of the Standing Committee of the 9th instant, I beg to remind you, at the same time, of another Minute of the Standing Committee of 8th December 1860, forwarded to you on the 12th of that month, as well as a former Minute of the Trustees, on this subject, of the 12th October 1839, formally communicated to yourself, and the several heads of departments, on the 21st January 1861.

I am, &c.

Professor Owen, &c. &c. &c. (signed) *A. Panizzi.*

Report from the Superintendent of the Natural History Departments, 12 January 1864.

Professor Owen has the honour to report to the Trustees, in reference to the Minute of the 9th January, with an accompanying letter from the Principal Librarian of the 11th of January, that, on receiving the request of a Member of

Her Majesty's Government to confer confidentially with an Officer of the Board of Works on the subject of a Museum of Natural History in the late Exhibition Building or on the site thereof, he forthwith, and in the first instance, communicated the fact of such request to the acting Principal Librarian.

Plans of a Museum, the result of that conference, were laid upon the table of the House of Commons by the First Commissioner of the Board of Works (2d July 1863). Professor Owen's final conversation with Mr. Cowper, in November last, referred to the same plan, in regard to the extent of building required for the present collections of Natural History.

(signed) *Richard Owen.*

Report from the Principal Librarian, 22 January 1864.

In compliance with the wish expressed by one of the Trustees, and acquiesced in by another Trustee, who directed the Principal Librarian to summon a Special Meeting of the Standing Committee, Mr. Panizzi begs to submit to the Board the following Report; which, it will be seen, embraces a longer period than was contemplated in the instructions given to Mr. Panizzi as above. It was however important, in Mr. Panizzi's opinion, to extend that period, in order to bring before the Committee all the circumstances which may have influenced the Trustees in coming to the various resolutions, or taking the several steps, which they have adopted from time to time. But the Principal Librarian has not considered it necessary to place now before the Standing Committee the opinions incidentally expressed at various times, though in an official manner, by various persons; by himself, amongst others, on three occasions (Evidence before Select Committee of the House of Commons on the British Museum in 1836, Answer 4800; Return No. 166 of Session 1846, pp. 36–7, note: Evidence before Select Committee of the House of Commons on the National Gallery, Answer 7482).

In 1848 (Parliamentary Paper 557, Session 1852, pp. 2–4) suggestions were made by the Trustees to the Treasury for continuing the north side of the Museum Building eastward into Russell-square. These suggestions were again pressed upon the Treasury in November 1853 (Parliamentary Paper 379, Session 1858, pp. 2, 3): but, in the following month, the Treasury acquainted the Trustees that the Lords Commissioners were unable to entertain any plan for the improvement and enlargement of the British Museum which involved new purchases of land, until it should have been fully considered and decided how far the then recent acquisition of property at Kensington might enable them to dispense with such purchases.

The demands for additional space for the Printed Book Department, and for the accommodation of the readers, subsequently became so urgent that the works in the quadrangle, which had been suggested in May 1852, were commenced in May 1854, and completed in May 1857.

This building afforded no relief to the crowded collections in the Natural History Departments, and the officers repeatedly urged that twice as much room would be required for the Zoology as that then occupied by it (Parliamentary Paper 379, Session of 1858, pp. 21, 22); and that the specimens exhibited, being so crowded, were not properly seen (pp. 23, 24 and 32 of same paper). During the year 1857, the Trustees considered several proposals to provide better, even if temporary, accommodation for the Natural History Collections; but they suspended their sanction to any minor plan of building until the decision of the general question.

The pressing want of space for the Collections of Antiquities compelled the Trustees to enclose the lower part of the colonnade in front with glazed framework, to give temporary shelter to the first results of the excavations at Halicarnassus and Cnidus, which were placed there at the end of the year 1857; and there they still remain. The space within the colonnade is now all enclosed, and is already overcrowded with sculptures, the further result of the Halicarnassian excavations, of those in the Cyrenaica, and elsewhere.

After consideration of a Special Report from Mr. Panizzi, of the 10th November 1857 (Parliamentary Paper of Session 1858, No. 379, pp. 38–47), the Trustees

Trustees, on the 22d January 1858, resolved that the best mode of providing for present and future requirements would be by the purchase of land to the north of the Museum; and this opinion was communicated to Her Majesty's Government.

In June 1858, the question of removing the Botanical Collections to Kew was specially considered by the Sub-Committee on Natural History, who came to an opinion adverse to such a removal.

In the month following a deputation waited upon Her Majesty's Government with a Memorial, signed by the leading naturalists of England, including three Trustees, Professor Owen, and the several keepers of the Natural History Departments in the British Museum, against the removal or breaking-up of the Natural History Collections (Parliamentary Paper, No. 456, Session 1858).

On the 7th July 1858 (Parliamentary Paper, No. 434, Session 1858), Mr. Hawkins made a Report to the Trustees, strongly adverse to an extension of the Department of Antiquities towards the north; and, on the 18th November 1858 (Parliamentary Paper 126, Session 1859, pages 14 to 17), several of those who had in the July previous signed the memorial against separation, with other naturalists, addressed a further memorial to the Chancellor of the Exchequer, which seems to imply the erection of a distinct Museum for the Natural History Collections.

Things were in this state when, in February 1859, Professor Owen submitted a plan showing the "proportionate space" required for each department and class in a National Collection of Natural History (Parliamentary Paper 126, Session 1859, pp. 22, 23 and 24). In that plan Professor Owen required that there should be galleries to a total length of 6,000 feet, by 50 feet in breadth:—300,000 superficial feet.

In addition to this accommodation, Professor Owen proposed by his plan to have a circular-domed building 150 feet in diameter, for the exhibition of type-specimens, as well as the requisite accommodation for offices, libraries, &c., &c.—in all a total area of 485,100 superficial feet (*see* Report of Select Committee of the House of Commons on the British Museum, 1860, page 52, Question 653).

As Professor Owen's building was to be lighted by skylights, it would have required more than ten acres of ground to carry it out: the Trustees reminded him that this extent of land could not be obtained contiguous to the British Museum, and he then agreed that, with a building of two storeys, five acres would be sufficient.

A Special Committee of the Trustees, in January 1860, ascertained that for five-and-a-half acres surrounding the Museum (all of which would have had to be taken), the cost of the ground would be 240,000 *l.*; but that as the other departments of the Museum, as well as those of Natural History, required to be accommodated, the cost of the requisite land, viz., eight acres at Bloomsbury, in two plots, would be 390,000 *l.*, and in one plot, on the south side of Great Russell-street, 455,000 *l.*, as compared with 27,500 *l.* for five acres, and 40,000 *l.* for eight acres at Kensington.

At a Special General Meeting on the 21st January 1860, the Trustees, having regard to the prospective saving of 212,500 *l.*, if the necessary site of five acres were provided at Kensington, resolved that the Natural History Collection should be removed from the British Museum.

A Select Committee of the House of Commons was appointed in the Session of 1860, to inquire how far and in what way it might be desirable to find increased space for the Museum Collections, &c. This Committee took a great deal of evidence, including that of Professor Owen, who appeared still to adhere to his plan of February 1859, and who then stated that, though he preferred Bloomsbury, a space of at least five acres was so essential to the right and healthy progress of a National Collection of Natural History, as to outweigh the conveniences of any particular locality (Questions and Answers, Nos. 596 and 597). The Committee's Report was adverse to the removal of any part of the Collections except Ethnography, the Portraits and the Drawings. Professor Owen had an opportunity before the Committee of reiterating a change in the opinion which he had expressed in 1848, before the Royal Commission on the British Museum, in favour of the transfer of the Mineral Collection to the Jermyn-street Museum; while he now advocated (Answer to Question 573) the removal of the Botanical Collection from the Museum, which he had disapproved formerly.

This Report came before the Trustees in October 1860, and, although a motion was made that it should be referred to the several Sub-Committees for consideration, the Standing Committee resolved to leave any further proceedings in the hands of the Government.

The special attention of the Treasury was further called to the continued want of space in October 1860, as well as in May and November 1861 (Parliamentary Paper 97, Session 1862, pp. 2, 3); and the Lords of the Treasury accordingly, by their Minute of 13th November 1861 (Parliamentary Paper No. 97, Session 1862, pp. 3 to 7), definitively acquainted the Trustees that they would be prepared to take the necessary steps to provide accommodation for a portion of the Natural History Collections on the Kensington Gore Estate. The Trustees approved generally of the proposals contained in the Treasury Minute; and, having been invited in that minute to prosecute the further examination of the question, a Special Committee was appointed for the purpose (Parliamentary Paper, No. 97, Session 1862, pp. 8, 9). This Committee recommended that all the Natural History Collections should be speedily and simultaneously removed, as well as the Ethnographical Collections, and the Portraits at present in the Ornithological Gallery; and they made suggestions for the appropriation of the present space, as well as for alterations and additions to the building for the collections that would remain here. These recommendations and suggestions were approved at a Special General Meeting of the Trustees (Parliamentary Paper 97, Session 1862, pp. 22, 23), and were officially communicated to the Treasury.

In the Session of 1862 the Government brought in a Bill to enable the Trustees to remove certain portions of their Collections. This Bill was rejected at the second reading, mainly on the score of the large expense which would have had to be incurred in erecting the requisite buildings for the Natural History Collections at Kensington.

The "Times," in its leader of the 21st May 1862, having called upon Professor Owen to describe the building that would answer his purpose, he published in the autumn following a book on "A National Museum of Natural History." In it (at page 83) he stated that he found a plot of ground of about 800 feet by 160 feet (128,000 superficial feet) to the west of the British Museum, on two-thirds of which plot might be erected the building needed for the present Collections of Natural History.

The attention of Professor Owen having been called to the fact that the stated extent of land to the west of the Museum was erroneous, he issued an amended copy of his work, in which (likewise at page 83) he speaks of the plot of ground as being "about 800 in length by 140 feet in depth" (112,000 superficial feet). To make up for this deficiency of superficies, he proposed to add a third storey to the longitudinal galleries, which, he now suggested, should be placed next to Charlotte-street; and, in order not to interfere with the light of the present Museum Buildings, he further proposed to reduce the height of the transverse galleries—viz., those on the lower floor from 30 to 20 feet, and those on the upper floor from 25 to 15 feet.

The amended statement of the space to the west of the Museum was, however, still erroneous; the actual area being 101,000 superficial feet, or 11,000 superficial feet less than now stated. The breadth of the land available to the west of the Museum is in no place more than 134 feet; for some distance from the south end it is only 100 feet.

In the Session of 1863 the Government unsuccessfully submitted a proposal to the House of Commons to purchase the International Exhibition Buildings at Kensington, a portion of which it was considered might be well appropriated to a Natural History Museum.

In the same Session of Parliament a paper was laid upon the table of the House, and printed by its Order (Parliamentary Paper, No. 390), in which was included a plan prepared, in September 1862, by Mr. Hunt, surveyor of the Office of Works, and which plan is there stated to have been based on Professor Owen's suggestions for a National Museum of Natural History. The extent of land, however, which would have been required to carry this plan into execution, rendered it quite impossible to adapt it to the west side of the Museum—one of the two localities specially noticed by Professor Owen in his work before mentioned.

The

The attention of the Standing Committee was called, at their last meeting, to an advertisement recently issued from the Office of Works, inviting architects to a competition for two Museums to be erected at South Kensington, one of which, it was ascertained, was intended to receive the Natural History Collections from the British Museum; and Mr. Panizzi was directed to apply to the Treasury for information on the subject. Mr. Panizzi submits herewith his letters to the Treasury of the 11th and 18th, and the replies thereto of the 13th and 21st of this month.

From a printed copy of particulars transmitted with the Treasury letter of yesterday's date, it appears that, according to plans "prepared in [September] 1862, for another site, under the directions of Professor Owen, and printed by order of the House of Commons on the 23d of June 1863 (No. 390), the accommodation required for the exhibition of the Collections of Natural History belonging to the British Museum may be afforded by galleries extending to a collective distance of 3,280 feet in length, with a breadth of about 40 feet." Those directions have never been brought under the notice of the Trustees, nor has Mr. Panizzi ever seen them; he cannot, therefore, say whether the plans alluded to were or were not prepared in accordance with them. The plans accompanying the first issue or edition of Professor Owen's work, published about the end of July 1862, "On the extent and aims of a National Museum of Natural History," as well as those accompanying the corrected edition of that work (about the end of November 1862), show a much greater extent of galleries. This point appears to require explanation, as well as the intended provision of 25 additional rooms, 25 feet by 18 feet each, for attendants.

The Treasury letter of yesterday acquaints the Trustees that the First Commissioner of Works has been called upon to furnish the information requested in Mr. Panizzi's letter of the 18th instant.

Professor Owen, in a Report dated the 12th instant, states that having been asked "to confer confidentially with an officer of the Board of Works, on the subject of a Museum of Natural History in the late Exhibition Building, or on the site thereof, he forthwith, and in the first instance, communicated the fact of such request to the acting Principal Librarian" (that is, to Mr. Jones, who was Deputy Principal Librarian from the middle of December 1862 to the end of April 1863). Professor Owen goes on to say, that "Plans of a Museum, the result of that conference, were laid upon the table of the House of Commons by the First Commissioner of the Board of Works (2d July 1863)." Mr. Panizzi has not been able to ascertain that any such plans were laid on the table of the House at the date given by Professor Owen, or even that they exist; the only plans for a Museum of Natural History at Kensington that Mr. Panizzi has seen are those prepared, as above stated, by Mr. Hunt in September 1862, months before the conference referred to could have taken place.

(signed) *A. Panizzi.*

Extract from the Minutes of the Trustees.

At a Special Meeting of the Standing Committee, 23 January 1864:

Read a letter* dated the 13th instant, from the Treasury, in reply to one addressed to their Lordships by the Principal Librarian on the 11th instant, by direction of the Committee at the last meeting.

* *See* the foregoing Correspondence, Part I. of this Return, p. 11.

The Principal Librarian's letter to their Lordships, dated the 18th instant, was read and approved.

Read also a letter, dated 21st instant, from the Treasury, transmitting copy of a report from the First Commissioner of Works, dated the 18th instant, with printed particulars and plan of site at South Kensington for proposed new buildings for the Natural History Collection of the British Museum. *ib.* *ib.*

A report, dated 22d instant, from the Principal Librarian was laid before the Board, giving a summary of the proceedings from 1853 up to the present time, in connexion with the question of providing additional accommodation for the Museum Collections.

Whilst the Standing Committee were in deliberation a letter* dated this day, arrived from the Treasury, inclosing a report from the First Commissioner of Works, dated the 20th instant; which letter and report having been read, it was moved by Viscount Eversley, and

* *See* the foregoing Correspondence, Part I. of this Return, p. 12.

Resolved, That the Principal Librarian do write to the Treasury, acknowledging the receipt of their Lordships' letters of the 21st instant and of this day, with the inclosures therein, and submitting to their Lordships that the Standing Committee are unable, with the imperfect information they now possess, to form any opinion upon the calculations with regard to the space required in the new Museum Buildings at South Kensington, as stated in the Paper communicated to the Lords Commissioners by the Office of Works; and the Trustees request that more complete information may be forwarded to them as soon as possible, if they are to be considered in any degree responsible for the amount of accommodation on which the plans are to be founded.

ib. p. 13.

It was moved by George Grote, Esq., and

Resolved, That a Sub-Committee be appointed to consider the information communicated by and expected from the Treasury as soon as it shall be furnished, to report to the Standing Committee their opinion as to the amount and distribution of space signified in the printed statement issued by the Board of Works, as required for the Natural History Museum on the intended site at South Kensington.

That the following Trustees be members of the Sub-Committee, namely:-

The Speaker of the House of Commons.
The Right Honourable S. H. Walpole, M. P.
Sir Philip De Malpas Grey Egerton, Bart., M. P.
Sir Roderick Impey Murchison, K. C. B.
The President of the Royal Society.
George Grote, Esq.

The Principal Librarian was directed to summon a meeting of the Sub-Committee on receiving the expected communication from the Treasury.

* * * * * *

Read a report, dated the 12th instant, from Professor Owen, in reference to the minute of the last meeting of the Standing Committee prohibiting unauthorised communications by officers of the Museum with Public Departments.

Extract from the Minutes of the Trustees.

At a Standing Committee, 6 February 1864:

† *See* the foregoing Correspondence, Part I. of this Return, pp. 13, 14.

Read letters† from the Treasury, dated 26th January and 3d inst., enclosing a copy of a report from the First Commissioner of Works, of 1st February, and of their Lordships' reply, of the 3d, all having reference to the proposed new buildings to be erected on the site of the Exhibition of 1862.

The Trustees postponed the consideration of the subject until after the further communication thereon, promised by the Treasury, shall have been received.

* * * * * * * * *

Ordered, That the Principal Librarian's report of the 22d ult., giving a précis of the proposals made, and the proceedings thereon, since 1848, for providing further accommodation for the Collections of the Museum, be privately printed and submitted to the Standing Committee at their next meeting.

EXTRACT from the Minutes of the Trustees.

At a Standing Committee, 13 February 1864:

THE Principal Librarian's report of the 22nd ult., giving a summary of the proceedings on the question of providing additional accommodation for the Collections in the British Museum, privately printed as directed at the last meeting, was laid before the Board.

Ordered, That a copy of this report be sent to each of the Trustees.

EXTRACT from the Principal Librarian's Précis, 13 February 1864 (read at a General Meeting on the same day).

THE attention of the Standing Committee having been directed to an advertisement issued by the Board of Works inviting architects to send in designs for two Museums to be erected at South Kensington, application was made to the Treasury for information on the subject. From the answer received it appears that part of the buildings for which designs are required is for the accommodation of the Natural History Collections of the British Museum, and that the advertisement was inadvertently issued without communication with the Trustees. At a Special Meeting of the Standing Committee it was ordered that application be made to the Treasury for further information as to the details furnished to the architects by the Office of Works for the designs required. Copies of reports from the First Commissioner of Works have been received and laid before the Committee, and a special Sub-Committee has been appointed to consider and report on these communications, and upon any additional information that may be received on the subject. A report which the Principal Librarian was directed to prepare, setting forth the various proceedings for some years past on the question of providing additional accommodation for the Collections at the British Museum, has been laid before the Committee, and has been privately printed by their order.

The Superintendent of the departments of Natural History having owned to the Committee that he had been in communication with the First Commissioner of Works on the subject of the proposed building at South Kensington for the accommodation of the Natural History Collections, the Committee passed a resolution that all communications relating to the government, management, buildings, and collections of the Museum ought to be made, in the first instance, to the Trustees, through the Principal Librarian. A copy of this Resolution has been sent to the Superintendent of Natural History, and to the keepers of departments, whose special attention has been recalled to former Minutes of the Trustees prohibiting such communications without the express sanction of the Trustees.

British Museum,
30 March 1864.

A. Panizzi, Principal Librarian.

BRITISH MUSEUM.

COPIES of CORRESPONDENCE between the TREASURY and the BRITISH MUSEUM on the Subject of providing ADDITIONAL ACCOMMODATION for the several COLLECTIONS belonging to that Establishment (in continuation of Parliamentary Paper, No. 97, of 1862); and of REPORTS which have been received by the Trustees from the Heads of Departments on the same subject.

The Public are admitted to the British Museum on *Mondays, Wednesdays* and *Fridays*, between the hours of Ten and Four, during the months of November, December, January and February; from Ten till Five during the Months of September, October, March, and April; and from Ten till Six from the 8th of May to the 31st of August. The Public will be also admitted on the Saturdays in the Months of May, June, July and August of the present year, between the hours of Twelve and Six.

Persons applying for the purposes of Study or Research are admitted to the Reading Room, under certain regulations, every day, except on the days specified below, from Nine till Four in the Months of November, December, January and February; from Nine till Five in the months of September, October, March and April; and from Nine till Six in the months of May, June, July and August.

Artists are admitted, under similar regulations, to study in the Galleries of Sculpture, from Nine o'clock to the hour of closing, every day on which the Museum is open.

The Museum is closed from the 1st to the 7th of January, the 1st to the 7th of May, and the 1st to the 7th of September inclusive, on Ash Wednesday, Good Friday and Christmas-day, and also on any Special Fast or Thanksgiving Days ordered by Authority.

tish Museum,
18 April 1864.

A. Panizzi,
Principal Librarian.

VIII.—PROGRESS made in the CATALOGUING and ARRANGEMENT, and Account of OBJECTS ADDED, in the Year 1863.

DEPARTMENT OF PRINTED BOOKS.

I. Works added to the Collection during the year have been placed on the shelves of the Library as soon as catalogued. The press-marks, indicating their respective localities, have been marked on the inside, and affixed to the back of each volume; also, on the title and entry in the Catalogue. The total number of these press-marks amounts to 138,501.

II. *Cataloguing*:—(a.) *New General Catalogue.*—The number of titles and cross-references written for this Catalogue amounts to 16,552. The number of titles transcribed fourfold for this Catalogue is 21,004, and of index slips 1,489; 17,047 title slips and 1,482 index slips have been incorporated into each of three copies of this Catalogue, from letter A to G, inclusive. This incorporation has rendered it necessary, in order to maintain the alphabetical arrangement, to remove and re-insert in each copy 26,261 title slips, and 393 index slips, and to add to each copy 1,738 new leaves: 39,905 title slips of letter H (including 15,394 new titles), have been laid down in one copy of this Catalogue, 18,602 title slips in a second copy, and 14,691 in a third copy; of each of the last two sets, 13,973 were new titles.

(b.) *Supplementary Catalogue.*—The number of titles and cross-references written for this Catalogue is 51,847, besides 303 for the Hebrew Catalogue; in all, 52,150. The number of titles transcribed fourfold for this Catalogue is 45,841, besides 422 index slips; 24,175 title slips, and 625 index slips have been incorporated into each of three copies of this Catalogue. In order to maintain the alphabetical arrangement, 33,585 title slips have been removed and re-inserted in each copy; 1,696 leaves have been added to each copy.

The number of new entries made in the Hand Catalogue of the Periodical Publications is 248.

(c.) *Maps.*—The new titles and cross-references written for Maps amount to 6,063. The number of titles transcribed fourfold for this Catalogue is 3,973. The number of titles incorporated into each of three copies of this Catalogue is 6,057. In order to maintain the alphabetical arrangement, 4,167 title slips have been removed and re-inserted; 199 new leaves have been added to each copy.

(d.) *Music Catalogue.*—The new titles and cross-references written for this Catalogue amount to 6,315; 4,260 titles have been transcribed fourfold for this Catalogue.

(e.) *Carbonic Hand Catalogue.* — 37,937 title slips of the fourth transcript of the General Catalogue have been mounted on cartridge paper, and arranged according to the press-marks, and 36,370 title slips so mounted, have been incorporated into the general series: 6,057 title slips of the fourth copy of the Map Catalogue have been mounted and arranged in like manner.

(f.) *List of Books of Reference in the Reading Room.*—The number of alterations and additions made in the interleaved copy of this list, and also in the hand list of the books of reference, in order to record the changes made in the books of reference by the addition of new works, and the exchange of old for new editions, amounts to 282 in each.

III.—The number of volumes bound is 16,314 in 14,080, including 3,160 pamphlets. The number of volumes repaired is 1,793: 1,316 Maps have been mounted.

IV. *Reading Room Service.*—1. The number of books returned to the shelves of the General Library from the Reading Room is 215,487; to those of the Royal Library, 9,675; to those of the Grenville Library, 985; and to the closets in which books are kept from day to day for the use of the Readers, 160,337. Adding the number of volumes returned to the shelves of the Reading Room, about 836,000, the whole amounts to 1,222,484, or 4,215 per diem.

2. The number of Readers has been 107,821; on an average 372 per diem, the Reading Room having been kept open 290 days; each Reader has consulted, on an average, 11 volumes per diem.

V. *Additions.*—1. The number of volumes added to the Library (comprising 268 received under the International Copyright Treaties) amounts to 36,262 (including Music, Atlases, and Newspapers), of which 1,501 were presented, 28,220 purchased, and 6,541 acquired by copyright.

2. The number of parts of volumes (comprising 652 received under the International Copyright Treaties) is 39,733 (including Atlases and Music), of which 565 were presented, 24,413 purchased, and 14,755 acquired by copyright. The total number of Newspapers acquired

acquired is 1,064, besides single numbers of 31 American newspapers. Of these, 770 (viz., 215 published in London, and 555 in the country) have been received from the Inland Revenue Office in England, 145 from the branch of that office in Ireland, and 135 from the branch of the same office in Scotland, and 14 and the single numbers have been purchased.

3. The Maps, Charts, and Plans (including 2 maps in 14 sheets, acquired under the International Copyright Treaties, amount to 1,640 in 5,100 sheets, the Atlases to 12 complete, and 8 parts of Atlases in course of publication. Of the Maps and Charts, 336 were presented, 815 purchased, and 489 (including 2 received under the International Copyright Treaties) acquired by copyright. Of the Atlases, 2 were purchased, and 10 complete, and 8 parts of Atlases, acquired by copyright.

4. The number of pieces of Music, each comprising a complete work (including 497 received under the International Copyright Treaties) is 3,577, of which 517 were purchased, 259 presented, and 2,801 acquired by copyright: 653 parts and numbers of works in progress (including 111 received under the International Copyright Treaties), have been acquired by copyright, and also 975 works, not included among the pieces of music, of which 883 were purchased, and 92 (including 16 received under the International Copyright Treaties) acquired under the Copyright Act.

5. The total number of articles received (including Broadsides, Engravings, and other miscellaneous pieces, not enumerated above) is 107,784, of which 1,457 were received under the International Copyright Treaties. Of the articles received (exclusive of Broadsides, Engravings, &c., and comprising 821 received under the International Copyright Treaties) 56,221 are complete works. Of the complete works, 45,020 were purchased, 1,129 presented, and 10,072 acquired by copyright.

6. Each article acquired has been stamped. The number of stamps so impressed is 323,760.

J. Winter Jones.

Department of Manuscripts.

1. The Index to the Catalogues of Additions for the years 1846 and 1847, has been printed off, and the volume will shortly be ready for publication.

2. The Catalogue of Additional Manuscripts for 1855 has been completed, and the Catalogues for 1848, 1849, 1850, and part of that for 1851, have been revised in an abridged form.

3. The Egerton Manuscripts have been described in detail, from No. 1,851 to No. 1,899; also Nos. 1,692, 1,793–4.

4. A Catalogue of the Birch Manuscripts in detail has been commenced, and Nos. 4,101–4,125, 4,200–4,253, have been described.

5. The Icelandic Manuscripts have been described in detail, Add. 4,857–4,889.

6. The entries in the Hand Catalogue of the Additional Manuscripts, which is placed in the Reading Room, have been continued from No. 24,436 to No. 24,734, and from No. 24,843 to No. 25,174, up to June 1863.

7. The Additional Charters and Rolls have been described from No. 8,402 to No. 9,462, from No. 9,623 to No. 11,928, from No. 12,631 to No. 12,728, and from No. 12,923 to No. 13,369. The slips have been revised from No. 5,445 to No. 6,292, and transcribed into the General Catalogue from No. 5,445 to No. 5,909.

8. The sheets of the Appendix to the Catalogue of Arabic Manuscripts, from 7 K to 8 I have been printed off, and completed. Indexes of titles and authors, and corrections and additions to the Catalogue have been made. Twenty-three volumes in Arabic, Persian, and Turkish have been described in detail, and also for the Catalogues of Additions, 1862–3.

9. One hundred and forty-seven volumes in Syriac have been collated, the contents noted, and, in many instances, re-arranged. The entire collection of the Nitrian Manuscripts has now been examined and bound, and a detailed classified catalogue of them commenced.

10. The General Classed Inventory of the Oriental Manuscripts has been kept up to the end of the year.

11. A transcript of the enlarged General Index to the Registers of the Additional and Egerton Manuscripts, from 1847 to 1860, has been completed for the use of the Reading Room. A transcript is also in progress of the Catalogue of the Davy Collection of Suffolk Portraits and Engravings for the use of the Department of Prints. Indexes to the Birch MSS. 4,221–4224, 4,226, Add. 5,015*, and Egerton 1,913, 1,914, have been made and copied fair into the respective volumes.

12. The Register of Donations to the Department has been kept up to the end of 1863.

13. The arrangement of the Caley and Devon Topographical Papers has been completed, as also of the Legal and other Manuscripts of the St. John Collection; of the Rippon Correspondence, the Grant Letters, and the additional Hunter Papers. The Birch MSS. 4,221–4,227, and Add. 25,102, 25,131, have been re-arranged.

14. Portions of the Cottonian Manuscripts, Otho A. III., A. VIII., A. X., B. III., B. X., B. XI., C. II., Vitellius A. III., A. V., A. VII., D. XI., E. VII., E. VIII., E. XII. (injured in the fire of 1731) have been identified and arranged, and additional leaves recovered and inserted in Tiberius A. IX., A. XV., B. IX., Galba A. I., A. VII., Otho A. VI., B. V., B. XIII., Vitellius A. VIII., C. XIV., D. XVII., E. I., and F. XI.

15. The Additional Manuscripts have been numbered and registered, from No. 25,000 to No. 25,490 (up to the end of 1863), and they have been bound, repaired, lettered and stamped, from No. 24,480 to No. 24,742, and from No. 24,843 to No. 25,174.

16. The Egerton Manuscripts have been numbered and registered, from No. 1,943 to No. 1,945; and they have been bound, lettered, and stamped, from No. 1,910 to No. 1,943.

17. The Additional Charters and Rolls have been arranged and numbered from No. 16,158 to No. 16,280, and registered from No. 1 to No. 1,262, No. 2,171 to No. 4,578, No. 5,350 to No. 6,333, and No. 10,593 to No. 11,800. The entire collection has now been registered up to the last-mentioned number. The Charters have also been separately marked with the date of acquisition, from No. 15,208 to No. 16,280.

18. Six hundred and thirty-nine of the Additional Manuscripts, 333 of the Sloane, 18 of the Cottonian, 155 of the Lansdowne, and 26 of the Egerton Collection, have been folio'd.

19. Stamps have been placed on every tract, letter, or separate document in 29 volumes of the Cottonian Collection, 3 Sloane, 31 Old Royal, 14 Harleian, 47 Egerton, and 1,496 Additional Manuscripts; also on 41 Additional Charters, and 144 Books of Reference. Extra stamps have also been placed on 62 volumes of various collections. The total number of stamps affixed amounts to 52,309.

20. Press marks have been permanently affixed to 1,325 Additional Manuscripts, and temporarily to 1,131. Fresh labels have been supplied to the whole of the objects exhibited in the show-cases.

21. Fifty-three Cottonian, 81 Sloane, 45 Old Royal, 48 Harleian, 14 Lansdowne, 3 Arundel, 44 Egerton, and 817 Additional Manuscripts, with 148 Books of Reference, have been bound, repaired, or lettered.

22. The Additional Charters and Rolls have been cleaned, repaired, and stamped, from No. 16,158 to No. 16,280: 353 injured seals have been repaired, and new boxes made for them, where required.

23. The Additions made to the Department in the course of the year are as follows:—

To the General Collection—	
Manuscripts	461
Original Charters and Rolls	114
To the Egerton Collection—	
Manuscripts	3

Amongst the acquisitions more worthy of notice may be specified—

A Cartulary on vellum of the Abbey of Peterborough, during the time of Abbats William Gynge and John de Depynge, 1396–1438.

The Bundbuch, or Acts of the Swabian League, from 1480 to 1495, on vellum. A fine copy of the Chronicon Ottonis, Episcopi Frisingensis, with a continuation to A. D. 1274, on vellum.

A volume of original State Papers, of much historical value, extending from about 1527 to the end of the reign of Henry VIII. Many of these papers are from the King and Cromwell to Stephen Gardiner, Bishop of Winchester, when ambassador in France, from 1532 to 1538.

An autograph Letter of Ludovico Ariosto, addressed to Nicolao Zardino, relative to the desire of the Duke of Ferrara to make terms with Florence and Lucca; dated 16 October 1522.

The official copy of the Process of Canonization of Carolo Borromeo, Archbishop of Milan, in 1605–6, signed by the prelates and notaries present; with many original Papers added: from the Archinto Library.

A large collection of Legal and other Manuscripts belonging formerly to Oliver St. John, Chief Justice of the Common Pleas. Among them is a copy of his speech in defence of Hampden, on the question of ship-money, in 1637, with his autograph additions.

The concluding portion of the Correspondence of Francesco Terriesi, Florentine Minister at London, 1689–1691; transcribed from the Archives at Florence.

Three

Three Coptic Papyri, in the Sahidic dialect, relating to the Monastery of St. Phœbammon, at Hermonthis.

24. The number of deliveries of Manuscripts to readers in the Reading-room during the past year amounts to 22,060, and to artists and others in the rooms of the Department to 3,042, exclusive of the volumes shown to visitors on private days.

Frederic Madden.

Department of Oriental, British, and Mediæval Antiquities, and Ethnography.

I.—*Arrangement.*

Two new cases for the exhibition of wooden coffins have been placed in the second Egyptian room, and several of the wall-cases in the Egyptian rooms have been re-arranged and refitted for a better display of their contents.

A railing has been placed round the sarcophagus of Nekhtherhebi, King of Egypt, to protect it from injury.

162 Egyptian antiquities have been catalogued, 192 have been mounted, including 80 of a large size, and 5 large tablets have been framed and glazed.

Of the Egyptian Papyri, 6 have been unrolled and arranged for mounting, 3 have been framed and glazed, and 47 fragments arranged and bound; a reference-list of part of the Collection has been made.

The Nimrûd and Kouyunjik Galleries have been painted in a more decorative manner than before, and the floors rubbed down and cleaned.

Part of the sculptures in the Assyrian Basement Room have been glazed, with a view to their better preservation.

Two monoliths from Kurkh and two conical stones from Babylon, all recently received, have been mounted on pedestals and placed in the public galleries.

An additional table-case has been placed in the Assyrian Basement Room for the display of a series of early iron weapons and implements, and two presses have been fitted up to contain the bricks with the names of Sennacherib and Nebuchadnezzar.

Some of the cases in the Assyrian Ante-room have been refitted and re-arranged.

1,762 Assyrian terra-cotta tablets, with inscriptions, have been temporarily classed and arranged in the presses above the Ornament Room, and 303 have been placed in separate card boxes, for their better preservation.

The gold ornaments from Mesopotamia and Lower Babylonia have been temporarily arranged in one of the cases of the Ornament Room.

The Assyrian carvings in ivory have been carefully examined, and the various fragments compared and fitted together. They prove in many cases to be portions of large panels, with figures and designs in several different styles of art. In this operation many hundred fragments have been cleaned and joined, preparatory to mounting.

Among the minor Assyrian antiquities, 218 objects in iron, 38 seals, and 28 miscellaneous objects have been mounted, and, where necessary, cleaned and repaired.

309 Assyrian and Oriental gems have been mounted and exhibited.

Careful copies have been made of the cuneiform inscriptions on 21 dated tablets of terra cotta and 1 of bronze, as well as of the inscriptions on the two monoliths from Kurkh, acquired during the year.

Type impressions of 300 Assyrian and Babylonian gems have been made.

The Himyaritic inscriptions acquired in 1862 and in the past year have been exhibited, as well as the limited space would allow, in the Basement and in the Second Egyptian Room. Lithographic fac-similes of the whole Collection, 42 in number, have been published, with introductory remarks.

A volume, containing lithographic fac-similes of 90 Phœnician inscriptions from Carthage, in the Department, which had been commenced previously to the separation of the Departments of Antiquities, has been edited by Mr. Vaux, with explanatory letter-press, and published.

The scattered remains of Early Christian antiquity have been brought together, and displayed in a table-case in the British and Mediæval Room, together with the acquisitions of the same nature made during the year.

An extensive collection of antiquities from the Lakes of Switzerland, obtained chiefly by the assistance of the Hon. Admiral Harris, H. M. Minister at Berne, has been placed in a table-case in the British Room, together with other remains of the kind.

45 Mediæval matrices of seals have been mounted, with wax impressions at their sides, and exhibited with the rest of the Collection.

In the Collections generally, 2,118 objects have been registered, comprising the acquisitions of the year and the arrears previous to the separation of the Departments of Antiquities. 631 descriptive labels, 183 printed numbers, and 3,265 registration numbers have been attached to various objects.

The Sloane Catalogues of "Antiquities" and "Miscellanies" have been transcribed, comprising 3,276 entries.

Hand Catalogues have been made of the books of reference in the Studies of the Department.

II.—*Acquisitions.*

The acquisitions of the Department are 875 in number, and may be classed as follows:—

Egyptian.—A funereal ritual on papyrus, in the Hieratic character.

A bronze figure of Isis winged.

A cast of the upper part of the statue of a functionary, with the name of Psammetichus I., inscribed over a royal name anciently erased; presented by John Lee, Esq., LL.D.

Babylonian and Assyrian.—Two sculptured stones from Babylon, similar to the well-known "*Caillou Michaud*" at Paris. On one of them is the figure of an early Babylonian king in low relief, and an inscription relating to the purchase of a field; the other contains a similar inscription, and the name of the king Merodach-adan-akhi. On the conical top of each stone are various symbols of divinities. Probable date, the 12th century before Christ.

Two monolithic monuments brought from Kurkh, near the source of the Tigris; they have on them basreliefs of monarchs, and long inscriptions on every side. One commemorates Asshur-izir-pal, who reigned B. C. 880; the other, his son Shalmaneser.

Sixteen engraved cylinders of hard stone, chiefly of Chaldean workmanship, and four gems.

Phœnician and Early Oriental.—Four gems, with Phœnician inscriptions.

An Intaglio of large size, representing a monarch in a Parthian head-dress, and a Pehlevi inscription in honour of Balak-pati, "Lord of Spoilers," a name not to be found in the dynastic lists of the period. Also, six other gems with Pehlevi inscriptions, and three Gnostic gems.

Six Himyaritic inscriptions on stone obtained at Marib, in Southern Arabia, by Mikal Joseph; purchased from the British and Foreign Bible Society. Two inscriptions of the same kind, one from Taizz in Yemen, the other from Abyan, near Aden, both presented by Colonel Playfair.

An altar dedicated to Athor &c., with a Himyaritic inscription, found at Abyan near Aden, and a slab with a Hebrew inscription from Aden, both presented by Colonel Coghlan.

Early Christian.—The important collection of Christian Glass from the Catacombs at Rome, belonging formerly to the Count Matarozzi of Urbania, and engraved in Garrucci, *Vetri ornati di figure in oro.* It consists of 17 specimens, remarkable for their subjects, as well as their completeness and preservation. Among the subjects may be mentioned, Moses striking the Rock, Daniel and the Dragon, the seven-branched Candlestick, busts of Christ, figures of St. Peter and St. Paul, and other early Saints, portraits of various persons with their names inscribed, of which the most remarkable is dedicated to the Acherontine Hercules. This addition to the series of similar objects already in the Museum renders the National Collection second only to that of the Vatican in early Christian glass.

A leaden seal from the Catacombs of Syracuse, presented by George Dennis, Esq., H. M. Vice-Consul at Benghazi.

British and Mediæval.—The Foreign illustrations of this section have been increased by the three following important additions:—

(1.) A slab of stalagmite, in which are imbedded worked flints associated with Reindeer bones, worked and unworked, and other traces of contemporary human presence; excavated in a cave at Les Eyzies, Dordogne, France, and proving the existence of man in that district in a state of great barbarism, while herds of Reindeer must have been common. Presented by Henry Christy, Esq., and M. Edouard Lartet, of Paris.

(2.) A typical collection of Antiquities of the Stone Period, found in the Lakes of Switzerland, on the sites of dwellings built on piles; obtained by the Hon. Admiral Harris, H. M. Minister at Berne, and derived principally from the collections of MM. Löhle, Messikommer, and Uhlman. Also, a small series of Antiquities of the Bronze Period, from other lake dwellings in Switzerland; presented by Colonel Schwab, of Bienne, and by J. H. M. Weitbrecht, Esq.

(3.) Three iron celts and fragments of bronze ornaments and pottery, from the remarkable Celtic Cemetery at Hallstatt, in the Salzkammergut of Austria; presented by Bergmeister Ramsauer, of Hallstatt.

The British series has received the following additions:—Fragments of British pottery, found in a cave near Bury Head, Devon; presented by Farnham Maxwell Lyte, Esq.

A British urn, found near Abingdon; presented by W. H. Davies, Esq.

Two flint knives, found near Eyeworth Wood, Hants.; presented by Henry Drayson, Esq.

A series of bronze weapons, implements, and ornaments, 148 in number, partly found in the Thames, partly in Ireland; transferred from the Museum of Practical Geology.

Three bronze celts, presented by John Henderson, Esq.; and four bronze celts and a bronze knife of rare form, presented by Henry Christy, Esq.

Two fragments of gold from the treasure trove at Mountfield, near Lewes; presented by the Lords of the Treasury.

A remarkable

A remarkable bronze implement of late British work, found in the Thames.

A pair of stone querns, found on the Cheviot Hills; presented by Ralph Carr, Esq.

Two Roman altars found in pulling down the church at Bisley, Gloucestershire.

A marble head, apparently the portrait of a Roman imperial personage, found in London; presented by William Tite, Esq., M.P.

A small Samian Vase, found at Gloucester.

Roman *styli* of iron with ornaments in other metals, bone pins, and fragments of Samian ware, found on the site of the old Steel Yard, London.

Two Roman *fibulæ*, and a box of weights, from Yeovil, Somersetshire; presented by J. R. Wise, Esq.

A small collection of Antiquities, discovered in an Anglo-Saxon Cemetery, Long Witten ham, Berks, on a spot presumed to be the Wigbaldinctune of a charter of Alfred; presented by J. Y. Akerman, Esq.

A large iron bell of early type, found on the site of Offa's Palace, at Marden, in Herefordshire.

A bas-relief, in bronze, representing a bird seizing a fish, probably Anglo-Saxon, and found in the Thames.

Two urns and some iron implements, found in a Merovingian Cemetery, at Waban, near Montreuil, France; presented by John Evans, Esq.

A very remarkable Byzantine weight of bronze for one pound, with figures and letters inlaid in copper and silver; presented by J. F. W. de Salis, Esq.

A leathern sheath of the 14th century, perhaps for a jester's sword, found on the site of the old Steel Yard.

A Flemish tilting-shield of the 15th century, gilt and painted with figures; presented by the Rev. John Wilson, D.D., President of Trinity College, Oxon.

An enamelled badge with the Royal arms of England, and five other badges.

Twenty-six matrices of seals, of which the most important are those of the Penitentiary of the Knights Hospitalers, and that of a Welshman, Jorweth, son of Madoc ap Emilur.

An enamelled glass vase of French work, on which is represented the blowing of glass.

Two Flemish bricks of the 16th century, with subjects in relief; presented by John Evans, Esq.

A ring dial, presented by W. S. Cocking, Esq.; and two portable dials, presented by A. W. Franks, Esq.

A large cameo on shell of the 16th century, representing Hercules.

A silver badge, formerly worn by the Bargeman of the Admiralty Barge; presented by the Lords of the Admiralty.

A block from the tree known as "Herne's Oak," which formerly stood in the Home Park, Windsor; presented by Her Majesty the Queen.

Ethnographical.—Stone celt from Paramaribo, Surinam; presented by Duncan C. Munro, Esq., H. M. Consul at Surinam.

A flint dagger-blade of large size, obtained from a chief of the Spokan Indians, British Columbia; presented by the North-Western Boundary Commissioners, through J. K. Lord, Esq.

A collection of terra cotta figures from the coast of Ecuador; collected by William Bollaert, Esq.

A human head, shrunk artificially, being the head of some great chief slain in war, and thus preserved to be worn as a trophy. This object, which is of great rarity, is from Ecuador. Presented by George Fagan, Esq., H. M. Chargé d'Affaires and Consul General, Ecuador.

Two obsidian knives and an alabaster amulet, from the valley of Mexico; presented by Don Lino Ramirez.

Brass standard of the King of Oude, in the form of a hand, with numerous figures and inscriptions.

A glass bottle, on the inside of which is written, by some peculiar process, an ode of Hafiz; done at Mughir, in Mesopotamia, by a native, and presented by J. Christian, Esq., of Mughir.

Samuel Birch.

Department of Greek and Roman Antiquities.

I.—*Arrangement.*

One hundred and seventy-five statues, busts, reliefs, and fragments of sculpture from the Mausoleum, Cnidus, Cyrene, Carthage, and from the earlier collections, have been mounted on plinths.

A tessellated pavement from Carthage has been repaired. The sculptures in the Second Elgin, Phigalian and Græco-Roman Basement Rooms, have been cleaned, under the superintendence of Mr. Westmacott.

The wall cases in the first Vase Room and in the Bronze Room have been re-painted,

and the doors re-lined with velvet, for the better exclusion of dust; the objects contained in those cases have been cleaned.

The two sheds in which are at present deposited the remains of the Mausoleum and the sculptures from Cnidus, Branchidæ, Cyrene, and Carthage, have been lined with paper, and coloured inside.

Progress has been made in the arrangement of the bronzes, gold ornaments, and ivories.

Three hundred and twenty objects have been catalogued, and five hundred and forty-nine have been registered.

Descriptive titles have been affixed to five hundred and eighteen objects, and two hundred and twenty-five titles have been numbered.

Progress has been made in the printing of the second volume of the Vase Catalogue.

One hundred and eighteen vases, terra-cottas, and other objects, have been repaired.

II.—*Acquisitions.*

Antiquities from Camirus, in the Island of Rhodes.—During the past year a most interesting terra-cotta coffin has been obtained from the excavations carried on at Camirus by Messrs. Biliotti and Salzmann. This coffin is 6 feet 4 inches long and 2 feet 1 inch wide. Round the mouth, human heads, animals, and floral ornaments are painted in brown and crimson, on a pale ground. These ornaments are similar to those which occur on the archaic vases from Camirus, and are probably derived from Phœnician sources. It is believed that this curious specimen of fictile art is unique.

A Panathenaic Amphora, and a number of other interesting vases, have been obtained from the same site, together with some curious bronze amulets, and a few terra-cotta figures.

A colossal marble torso, discovered at Elæa, the Port of Pergamus, by Captain T. Spratt, R.N. This torso has formed part of a naked male figure, of which only the trunk, and part of the right upper arm, have been preserved. The original figure was probably about 12 feet high. From the action of the right arm, which is slightly advanced, it seems probable that a spear was held in the right hand. The torso is modelled in a bold effective style, and is an interesting specimen of colossal statuary. It is not unlikely that it was executed during the Macedonian period, by some sculptor of the school of Pergamus.

A hydria and a number of terra-cotta figures from the Cyrenaica, obtained from Mr. Chaffers. On the *Hydria* is a group of Europa and the bull, painted in red and white, on a black ground. Some of the terra-cotta figures represent Muses, and are finely composed.

A bronze balance weight, with a graduated scale, and an inscription stippled in late Greek characters.—This weight and scale are adjusted in the same manner as in a modern steelyard. Obtained through the Baron Texier from the Valley of the Mæander, in Asia Minor.

The following presents have been received during the year:—

A collection of Greek Vases, Terra-cottas, and other Antiquities discovered in tombs in Sicily, and presented to the British Museum by Earl Russell, Her Majesty's Secretary of State for Foreign Affairs.

This most interesting collection is the fruit of excavations made by Mr. George Dennis, in Sicily, in 1862–3, at the expense of Her Majesty's Government. Most of the objects obtained by him were discovered in Greek tombs at Centuripæ, Terra Nuova (the ancient Gela), and Agrigentum (now Girgenti). The vases are chiefly *lekythi*, with subjects painted in red on a black ground, or in black on a red ground. Some few have polychrome figures on a white ground.

The following are the most remarkable of these vases:—

A *lekythos*, 1 foot 6 inches in height, on which a group of two females is painted in several colours on a white ground. One of these figures stands in front of an Ionic column, holding in her right hand an *oinochoe* and in her left a *phiale*, which she offers to a seated female figure. This composition is remarkable for the severe simplicity of the drawing and colouring, and for the force and distinctness of the outlines. This *lekythos* is an unusually fine specimen of a very rare class of vases.

A *lekythos*, 1 foot $2\frac{2}{10}$ inches high, on which a seated female figure is painted in several colours on a white ground. This figure holds up a chaplet or fillet with both hands. Behind her is a *calathus* or basket for wool, above which hangs an *alabastron;* her *chiton* is painted a reddish brown colour, over which a black *peplos* is thrown. In the drawing of this figure the same pure and severe style may be recognized as in the figures on the *lekythos* already described. In the head dress, type of features, and general style of drawing, these figures resemble the heads on the earlier silver tetradrachms of Syracuse.

A *lekythos* 1 foot $3\frac{1}{2}$ inches high, with red figures on a black ground. The subject is a warrior receiving a libation from a female figure, probably on his departure for battle. The device on his shield is a Satyr dancing, and from it hangs a *laiseion* or fringe, on which an eye is painted.

A *krater,*

A *krater*, 1 foot 7½ inches high, painted with red figures on a black ground. On the obverse is a group of four figures, probably representing the return of a victorious warrior. On the reverse is a group of youthful Athletes. The drawing of this vase is somewhat late and careless. There are, besides, twenty *lekythi*, with red figures on a black ground. In all these we see the same simple and severe style of drawing as in the vases with polychrome figures on a white ground, which are probably of the same epoch. The subjects are generally single figures or groups of two. Demeter and Triptolemos, Apollo and Artemis, Victory, Eros, and Satyrs, are among the subjects represented.

The collection also contains a small, but instructive series of the earlier vases, with black figures on a red or on a white ground. There are also a few specimens of the Archaic period; in these, animals and flowers are painted in brown and crimson on a cream-coloured ground.

Terra-cottas.—A small collection of Archaic figures found in tombs at Gela.

Of these, the most remarkable are, a figure of Hermes Kriophoros, 7½ inches high, probably copied from the archaic statue by Calamis, which is represented on a bronze coin of Tanagra, and of which a repetition in marble is to be found in the Gallery at Wilton House.

The head and bust from a figure of a seated Goddess of archaic type. She is crowned with a *modius;* on her bosom are three rows of pendent ornaments. A kind of epaulette or a large clasp is attached to the front of each shoulder. This figure probably represents a Phœnician type, and resembles some of the small figures found at Dali (Idalium), in Cyprus.

A collection of terra-cotta figures from Centuripæ. These consist of a number of figures, groups, and heads, very spirited in design, but carelessly modelled, and evidently executed in the decline of Greek art. Aphrodite, Eros, and Victory, are among the types which most frequently recur in these terra-cottas. In some of them the nude portion of the figure is covered with a vitreous glaze, the remainder being unglazed.

Such an application of vitreous glaze in Greek terra-cotta figures is most rare, and was probably first introduced in a very late period of Greek art.

A cinerary urn of pale unglazed ware, and with a conical cover, surmounted by a pomegranate. The body is encircled with bands of mouldings in relief. This urn measures 2 feet 1½ inches in height. It is remarkable for its form. From Girgenti.

Three small marble figures bequeathed to the British Museum by the late Percy Clinton, Viscount Strangford. These figures were brought from Greece by Viscount Strangford, and are probably of the earliest period of Greek sculpture. They appear to be rude imitations of Egyptian statues. Two of them represent a naked female figure, probably that of Aphrodite. Similar figures have been found in several of the islands of the Archipelago. (*See* Ross, Archäologische Aufsätze I., p. 52, who thinks that such sigillaria may be the work of Carians, or some other præ-Hellenic race). Those presented by Lord Strangford range from 9 inches to 1 foot 7⅞ inches in height.

A small fragment of an Athenian inscription, presented to the British Museum by Cavalier Fiorelli, Director of the excavations at Pompeii.

Two fragments of ancient mural paintings, presented by Sir Mathew White Ridley, M.P.

Two Roman terra-cotta cones found near Geneva. Presented by J. H. M. Weitbrecht, Esq.

C. T. Newton.

Department of Coins and Medals.

I.—*Arrangement.*

323 slips have been written for the Catalogue of Greek Coins, from Velia in Lucania, to Locri Epizephyrii in Bruttii.

320 Greek coins have been registered, 234 incorporated, and 470, chiefly of the Dynasty of the Ptolemies in Egypt, have been re-arranged, with new and appropriate cards.

A very fine collection of Greek Coins, made by M. Ivanoff, late Russian Consul at Smyrna, has been carefully examined; and 44 very valuable specimens were purchased at his sale, for the National Collection.

1,168 Roman coins have been registered, 150 incorporated, and 456 re-arranged.

1,130 Mediæval and Modern coins have been registered, 1,391 incorporated, and 229 re-arranged.

772 Venetian coins, being a continuation of the large collection purchased in 1861 from M. De Rin, have been registered and incorporated in the General Collection.

237 English coins have been catalogued, 271 incorporated, and 1,982 English coins, of Edward III., Richard II., Henry IV., V., and VI., Richard III., and Henry VII., have been re-arranged, with new and appropriate cards, in two new cabinets.

300 Oriental coins, being those of petty princes in the south of India, have been carefully examined; and 197 specimens have been purchased for the National Collection, and prepared for registration.

443 Oriental coins of the Moghul Emperors of India, 340 of the Ommiade Dynasty, and 557 of the Abbasside Dynasty have been re-arranged, with new descriptive cards.

2,692 coins have been prepared for registration, 3,390 registered, 2,542 catalogued, 2,818 incorporated, and 7,027 type impressions of coins have been cleaned and mounted.

During the year several Collections of much interest have been brought to the Museum, and the coins required have been selected and purchased. Of these, the most important have been one of Greek coins, collected by Mr. Borrell, and another of Russian coins collected by Mr. Eastwood.

II.—*Acquisitions.*

The following table shows the number and classification of the coins and medals procured during the year 1863 :—

	Gold.	Silver.	Copper.	Total.
Greek - - - -	9	106	80	195
Roman - - - -	85	9	17	111
Mediæval and Modern -	70	254	189	513
Oriental - - - -	1	2	4	7
Total - - -	165	371	290	826

Of these acquisitions, the following have been received as presents:—

A token of Melbourne, Australia, from Charles Forlonge, Esq.

Two medals of the International Exhibition of 1862, from the Commissioners of the Exhibition.

A rare token struck at Bedford in 1659, from James Wyatt, Esq.

Three gold coins of Claudius and Nero; and one Venetian sequin, part of a hoard discovered in India, from Mrs. Majoribanks.

Two copper coins, struck in India by Mr. Bushby, as Lieutenant Governor of the North-West Provinces, from the Rev. Assheton Pownall.

A medal given by the Pope to General Lamoricière's brigade, from Algernon Lemprière, Esq.

A medal of Dr. and Mrs. J. E. Gray, from Dr. J. E. Gray.

A dollar current in the island of Formosa, from R. Swinhoe, Esq., Her Majesty's Consul, Formosa.

Seven modern coins, from the Earl of Enniskillen.

Eight modern coins, from Miss Bennett.

37 gold. 76 silver, and three copper coins, collected in different parts of South America, from the Hon. Robert Marsham.

28 silver, and 28 copper medals of various distinguished foreigners, from J. F. de Salis, Esq.

A medal of Henry Hallam, Esq., from Sir John Boileau, Bart., on the part of the Committee of the Hallam Testimonial Fund.

Two medals commemorating the thousandth year of the existence of the Russian Empire, from J. Deacon, Esq.

A very rare and curious silver coin of the Emperor Frederick II., A.D., 1152–1190, struck in imitation of the pennies of Henry II. of England, from Lieutenant Colonel Caldwell.

A gulden of Deventer, A.D., 1693, from R. Nunns, Esq.

The following coins may be specified as remarkable additions to the Cabinets of the Museum :—

In the Greek series: a rare didrachm of Thebes in Bœotia; a very rare tetradrachm of Messene; a fine tetradrachm of Chios; and very rare tetradrachms of Ialysus and Lindus, in Rhodes: all from the Ivanoff collection. Another very rare tetradrachm of Ialysus; and two copper coins of Tiryns, a place hitherto unrepresented in the Museum Cabinets; a fine didrachm of Ptolemy V., and a large number of coins of the Ptolemaic series, most of them in excellent preservation.

In the Roman Series: a rare aureus of Eugenius; a rare solidus of Libius Severus; a fine solidus of Constantine I.; and several tremisses of the time of Justinian I.

In the Mediæval and Modern Series: a rare sequin of Hugo Lubens de Verdalle, Grand Master of Malta, A.D., 1582–95. A large gold coin of Sigismund III., King of Poland.

A rare

A rare silver rouble of the Emperor of Russia, Peter II. A very rare silver rouble of the Emperor Peter III. Three large gold coins of the Empress Elizabeth. A 10-rouble piece in platina of the Emperor Nicholas; and 12 of the largest gold coins of different independent States of South America.

1,204 persons have visited the collections in the Medal Room during the past year.

W. S. W. Vaux.

Departments of Natural History.

Specimens added to the Natural History Departments during the year have been labelled or numbered, and entered into the registers, with note of the date and source of reception, locality, or stratum. The total number of these entries amounts to 102,474; that of the tallying numbers or labels is the same. But the number of specimens received exceeds the above, by reason of two or more of the same species and of similar character being registered and marked by a common number, and grouped on the same tray, in some instances, especially of the invertebrate Fossils, in the Department of Geology.

Of the 102,474 registered specimens of Natural History added in the year, space has been found, or made by re-adjustment and exclusion for storage of less rare or interesting examples, so as to allow of the exhibition of 5,368 specimens.

The number of specific names and references to synonyms, written for the Registers and Catalogues, amounts to 34,768.

The number of specimens described, with synonyms, and references to a greater or less number of characteristics or peculiarities, and printed in the Catalogues published during the year, amounts to 12,784.

Progress has been made in the following manual and skilled labour of the Departments, viz. cleaning the stuffed specimens; preparing with antiseptics, and stuffing skins; examining, airing, and drying prepared skins; cleaning and bleaching bones and antlers; articulating skeletons; unstiffening, developing, readjusting, and displaying parts of Insects and Crustaceans; suspending in bottles and displaying characteristic parts of specimens preserved in spirits; changing alcohol and adding alcohol to specimens in spirits; changing, restoring, and verifying labels; removing matrix from Fossils, and developing or exposing concealed parts of Fossils; moulding and casting Fossils; mounting Fossils on tablets; cutting and polishing Minerals, and slicing them for the microscope; adjusting them on stands or supports, to facilitate the study of Crystalline characters.

The stuffed and exhibited series of Mammalia are mostly in a state of preservation; some have suffered from the effects of over-crowding. The want of space precludes instructive arrangement of the class Mammalia. Those which stand on the floor, or are attached to the wall, show the detriment which is inevitable from such exposure. The unstuffed skins of the Mammalia are in a state fit for scientific examination and comparison, and many of them in a state fit for future preparation for exhibition.

The stuffed and exhibited series of Birds are in a state of preservation, and of instructive arrangement, but now are so crowded in some cases as to take from the facility of examining individual specimens.

The stored Bird-skins in boxes are in a good condition, but many of those kept in cupboards in the vaults show the deteriorating effects of the atmosphere of that locality.

The great bulk of the class *Insecta* is preserved in drawers, in a good state of preservation, and arrangement, affording facility of access for reference and comparison.

The same may be said of the dried Crustacea and Arachnida.

The collection of Osteology is in a state of preservation, but its availability for scientific use is extremely limited, through the conditions and locality of its present storage in the basement vaults.

The specimens of the classes *Mammalia*, *Reptilia*, and *Pisces*, preserved in spirits, have required a great expenditure of alcohol to maintain them in their present state of preservation, owing to the contiguity of the store vaults to the heating apparatus of the general Museum.

The classes and minor groups of the Invertebrate animals which require to be preserved in spirits are also stored in the basement vaults, and are so crowded on the shelves that access to specimens not on the front row is difficult, and attended with risk to the bottles and specimens.

The exhibited series of *Reptiles*, *Fishes*, Invertebrate Animals, Nests, and Nidamental structures, Horns, Antlers, and the British Natural History, are severally in a good state of preservation.

The specimens of Fossil remains, both exhibited and in store, are in a good state of preservation.

The exhibited specimens now begin to be in so crowded a state of arrangement as to affect in some cases the facility of access for scientific examination and comparison.

The specimens which are stored in drawers and in cases, in parts of the Museum not accessible to the public, admit, for the most part, of being well arranged for the purposes of scientific study.

The Collections of Mineralogy are in a good state of preservation. Many crystalline

specimens now impart additional scientific information by the inscription of the crystallographic indices on the planes. The collection of Meteorites, both iron and stony, has received valuable increase; its instructive relations have been augmented by polished sections of many Aerolites, and by the extended exhibition of the series systematically arranged in additional cases. This section of the series of Mineralogy can now be studied with the aid of the Catalogue printed last year, and forms an important element in advancing a knowledge of the nature and source of these mysterious bodies.

The whole of the Mineralogy shows improvement in arrangement and display.

The additions in the year acquired by the Department of Zoology amount to not fewer than 98,754 specimens. A great proportion of these are donations, including the Collections made in the African expeditions of Speke and Grant to the Nile sources, and of the Livingstones and Dr. Kirk in the Zambesi district. Also in the North American Boundary Expedition, by Mr. J. K. Lord, and in expeditions in the Mackenzie River District, by Mr. B. R. Ross.

The Museums now established in the chief cities of the Dependencies and Colonies of Great Britain become sources of numerous useful acquisitions, by the duplicates of specimens transmitted by their curators for determination at the British Museum. Hence, notwithstanding that specimens selected for purchase are of high value, inasmuch as the extent of previous acquisitions leads to ever-increasing reticence and care in selection, and to a limitation of recommendation of purchase to indubitable rarities, the progress of the additions to the Natural History is such as fully to verify the outlook on which the requirements of space have been estimated; as is exemplified in the sum total of additions above recorded, in a single department, during the past year.

On the return of Dr. Kirk and Mr. H. Livingstone to England, in October 1863, from the Zambesi Expedition, in which they served as Naturalists, they brought with them part of their collections. Earl Russell was pleased to direct that such of their specimens as might be deemed desirable should be placed at the disposal of the Trustees of the Museum, and the selections which have been made include both rare and nondescript species. Among the former may be noted the proboscidian Insectivore, with a dentition like that of a ruminant, called *Rhynchocyon Cirnii*. The species of this and of some allied genera, as *Petrodromus*, have been called from the singular prolongation of the snout "Elephant mice."

The deer forest of Alnwick still retains an ancient light-coloured breed of Stags (*Cervus Elaphus*), the paler of which are noticed in Mediæval romance and poetry as the "White Hart." His Grace the Duke of Northumberland, K.G., directed the best stag of the breed to be shot, and prepared, and most liberally presented the mounted specimen to the British Museum, where this variety had previously been a desideratum.

Several rare Mammals and Birds, from other sources, are specially noted in the Report from the Department of Zoology. Of the 3,973 additions belonging to the Vertebrate sub-class, 1,827 specimens are of the Hæmatocrya, or cold-blooded division.

The collections which Captains Speke and Grant were enabled to transmit from East Central Africa to the British Museum include a new Tortoise (*Kynixis Spekei*) and a nondescript ophidian (*Causus rostratus*, Gnth.) The representatives of two new genera of Ophidians, *Bothropthalmus* and *Xenurophis*, Gnth., have been procured from West Africa.

Dr. Krefft has transmitted from Australia two new genera of venomous serpents, *Tropidechis carinata* and *Cacophis Krefftii*.

In the collection of Reptiles and Fishes from the Pellew Islands, presented by G. L. King, Esq., R N., is a new species of *Boidæ* (*Enygrus superciliosus*, Guth.) A collection of Reptiles from North Ceram contains a new genus of Snakes (*Lielaphis*) and a new species of *Cyclodus* besides several very scarce forms, showing a connexion of the Indian and Australian Faunas in that island.

The number of additions to the class of Fishes, in the year, amounts to 1,156.

The series of British *Salmonidæ* has received valuable accessions from His Grace the Duke of Northumberland, K.G., Lord Powerscourt, the Rev. Augustus Morgan, and T. C. Eyton, Esq.

The collection of fresh-water Fishes of Hungary, made by an experienced Ichthyologist, M. Teitteles, includes a fine example of the Russian Pike-perch (*Lucioperca volgensis*), a fish heretofore only found in Russia, and a desideratum in the collection of the British Museum.

J. Y. Johnson, Esq., continuing his researches on the Natural History of Madeira, has discovered additional new forms of deep sea fishes; *e. g. Halosaurus*, *Diretimus*, the types of which are now in the British Museum.

Asia.—A small collection of fishes from the Lake of Galilee, the only one hitherto received from the Holy Land, has been presented by the late H. W. Beddome, Esq., M.A. This desideratum was noticed in the Annual Report for 1862.

The second portion of the important collection of Dr. P. van Bleeker has been obtained; it contains the typical specimens of the Siluroids and of the Reptiles described by him, a great number of them being unique specimens.

Captain Mitchell, Conservator of the Government Central Museum of Madras, has sent a large collection of the fishes of that Presidency, chiefly Siluroids and Cyprinoids. These specimens being duplicates in the Madras Museum, and numbered, he receives the names in return. Several beautiful specimens of *Ophiocephalus*, nearly three feet long, are in this collection,

collection, which is the more valuable as the fish Fauna of the Indian empire is still but scantily represented in the national collection.

The typical specimens of the Sumatran fishes described by Mungo Park have been discovered at a public sale, and were bought by the Trustees. Likewise the typical specimens of Bennett's "Fishes of Ceylon."

Africa.—A second collection of beautifully-preserved examples of fish from the White Nile has been received from Mr. Consul Petherick. It is distinguished by a number of undescribed genera and species, especially of the Siluroid family, descriptions of which will be found in the forthcoming fifth volume of the "Catalogue of Fishes."

Amongst the rarer fishes of West Africa may be noticed several new species of *Mormyrus* and *Synodontis;* a gigantic species of *Gymnarchus,* identical with, or very closely allied to, its congener, from the Upper Nile.

Mr. G. Krefft has transmitted from Australia representative specimens of the Siluroids, discovered by Sir Thomas Mitchell in his exploration of the interior of Australia.

America.—A very complete selection of the fishes of the West Indian Island of St. Croix has been obtained through a resident collector.

Dr. W. O. Ayres, of San Francisco, has presented a second collection of Marine fishes, illustrating the descriptions of the numerous species discovered by him.

The majority of the additions to the class of fishes are entire animals preserved in spirits, and are stored in the basement vaults, pending the acquisition of an Ichthyological gallery.

The specimens in a Museum of Natural History, which have been the subjects described by the masters of the science in its various departments, give great help to the working Naturalist. For, precise and instructive as a description may have been at the time when its subject was new, later acquisitions and advanced knowledge give significance to characters, the value of which could not be appreciated at the time of the original examination. Those who are occupied in the progress of Natural History are accordingly impelled to obtain access to the very specimens described, defined and named, by Linnæus, Cuvier, and their successors, for the purpose of testing the characters selected for the diagnosis, and of searching for features omitted in the first account of the specimen, and calculated to throw new light on its natural affinities.

The Department of Zoology has been peculiarly enriched with additions of this scientific value during the past year. The council of the Linnæan Society of London, and the council of the Entomological Society of London, sensible of the importance to the progress of Zoology of the location of classical collections in the National Museum, where easy access is provided for all students with peculiar facilities of observation and comparison, decided to transfer to the British Museum portions of their respective collections of the character above defined.

1. From the Linnæan Society have been received,—The collections of Shells and Insects made by Sir Joseph Banks, F. R. S. The Insects include the specimens defined and named by Fabricius, in the Banksian Museum, and are the types of the species which he added to the lists of Linnæus.

2. The series of Mammalia and Birds of Australia, including the exemplars of the species described by Temminck, Vigors and Horsfield, in the "Transactions of the Linnæan Society."

3. The series of Insects, including the exemplars of the species described by W. S. Macleay and Curtis in the same "Transactions."

4. From the "Entomological Society of London" have been received the specimens of *Coleoptera* and of *Hymenoptera* from the collection of the Rev. William Kirby. The former order includes the exemplars of his descriptions and definition (MSS.) of the Staphilinidæ: the specimens of the latter order are still more valuable as containing the originals of the descriptions and specific determinations published in Kirby's classical work "Monographia Apum Angliæ" (8° 1802).

In the noble donation by John Bowring, Esq., the Trustees have received the largest and most instructive accession to the Entomological Department ever presented by one individual.

The nature of this and of other noteworthy additions to the Invertebrate Zoology will be given in the report from that department.

The portion last purchased of the Häberlein collection of Fossils from the Lithographic Quarries of Pappenheim and Solenhofen, includes some of the rarest and most interesting evidences of the extinct animals which have been acquired in 1863: more especially in regard to the delicate class of Insects. By this purchase the whole of that famous collection is now incorporated in the Department of Geology. Other noteworthy accessions to the Geology and Mineralogy will be specified in the reports from those departments.

The total number of additional specimens to the Natural History, during the year 1863, is 102,474, of which 98,754 are registered in the department of Zoology, 3,053 in the department of Geology, and 667 in the department of Mineralogy.

Richard Owen.

Department of Zoology.

The various collections which are exhibited to the public, and those animals which are kept unstuffed for study, have been cleaned, and many families and large groups of animals have been re-arranged, to insert the specimens recently acquired, to replace those which have become deteriorated by exposure, and to keep the collection on a level with the progress of Zoological classification, and thus afford to students the means of studying the science in the most efficient manner. The labels that had become antiquated or destroyed by exposure have been restored or verified.

In the Entomological Collection, which is very much studied, many portions have been revised and re-arranged, to make it conformable with various works that have been written on the different families, and to remedy the crowded state of the drawers, arising from the addition of new specimens.

During the year 1863, 98,754 specimens of animals of different classes have been added to the several parts of the Zoological collection; namely,—

Vertebrate Animals - - - - - -	3,973
Molluscous and Radiated Animals - - - -	1,257
Annulose Animals - - - - - - -	93,524
Total - - -	98,754

A large proportion of these specimens has been presented; others have been selected from collections which have been offered, as those most interesting and desirable for the Museum, as illustrating the Zoology of a particular region of the earth's surface lately explored, or as tending to illustrate some improved scientific classification that had been lately published, or as interesting in some other scientific or economic relation, and many have been chosen because they are the identical types of specimens described by some zoologist of reputation.

Each of these 98,754 specimens added to the collection has been regularly marked with the date and number, and described in the manuscript Register of Accessions, with a notice of the locality where it was collected, and the manner in which it was acquired. These particulars give the history of each of the specimens for future use, and add greatly to their value.

A number of the specimens lately acquired, and a large portion of those that have been in the Museum for years, have been described by various zoologists and by the officers of the Museum, which renders them of more importance, as they become the typical specimens which future naturalists must consult when they want to see the authentic specimen from which the species has been described.

The following Catalogues have been published during the year 1863 :—

1. Catalogue of Mr. Hodgson's Collection. Second edition.
2. Catalogue of British Birds. By G. R. Gray, F.L.S.
3. Catalogue of Lepidoptera Heterocera. Parts 26, 27, 28. By Francis Walker, F.L.S

Several most important additions have been made to the collection.

Among the Mammalia may be specially mentioned the skin of the rare Monk, or Pied Seal, from the shores of the Mediterranean (*Monachus albiventer*). This animal was exhibited in London as the "Talking Fish." The examination of the specimen has proved that the Seal from Madeira, which was described as *Heliophoca Atlantica*, is only a young specimen of the Monk Seal, which is also found on the coast of Algiers.

The Right Hon. the Earl Russell presented collections to the Museum, including, amongst other interesting additions, the rare genera *Petrodomus* and *Rhynchocyon*, which were collected by Dr. Livingstone in Zambesi. These animals and the Seal are specially interesting, as supplying three out of only six or seven genera of Mammalia, hitherto wanting to the Museum Collection.

The Museum has also received—

A collection of Mammalia from Fort Halket; presented by Bernard R. Ross, Esq.

The Ribs of *Rhytina borealis*, from Behring's Straits, obtained from the Academy of Sciences at St. Petersburg.

Seven stuffed Llamas from Australia, that were exhibited at the Exhibition of 1862; presented by Edward Hamilton, Esq.

A collection of Mammalia from Formosa; collected by R. Swinhoe, Esq., H. M. Consul at Formosa.

A collection of Animals, containing several new species; collected by J. K. Lord, Esq., and presented by the North American Boundary Commission.

A series of Skins and Heads of larger Mammalia from Central Africa; collected by Capt. Speke.

Amongst the Birds may be mentioned—

A series of Birds and Eggs collected during the explorations of the Mackenzie River District; presented by Bernard R. Ross, Esq.

A series

A series of Birds collected in Peru and Ava; presented by W. J. Blandford, Esq.

A large collection of Birds, forming the types of the papers published in the Linnæan Society's Transactions; presented by the Council of the Linnæan Society.

An interesting series of Birds, collected during the Zambesi expedition by Dr. Kirk; presented by the Right Hon. the Earl Russell.

Series of Birds collected in South Africa; presented by Sir A. Smith.

Series of Birds collected in China and the Island of Formosa, by Mr. Swinhoe, containing fine specimens of the new species—*Euplocomus Swinhoei, Spizaëos semitorquis*, &c.

A series of Birds collected in Mexico by M. Sallé.

A series of Birds collected in South America and Africa.

A series of Birds collected in Western Africa, by M. Du Chaillu.

A series of Birds collected in the Island of Flores, containing the typical specimens of the new species described by Mr. Wallace.

A fine specimen of the *Balæniceps rex*, obtained on the White Nile, by Mr. Consul Petherick.

The following additions to the Reptiles are worthy to be recorded:—

Several collections of West African Reptiles, obtained by Mr. Dalton.

A large collection of skeletons, presented by Sir A. Smith.

A very complete collection of the Reptiles of North Ceram.

A small collection of typical specimens of species, described and presented by Professor Peters.

A small collection of Reptiles from the Feejee Islands, collected by Dr. Seemann.

A small collection of Saurians from Madagascar, collected by E. Newton, Esq.

A large collection of Australian Reptiles, formed by G. Krefft, Esq.

A small collection of West Indian Reptiles, presented by C. Taylor, Esq.

A very large specimen of *Testudo pardalis*; presented by —— Dunsterville, Esq.

The collection of Central African Reptiles, presented by Captain Speke.

The second part of the collection of Reptiles from British Columbia, presented by J. K. Lord, Esq.

A collection of Ophidians from the Pelew Islands, presented by G. L. King, Esq., R.N.

A collection af Ophidians from different localities, presented by the Royal College of Surgeons.

The typical specimens of the species of Reptiles, described by Dr. P. von Bleeker.

A collection of East African Reptiles, presented by the Rev. Charles Livingstone.

A collection of East African Reptiles, presented by Dr. Kirk.

Very large additions have been made to the collection of Fishes; the following are the more important:—

A small collection of Canadian *Salmonidæ*, presented by B. R. Ross, Esq.

Several collections of West African fresh-water Fishes, presented by M. Dalton.

The second part of the Fishes of the Upper Nile, obtained by Mr. Consul Petherick.

A complete series of the *Salmo Ferox*, presented by the Rev. Chancellor Augustus Morgan, of Macken.

A collection of Brazilian fresh-water Fishes, by Dr. O. Wucherer.

A collection of Fishes from Ceram.

A collection of Fishes from New Zealand, presented by G. Krefft, Esq.

A small collection of Prussian fresh-water Fishes, presented by Professor Peters.

A collection of Swedish Coregoni, by A. Lloyd, Esq.

A small collection of Fishes from the Feejee Islands.

A small collection of West Indian Fishes, presented by C. Taylor, Esq.

A small collection of Portuguese fresh-water Fishes, presented by M. B. de Bocage, Director of the Lisbon Museum.

A collection of Australian fresh-water Fishes, presented by G. Krefft, Esq.

A collection of Hungarian Fishes, by M. Teitteles.

An almost complete collection of the Fishes of St. Croix, West Indies.

The typical specimens of the species of Fishes discovered by T. Y. Johnson, Esq., in Madeira.

A collection of Madeiran Fishes, presented by the Rev. R. T. Lowe.

A large collection of Californian Fishes, illustrating the species discovered and described by Dr. W. O. Ayres, of San Francisco.

A collection of East African fresh-water Fishes, presented by the Rev. Charles Livingstone.

A collection of Australian Fishes, purchased of Mr. Dalton.

A small collection from the Lake of Galilee, presented by R. B. Beddome, Esq.

The typical specimens of the Sumatran species discovered by Mungo Park; and the typical specimens of Mr. Bennett's "Fishes of Ceylon," from the collection of the Linnæan Society.

A complete series of the typical specimens of Indian Siluroids, described by Dr. P. von Bleeker.

A large collection of Fishes from the Madras Presidency, presented by Captain Mitchell Conservator of the Government Central Museum, Madras.

A second collection of the Fishes of Port Natal, by Mr. F. H. Ayres.

A collection of the Fishes of the Lago Maggiore, presented by T. C. Eyton, Esq.

The collection of East African Fishes, presented by Dr. Kirk.

The Entomological Collection, which is the one most used by the students, has been very extensively enlarged.

Mr. John Bowring has presented his very extensive collection of Coleopterous Insects, containing upwards of 81,500 specimens, consisting not only of those which he has collected himself in China, Java, and India, but of those which he has purchased from Messrs. Wallace, Bates, and other English and continental collectors, to which have been added the collection of Geodephaga of Mr. Tatum; the collection of Rhynchophora or Curculionidæ, formed by M. Jeckel; and the collection of Cerambites or Longicorn Beetles, formed by M. Chevrolat.

The Linnæan Society has presented to the Museum the Banksian Collection of Insects, containing the type specimens described by Fabricius; and other typical collections of species described by Kirby, Curtis, and others, in the Transactions of that Society.

In the same manner the Entomological Society of London has presented the type specimens of the Bees, Apions, and other Insects, which have been described by Mr. Kirby; and a series of the insects described by other authors, and sent to that Society as the types from which the species were described.

A series of Insects from Ceylon, presented by F. Green, Esq.

A series of Coleoptera from North America, presented by W. F. Kirby, Esq.

A collection of Coleopterous and Hymenopterous Insects, presented by A. A. Haliday, Esq.

A series of specimens of British Coleoptera, presented by the Rev. W. Tylden.

Some Crustacea from Hastings, presented by Dr. Bowerbank.

A collection of Crustacea from North Lea, presented by Professor Malun.

A series of Crustacea from China, presented by R. M'Lachlan, Esq.

A large series of Mollusca and Radiata from Vancouver's Island and British Columbia, presented by J. K. Lord, Esq.

A series of British Annelides, collected at Polperro by Mr. Laughrin.

A series of British Annelides, presented by Mr. David Robertson.

Two fine specimens of *Voluta papillosa*, from Australia.

A series of Annelides from Corunna and Gibraltar Bay, collected by R. M'Andrew, Esq., F.R.S.

A series of Mollusca and Radiata from Australia, collected by Mr. Clifton.

Several Mollusca in spirits from Formosa, collected by Mr. Swinhoe.

Some Mollusca and Radiata from North China in spirits, received from Mr. Jamrack.

Some fresh-water Sponges from India, presented by H. Carter, Esq.

A series of Shells from Sweden, presented by Dr. Thudea.

John Edw. Gray.

Department of Geology.

The chief acquisitions of Fossils belonging to the Vertebrate classes are as follows:—

A series of 37 specimens of Mammalian remains from the Pleistocene formation near Erith.

A small series of Reptilian Remains, from the collection of Professor Bell, including the typical specimens of *Chelydra Murchisoni*, from the fresh-water limestone of Œningen, and the *Emys laevis*, and *Emys Comptoni*, from Sheppy.

Ten Fossil Fishes, from the Eocene of Monte Bolca.

Various Fish and Reptilian Remains (including a new species of *Labyrinthodon*), from the coal measures of Airdrie.

Casts of various Mammalian Remains, consisting of the *Elephas meridionalis*, *Mastodon arvernensis*, *Rhinoceros etruscus*, and other species, found in the Val d'Arno, and sent to the International Exhibition of 1863 by the Museum of Geology of Pisa.

Twenty Plaster Casts of specimens of Mammalian and Reptilian Remains existing in Continental Museums, the originals of which are figured and described in various works of Palæontology; including casts of several of the most celebrated specimens of Pterodactyles.

A series of Fish Remains, from the lower lias of Lyme Regis, the Devonian of Tynet Burn, and the coal measures of Burdie House.

Forty-four specimens, chiefly portions of the skeleton of a large species of *Pterodactylus*, from the Greensand of Cambridge.

An extensive series of Mammalian, Reptilian, and Fish Remains, from the collection of the late Mr. Saull, including the *Sacrum* of the *Iguanodon*, and some other specimen figured and described in Owen's British Fossil Reptiles.

One hundred and forty-one specimens of Fossil Fishes, and a specimen of a large *Pterodactyle* (*Rhamphorhynchus*), from the lithographic stone of Solenhofen.

A nearly perfect cranium of *Metopias diagnosticus*, from the Keuper Sandstone of Bavaria.

A fine specimen of *Ichthyosaurus tenuirostris*, and the anterior portion of the trunk of a very young *Ichthyosaurus communis*, from the lias of Lyme Regis.

The

The above were acquired by purchase. The Vertebrate series has likewise been augmented by many donations, of which the following may be particularized:—

Remains of *Hyopotamus*, and other mammalia, from the eocene formation of the Isle of Wight, presented by F. E. Edwards, Esq., F. G. S.

Some remains of *Dinornis*, together with vertebræ of *Plesiosaurus Australis*, Owen; from the Middle Island, New Zealand; presented by T. H. Hood, Esq.

A very fine specimen of *Aspidorhynchus ornatissimus*, from the lithographic stone of Solenhofen; presented by W. G. Neville, Esq., F. G. S.

Teeth of a small species of *Hippopotamus*, and of a new form of Seal (*Phoca rugosidens*, Owen), together with some other mammalian remains, from the Miocene of Malta, and the Island of Gozo; presented by A. Leith Adams, M. D.

Two groups of Fossil Eggs of a Reptile, from the great oolite, near Cirencester; presented by Joshua Brown, Esq.

Remains referred to four species of terrestrial Reptiles of the coal period, from Nova Scotia; presented by Dr. J. W. Dawson, F. G. S., of Montreal.

A very important addition to the Fossil remains appertaining to the Invertebrate classes, consists of the following specimens, from the lithographic limestone of Solenhofen:—

335 specimens of *Cephalopoda.*
427 Fossil Insects.
357 *Crustacea.*

These were procured by purchase from Dr. Häberlein, and form the remaining part of his extensive collection of Solenhofen Fossils, a portion of which was obtained last year.

The total number of specimens contained in this division of his collection is 1,528. This number, includes the Solenhofen Fish and Reptile remains already referred to in the former part of this report, and a series of Fossil Plants hereafter noticed.

Among other additions to the *Invertebrata*, the following are the most important:—

A series of *Brachiopoda*, and other *Testacea*, from the lower silurian of Meifod, Wales, and a selection of rare carboniferous shells, from Settle, in Yorkshire.

A collection of Corals, Ammonites, and Echinoderms from the gault and green-sand of Warminster. A large specimen of *Nautilus imperialis*, from the London-clay, and of *Cerithium giganteum*, from the Middle Eocene.

A large number of specimens (once forming a part of the "Sowerby Collection"), from the late Mr. Saull's Museum; of interest, as being a part of the types of "Sowerby's Mineral Conchology."

A series of Shells from the Tertiary of Antwerp.

Several Echinoderms and Mollusca, from the chalk of Kent. A selection of Fossils from the Museum of Prof. John Morris, F. G. S. (purchased through Dr. Krantz) has added a series of Tertiary Shells from Uddevalla, in Sweden, and a large collection of Oolitic Fossils, many of which are figured specimens, together with some rare Eocene Tertiary Crustacea, &c.

A series of Silurian and Carboniferous Shells from Tasmania; presented by Dr. Joseph Milligan, F. R. S.

Additional specimens of Crinoids, from Dudley, and of *Apiocrinites*, from Bradford, have been obtained, and 89 species of American Crinoids from the United States. The latter are figured and described in "Hall's Palæontology of Iowa."

Two remarkable Trilobites, from Bohemia, *Bronteus rhinoceros* and *Acidaspis monstrosa*.

Specimens of a Macrourous Crustacean (*Palæocarabus*) from the coal measures of Scotland; and of a new British Trilobite (*Paradoxides Davidii*, Salter) from Wales. Specimens of a species of *Calianassa* also new to Great Britain, from Colwell Bay, Isle of Wight, and Colin Glen, Belfast.

An entire example of *Eurypterus lanceolatus*, Salter (the first ever found), and of *Slimonia* (*pterygotus*) *acuminata*, Salter, from the Upper Ludlow Rock of Lesmahagow, Lanarkshire, have also been obtained.

The principal additions to the Fossil *Invertebrata* by donations are,—

A cast of *Illaenus Barriensis*, the "great Barr Trilobite," presented by Miss Jukes.

A new species of *Ceratiocaris* from the Devonian of Budley, Salterton, presented by R. H. Valpy, Esq., F. G. S.

Casts of 28 rare and figured Trilobites and *Arachnida*, together with casts of *Sphenosaurus* and *Halec Sternbergii*, presented by Dr. Anton Fritsch, of the Prague Museum.

The collection of fossil plants has been augmented by the following:—

A collection of new and beautiful Coal Plants, from Tasmania, presented by Dr. Joseph Milligan, F. R. S., Tasmania.

Several specimens of recently described Ferns, from the Oolite Shale of Scarborough; presented by J. Leckenby, Esq., F. G. S.

A series of examples of *Solenites Murrayana*, presented by Dr. P. Murray.

Specimens of Dicotyledonous leaves from the Miocene Tertiary of Discoe, North Greenland, presented by J. W. Tayler, Esq., F. G. S.

Among the specimens obtained by purchase, the following are most worthy of note:—

Two hundred and sixty-seven Fossil Plants from the lithographic stone of Solenhofen, from the Häberlein collection.

A collection of Tertiary Plant remains, from the pipe-clay and fresh-water marls of Alum Bay and Hempstead, in the Isle of Wight.

Several choice coal plants from Dalkeith.

A large slab covered with the branching fronds of *Alethopteris lonchitidis*, from Newcastle, and a fine example of *Pecopteris Pluckenetii*, from Staffordshire.

During the past year three thousand and fifty-three specimens have been submitted to examination, labelled, and entered in the Inventory, viz.:—

Plants	183
Foraminifera	50
Radiata	315
Testacea	840
Crustacea	660
Insects	15
Vertebrata	990
	3,053

Many of the larger specimens have been mounted in frames, and those that have required it have been in the hands of the mason to be developed by the chisel, so as to display parts previously hidden in the stony matrix. The smaller objects have been mounted on tablets.

Of the fossil plants above enumerated, nearly the whole have been exhibited in the Cases of Room I., in addition to which many plants of large size have been added to the series exhibited on the tops of the cases in the same room, the whole of which series has been cleaned and re-arranged.

The Foraminifera obtained during the year, together with others previously in the Museum, have been collected together, and displayed in a table case in Room V.

Nearly the whole of the Radiata are arranged in the New Room.

The insects have been incorporated in the general collection in Room V.

Of the very extensive additions made to the Crustaceans, about two-thirds of the specimens have been arranged in the cases; but of these a small portion only are exhibited, the remainder being placed in the cases of the New Room, which is not yet open to the public, though accessible to the student.

Through want of space, it has been impossible to incorporate more than half the recently acquired species of Testacea in the general collection, and this has only been accomplished, in many instances, by the removal of less interesting specimens.

The whole of the additions to the Vertebrate series obtained during the year, have been numbered and catalogued, together with nearly 400 specimens previously acquired. Some of the more striking specimens have, by a partial re-arrangement of the collection, found places in the gallery, but the greater portion is necessarily arranged in drawers.

Geo. R. Waterhouse.

Department of Mineralogy.

The Mineral Department has received valuable additions during the year 1863. They amount in number to 667 specimens. From the absence of the means of performing chemical analysis, the employment of scientific method in the description and arrangement of the Collection is still confined to the use of the goniometer and the polarising microscope. This crystallographic study of the Collection has made valuable progress, and a large number of specimens belonging to the more important species have now had the crystallographic indices inscribed upon their planes, or otherwise visibly indicated.

A new vertical case has been given to the Aerolites (or Stony Meteorites). A great number of these bodies have been cut and polished, to exhibit their structure, and are now arranged in the new case. A similar case will contain the iron Meteorites. Two half-table cases, in Room II., have been filled with a very illustrative series of pseudo-morphous Minerals, that has been for some time in the course of formation.

Some slight changes have been introduced in the arrangement, in accordance with the progress of science, while the incorporation of new acquisitions and the shifting and more fully labelling of old ones, have been regularly performed. A new Catalogue of the Aerolite Collection has been published, and an alphabetical list of all the Mineral species, with their synonyms, and the names of their varieties, with references to the cases that contain them, has been printed. Among the important additions to the Collection have been the following:—

Presentations.—A very interesting Siderolite (or iron Meteorite, containing stony matter) has been presented by Taylour Thompson, Esq., Her Majesty's Chargé d'Affaires and Consul

Consul General to the Republic of Chili. It was found in the Sierra de Chaco, and given to Mr. Thompson by Professor Ign. Domeyko, of Chili. Another portion of the same Meteorite has been described by Professor Gustav Rose, of Berlin. A small piece of Meteoric Iron, found on the Desert of Atacama, and quite distinct from the previously known Siderolites from that district, has been sent to the Museum by Lewis Joel, Esq., Her Majesty's Vice Consul at Cobija. A specimen of another Iron Meteorite has been contributed to the National Collection by the instrumentality of W. C. Booker, Esq., Her Majesty's Consul at San Francisco, California. It was presented, through that gentleman, by the Board of Supervisors of the city of Francisco, at the instance of Professor Whitney, State assayer. The mass from which it was separated was one of several that are known to exist in the neighbourhood of Tuczon, in the territory of Arizona.

Dr. Oldham, Director of the Geological Survey of India, has presented a small fragment, unique, as being the only specimen that has been preserved, of an Aerolite which fell at Kusiali, in Kumaon, India, on the 16th of June 1860. Another Aerolite, also unique, has been added to the Collection by Thomas Maclear, Esq., Astronomer Royal at the Cape of Good Hope, to whom the Museum has been before indebted for specimens of the Bokkeveldt Aerolite. The stone recently presented by Mr. Maclear fell at Kaee, in Oude, on the 29th January 1838.

The following Minerals have also been presented:—Fine Crystals of Pyrrhotine, from the Val d'Ossola, by E. Francfort, Esq.

Galena and Marcasite, in singular forms, from Mineral Point, Winconsin, by E. H. Beecher, Esq. Specimens of Chalcedonic Minerals from Uruguay, by W. G. Lettsom, Esq., Her Majesty's Minister and Consul General to the Republic of Uruguay.

Copper Ores, by L. Joel, Esq., Her Majesty's Vice Consul, Cobija; and some Cornish Minerals, including good specimens of Wolframine, and a massive and highly phosphorescent variety of Fluor, by John Garby, Esq., of Redruth.

Among the more important acquisitions by purchase may be recorded—

An enormous block of fine translucent green Jade, from Irkutsk, Siberia, purchased of M. Alibert, to whom the Museum is indebted for specimens of native Gold, Beryl, Graphite, and other Siberian Minerals presented by him.

Native Copper in fine Crystals, Cornwall.

Crystals of native gold from Victoria and from Transylvania.

Porpezite, from Brazil.

Tellurium, from Hungary.

Fahlore, from Kaprick.

Zinkenite, from Wolfberg.

Fluor Spar in magnificent crystals, finely modified on the angles from Menheniot mine, Cornwall; and also in large and fine crystals from Durham.

Braunite and Romeine in very fine little crystals, from Piedmont.

Apophyllite, from Faroe Islands.

Specimens of Matlockite and of Phosgenite, Derbyshire.

Of the rare variety of Petalite, termed Castor, two specimens have been acquired, one being a very good crystal, almost unique.

Tschewkinite, from the Ural (a portion of the original specimen).

Bleinierite, Nertschinsk (ditto, ditto, analysed by Hermann).

Caledonite, from Leadhills.

Liroconite and Copper Mica, from Cornwall.

Rhodicite on Rubellite, from Siberia.

Autunnite, from France.

Much scientific speculation has recently been devoted to the subject of Meteorites, and it has for some years past been deemed desirable to devote considerable efforts to the collection of as complete a series of these singular extra-mundane bodies as possible.

Towards this end Her Majesty's Secretaries of State for Foreign and for Colonial Affairs, as well as for India, have been pleased to afford assistance, and the results that have already accrued from the co-operation of intelligent Englishmen in all parts of the world, thus secured, have been very valuable.

By presentations to the Trustees, by exchanges for duplicate specimens obtained in the cutting and polishing those before in the collection, and by direct purchase, the collection of Meteorites now in the British Museum is by far the most perfect in the number of localities, and the most valuable, from the size and weight of its specimens, that exists in the world. The catalogue published on August 1, contained 216 distinct Meteorites, of which 139 were seen to fall; and the numbers have since increased to 220.

Of the Aerolites (stony Meteorites) a large proportion has been examined, in section, by the Microscope, and they are now being grouped in accordance with the results that this means of investigating their structure has afforded.

Nevil Story Maskelyne.

Botanical Department.

The principal business of the department during the year 1863 has consisted—

In the naming, arranging, and laying into the General Herbarium of various collections of Plants from the Sandwich Islands and from the Islands of the South Pacific; of Pavon's Collections of Mexican and Spanish Plants; of Professor Pallas's Herbarium of European and Siberian Plants; of the Collection of Nepaul Plants of Dr. Hamilton Buchanan; of a further portion of Mr. Thwaites's Plants of Ceylon; of Mr. Forbes's Plants of Madagascar and Mozambique; of Martin's and Schomburgk's Guiana Plants; of Dr. Gillies's Collection of Chilian *Compositæ;* of an extensive Collection of Plants of Southern Africa from various collectors; and of numerous specimens of *Hepaticæ* from the Cape of Good Hope, and from other quarters.

In the re-arrangement of various families of Plants, including *Coniferæ*, the genus *Quercus*, *Characeæ*, and portions of the General Cryptogamic Collection, as well as of several portions of the collection of Fruits and Seeds, especially those of the family of Palms.

In the examination of the various collections recently received, and their partial arrangement, with a view to their incorporation in the Herbarium.

In the arrangement of large specimens of Australian woods, and of some of the larger and more remarkable fruits, in the Exhibition cases of the public rooms.

In the re-arrangement of various portions of the British Herbarium, especially the Mosses, Hepaticæ, Algæ, and Fungi, with the addition of numerous specimens from the Herbarium of Mr. Lyle, and from other collections.

And in the continued examination of the Sloanean Herbarium, especially in reference to British Plants.

Mr. Bennett has to acknowledge the great kindness of Mrs. Gray, in undertaking and completing the re-arrangement, with large additions, of the British Collection of *Algæ;* and the unremitting attention bestowed by the Rev. W. W. Newbould, on the British collection generally, and on the British Plants of the Sloanean Herbarium in particular.

The following are the principal additions which have been made to the department during the same period, by purchase or donation:—

500 species of British Plants from various collectors.

126 species of rare or critical British Plants, presented by A. G. More, Esq.

67 species of British *Algæ*, including two fine specimens of Codium Bursa, L., collected by Miss Poore and Miss Scott.

32 species and varieties of the genus *Mentha*; from the Herbarium of Dr. Wirtgen.

103 species of Cichoraceæ, prepared by Dr. Schultz, of Deuxponts.

2,300 species of German Plants, forming part of the "Flora Germaniæ Exsiccata" of Professor Reichenbach.

1580 species of Plants of the Tyrol, from the Ferdinandeum at Innsbruck.

387 species of *Hepaticæ* and *Mosses*, collected in and near the Pass of the Simplon, presented by Professor Gagliardi.

105 species of *Hepaticæ* and *Lichens*, forming part of Rabenhorst's, "Hepaticæ," and "Lichenes Europæi."

129 species of Plants of Ceylon, collected by Mr. Thwaites.

690 species of Plants of Southern and Tropical Australia, collected by Dr. Ferd. Müller.

89 species of Plants of Lizard Island, collected by Mr. M'Gillivray.

457 species of Plants of Tasmania, collected and presented by Dr. Milligan.

128 species of Algæ of Tasmania, from the Rev. P. Parry Fogg.

190 species of Plants of Sierra Leone, from various collectors.

162 species of Plants from the River Zambesi, collected by the Rev. J. Stewart.

1,365 species of Plants of the Cape of Good Hope, from various collectors.

27 species of Algæ, collected at Algoa Bay.

87 species of Plants of Madagascar, collected by M. Helsinberg.

340 species of Cryptogamous Plants of South Carolina, collected by Mr. Ravenal.

218 species of plants of Panamà, collected by Mr. Sutton Hayes.

80 species of plants of Jamaica, presented by the representatives of Henry Osborne, Esq.

18 species of Plants of Peru, from the mountains of the province of Iquiquè, collected by Mr. Bollaert.

250 species of *Compositæ* from Chili, collected by Dr. Gillies.

100 Microscopic Slides of species of Diatomacæ, prepared by Mr. Baker.

The British Herbarium of Dr. Pulteney.

The Herbarium of Plants of South Carolina, formed by Mr. Walter, author of the "Flora of South Carolina."

450 species of fruits and seeds from Panamà, collected by Mr. Sutton Hayes.

Fine transverse sections of the trunks of the White Oak (*Quercus alba*, L.) and of the Black Walnut (*Juglans nigra*, L.), presented by the Commissioners for Canada to the International Exhibition.

Numerous Palm-seeds and fruits, collected in Camboja, Ceylon, Labuan, and Mauritius.

John J. Bennett.

Department of Prints and Drawings.

The following has been the progress in the department in the year 1863.

The engravings of Agostino Veneziano and of Marco da Ravenna have been arranged in three volumes, and the references to the "Peintre Graveur," of Bartsch, attached to each. Catalogues have also been compiled, and fair copies made.

Five volumes of the etchings of Thomas Hills have been arranged.

Thirteen hundred and seventy-three engravings from the designs and pictures of the Flemish painters have been arranged preparatory to their being mounted and bound in volumes.

One thousand and twenty-one portraits of the English series have been placed in periods and classes, and the whole of them marked off in the catalogues of Granger and Bromley.

Upwards of one thousand portraits of the English series of persons living during the present century have been placed alphabetically, prior to being arranged in classes.

Three hundred and sixty-eight drawings have been mounted; 242 of which are placed on sunk mounts in order to secure the surface from injury.

Five thousand six hundred and ninety-seven articles have been entered in the register of purchases and presentations. Six thousand one hundred and ninety-seven articles have had the register stamp affixed to them, which number includes 500 of those registered, but not stamped, in 1862. Two thousand five hundred and thirty-eight engravings, inserted as illustrations in books, have also had the register stamp affixed to them.

A new and much enlarged alphabetical Index has been compiled, containing the names of all the artists by or after whom there are specimens in the several collections.

Two thousand three hundred and ninety-two slips have been written for the new general catalogue of prints in the collection.

The following are some of the more important acquisitions made during the past year:—

Italian School:—

Drawings.—Specimens by Parmigianino, Rosso, and Zuccherelli.

Engravings.—A most interesting undescribed portrait of Lodovico Gonzaga, Marquis of Mantua, and of his wife Barbara, daughter of John Elector of Brandenburg. The style of execution approximates very closely to that of Andrea Montegna, and may possibly be by him, the Marquis having been his patron.

Specimens by Benedetta Montagna, Giovanni da Brescia, Marcantonio, Agostino Veneziano, Caraglio, the Ghisis, Martin Rota, and Nelli.

Fine proofs of the modern engravers, Gandolfi, Anderloni, Longhi, Perfetti, Fiorini, and Bisi.

German School:—

Drawings.—By Holbein, G. Pencz, and Hollar.

Engravings.—By Altdorfer, Aldegrever, Binck, Lautensach, M. Lorch, Boxbingen, and Zunt.

Etchings.—By Hollar, Ridinger, Dietrich, J. H. Ramberg, G. Bodmer, L. E. Grimm, C. F. Heinzemann, Meyerheim, Wegner, and Valerio. A fine and nearly complete set of works of Daniel Chodowiecki, in various states, many of them proofs, amounting in number to 2,473.

Dutch and Flemish Schools:—

Drawings.—A Portrait of Prince Rupert, life size, in black chalk, by Wallerent Vaillant, to whom the Prince made known the art of engraving in mezzotint. Also, specimens by Peter Coeck, Francis Floris, H. Goltzius., Vander Meulen, W. Vande Velde, jun., and L. Overbeck.

Etchings.—By F. Hogenberg, Waterloo, Stoop, and P. Nolpé.

Engravings.—By A. and J. Wierx, C. Passe, R. Sadler, C. Collaert, J. Matham, C. Visscher, Suyderhoef, Blooteling, and Van Dalen.

French School:—

Engravings.—By Duvet, Woeiriot, E. de Laulne, Edelinck, Drevet, Chereau, Mandel, and Forster.

Etchings.—By Paul Huet, L. Marvy, and Calame.

Lithographs.—By H. Vernet, Bellangé, Roqueplan, Gericault, Roffet, and De la Croix.

English School:—

Drawings.—A characteristic Portrait of William Woollett, drawn by himself in red chalk at the age of 22. Other specimens by Alexander, Blake, L. Cradock, Edridge, Francia, Fuseli, Gillray, Girtin, Hearne, Hilton, Hoppner, Kent, Laporte, Mortimer, and Rowlandson.

Etchings.—By Alexander, J. A. Atkinson, Barrett, Barry, Cosway, Fuseli, Gilpin, Gillray, Ibbetson, J. T. Smith, Brandard, C. Coleman, G. Cruikshank, Gale, Girling, Millais, Oakes, D. Roberts, Whistler, &c.

Engravings.—Fine proofs after Turner and Wilkie.

Very extensive additions have been made to the series of English Portraits.

W. Hookham Carpenter.

Note.—The work of copying and lithographing the Cuneiform Inscriptions of Assyria has been continued during the past year. The result up to the 20th March 1864 is reported to be as follows:—

Twenty-five sheets of the miscellaneous tablets have been copied on stone, in addition to the forty-nine mentioned in last year's report. Thirty-three sheets have been corrected and printed.

Fourteen additional sheets have been copied.

British Museum,
18 April 1864.

A. Panizzi,
Principal Librarian.

BRITISH MUSEUM.

AN ACCOUNT of the INCOME and EXPENDITURE of the BRITISH MUSEUM, for the Financial Year ended 31st March 1864; of the ESTIMATED CHARGES and EXPENSES for the Year ending 31st March 1865, and Sum necessary to Discharge the same; Number of Persons admitted, and Progress of Arrangement; &c.

APPENDIX.

REPORT of the COMMISSIONERS of AUDIT.

(No. 217.)

Audit Office, Somerset House, London, W. C.,
24 June 1864.

My Lords,

WITH reference to Mr. Hamilton's letter of the 12th May last, transmitting to us for examination the following Accounts relating to the Civil Contingencies Fund for the Year ended the 31st March 1864, viz.:—

I. "An Account of the Receipts and Payments, in the Year ended 31st March 1864, connected with the Fund of 120,000 *l.*, established from 1st April 1862;"

II. "An Account showing the Distribution of the Capital of the New Fund, at the commencement and at the close of the Year ended 31st March 1864;"

III. "An Account showing the Total Outstanding Balances on the Old Account of the Vote for Civil Contingencies on 31st March 1863, and the Disposal of those Balances up to 31st March 1864;"

We have the honour to report that the Accounts in question have been examined in this Office, and that the same have been found correct.

The Accounts are herewith returned.

We have, &c.

(signed) *Edward Romilly.*
Henry Arbuthnot.

The Lords Commissioners of
Her Majesty's Treasury,
&c. &c. &c.

CIVIL CONTINGENCIES FUND.

1863–4.

ACCOUNTS showing, 1. The RECEIPTS and PAYMENTS in connexion with the FUND in the Year ended 31st March 1864; 2. The DISTRIBUTION of the CAPITAL of the FUND at the Commencement and Close of the Year; and, 3. The Total Outstanding BALANCES on the Old Account of the Vote for CIVIL CONTINGENCIES on 31st March 1863, and the Disposal of those Balances up to 31st March 1864; &c.

(*Presented to Parliament by Her Majesty's Command.*)

Ordered, by The House of Commons, *to be Printed,*
5 *July* 1864.

CIVIL LIST PENSIONS.

A LIST of all PENSIONS granted between the 20th day of June 1863 and the 20th day of June 1864, and charged upon the CIVIL LIST:—(pursuant to Act 1 Vict. c. 2.)

DATE OF GRANT.	NAME.	AMOUNT OF PENSION.
		£. s. d.
	MRS. LETITIA MARY AUSTIN - - - - - - - - - - - -	60 – –
	In consideration of the services of her late husband, a civil engineer, who died whilst engaged in the employment of the Government, and who had devoted himself to the sanitary improvement of poor dwellings.	
	MR. WILLIAM ALLINGHAM - - - - - - - - - - - -	60 – –
	In consideration of the literary merit of his poetical works.	
	MISS ELIZA COOK - - - - - - - - - - - - - -	100 – –
	In consideration of her literary labours, both in poetry and prose, and her failing health.	
	THE REV. CHARLES B. GIBSON - - - - - - - - - - -	100 – –
	As author of many literary works, and in consideration of the high testimony borne as to their value.	
1864: June - -	DAME JULIA INGLIS - - - - - - - - - - - - - -	500 – –
	As an acknowledgment of the brilliant services of the late Sir J. Inglis during the Indian Mutiny, especially the gallant defence of Lucknow—services to which may partly be attributed his early death.	
	MRS. EMMA ELPHINSTONE SHERIDAN KNOWLES - - - - - - - -	100 – –
	In consideration of the talents of her late husband, Mr. James Sheridan Knowles, as a dramatic author.	
	MRS. EMMA LEAF - - - - - - - - - - - - - - -	50 – –
	As the widow of Mr. J. Leaf, who, though of humble origin, was a contributor of articles of great merit to various journals.	
	MR. KENNY MEADOWS - - - - - - - - - - - - - -	80 – –
	In acknowledgment of his merit as an artist; more especially shown by his illustrations of Shakespeare.	
	MISS DINAH MULOCK - - - - - - - - - - - - - -	60 – –
	Authoress of "John Halifax, Gentleman," and other well known works of fiction.	
	TOTAL - - - £.	1,110 – –

Whitehall, Treasury Chambers,
18 July 1864.

F. PEEL.

CIVIL LIST PENSIONS.

A LIST of all PENSIONS granted between the 20th day of June 1863 and the 20th day of June 1864, and charged upon the CIVIL LIST.

(*Presented pursuant to Act* 1 *Vict. c.* 2.)

Ordered, by The House of Commons, *to be Printed*, 20 *July* 1864.

COINAGE.

RETURN to an Order of the Honourable The House of Commons, dated 12 July 1864;—*for*,

Dated at the Office of the General Valuation of Ireland, Dublin, 8 April 1864.

Richard Griffith, Commissioner of Valuation.

RETURN of the Number of HORSES not kept for the purposes of Agriculture, Trade, Business or Professions in *Ireland*.

Number of Horses according to the Agricultural Statistics Returns for the year 1863 - - - - - - - - - - - - -	30,149

Horses under TWO years of age not included.

Note.—The foregoing return includes all horses enumerated as kept for "amusement or recreation." The number, no doubt, includes many horses used by professional men for professional purposes, but which I have not the means of distinguishing satisfactorily. The return also includes young horses between two and four years old, many of which were necessarily only in training, but which, on account of their breeding or promising appearance, were returned to the enumerators by the owners (many of whom were farmers and dealers in horses) as intended for "amusement or recreation" when trained and fit for sale.

William Donnelly,
Registrar General.

Agricultural and Emigration Statistics' Office,
5, Henrietta Street, Dublin,
31 March 1864.

DWELLING HOUSES AND HORSES (IRELAND).

RETURN of the Number of DWELLING HOUSES in *Ireland* valued in the GOVERNMENT VALUATION at the Annual Value of £.20 and upwards; and, of the Number of HORSES not kept for the purposes of Agriculture, Trade, Business, or Professions in *Ireland*.

(*Sir Frederick Heygate.*)

Ordered, by The House of Commons, *to be Printed*, 15 *April* 1864.

EMBASSIES, &c.

RETURN to an Address of the Honourable The House of Commons, dated 1 June 1864;—*for*,

"RETURNS for the Year ending the 31st day of March 1863, of the Total Cost of each of HER MAJESTY'S EMBASSIES, MISSIONS, and POLITICAL AGENCIES in FOREIGN COUNTRIES:"

"Showing for each EMBASSY, MISSION, and POLITICAL AGENCY the Number of OFFICIAL PERSONS, Paid and Unpaid, of which it consists; their Official Ranks and Titles; the Amount of Salary, if any, and of other Allowance, if any, payable to each such Person, and the Amount of Salary or Allowance provided at the Public Expense for any Chaplain, Interpreter, Officer or Servant:"

"Showing further for each such EMBASSY, MISSION, and POLITICAL AGENCY, the Cost of Purchasing, Erecting, Hiring, Repairing, or Furnishing any House or Houses, Chapel, or other Building; the Cost of Outfit and Conveyance of Members thereof; the Amount of Office Expenses; and the Amount of all other Charges and Payments defrayed at the Public Expense:"

"And, stating the Total Cost of any SPECIAL MISSION or COMMISSION sent to the Government or Country to which any such EMBASSY, MISSION, or POLITICAL AGENCY is Accredited; distinguishing in every case whether the above Salaries, Allowances, Costs, and Expenses, or any and what Portion thereof, are payable out of the Consolidated Fund, or are borne upon the Estimates; and if the latter, stating the Class, the Number, and the Designation of the Vote in which they are to be found."

(*Mr. Dodson.*)

Ordered, by The House of Commons, *to be Printed*,
19 *May* 1864.

Return No. 1.

Showing, for each Embassy, Mission, and Political Agency, the Number of Official Persons, Paid and Unpaid, of which it consists; their Official Ranks and Titles; the Amount of Salary, if any, and of other Allowance, if any, payable to each such Person; and the Amount of Salary or Allowance provided at the Public Expense for any Chaplain, Interpreter, Officer, or Servant (for the year ending 31st March 1863).

RETURNS for the Year ending 31 March 1863, of the Total Cost of each of Her Majesty's Embassies, Missions, and Political Agencies in Foreign Countries; showing for each Embassy, Mission, and Political Agency, the Number of Official Persons, paid and unpaid, of which it consists; their Official Ranks and Titles; the Amount of Salary and other Allowance payable to each such Person; &c.

(*Mr. Dodson.*)

Ordered, by The House of Commons, *to be Printed,*
19 *May* 1864.

Under 1 *oz.*

RETURN to an Order of the Honourable The House of Commons, dated 23 June 1864;—*for*,

COPY "of a LETTER from the Right Honourable *Frederick Peel*, to the Chairman of the Metropolitan Board of Works, relating to the CROWN FORESTAL RIGHTS over EPPING FOREST."

Sir, Treasury Chambers, 14 June 1864.

I AM directed by the Lords Commissioners of Her Majesty's Treasury to acquaint you, that My Lords have had under their consideration the subject of the maintenance of the Crown's rights over the Forest of Waltham, called Epping, in consequence of proceedings in Parliament during the Session of 1863.

By a Resolution of The House of Commons on the 3d March 1863, a Select Committee was ordered to be appointed, to "Inquire into the Condition and Management of the Royal Forests in Essex, and into any Inclosures which may have taken place therein since the Report of the Commissioners of 1850; and to consider whether it may be expedient to take any steps for preserving the open spaces in the said Forest."

The Committee appointed in pursuance of this Resolution, after explaining the nature and extent of the Crown's rights over the Forest of Epping, reported, that in 1855 proceedings were taken for the sale of these forestal rights, which had led to the disposal thereof, over 3,513 acres, and that a nearly similar quantity remained for disposal, a considerable portion of which was being treated for by the owners of the soil; but that in consequence of a recent Resolution of The House of Commons passed on 13th February 1863, these further sales remained in abeyance.

The Committee further reported, that a considerable extent of ground had been inclosed, without any consideration being paid for the forestal right of the Crown, and recommended that immediate steps be taken by the Crown to assert its right, and to abate such Inclosures.

The recommendations of the Committee are comprised in the following paragraphs of their Report, viz.:—

"Two courses presented themselves to the Committee as applicable to the remaining portion of Waltham Forest; one is to discontinue the sale of the forestal rights of the Crown, vigilantly to maintain these rights without regard to the question of cost, for the purpose of preventing all future inclosures, and to preserve the Forest in its present extent and wild uninclosed condition. The other course is: to obtain the sanction of Parliament for the inclosure of the remaining portion of the Forest, to ascertain the rights of the several parties interested, and to make provision, partly by these means and partly by purchase, for securing an adequate portion of the Forest for these purposes of health and recreation, for which it has been proved to Your Committee this Forest has, from time immemorial, been enjoyed by the inhabitants of the neighbourhood and the Metropolis."

"Your Committee are of opinion, that to employ the forestal rights of the Crown for the purpose of obstructing that process of inclosure, to which the Lords, Commons, and Copyholders of the Manors comprised within the Forest are entitled, in common with all other persons similarly situated, would not only be a course of doubtful justice, but might, in accordance with the experience of the past, fail in securing the desired object."

"They, therefore, recommend the adoption of the second alternative."

I am to observe that these recommendations, coupled with the Resolution of The House of Commons against the sale of the forestal rights of the Crown,

place Her Majesty's Government in considerable difficulty, regarding the exercise of future control over this Forest.

It will be observed from the Report, and the evidence taken by the Committee, that the Crown has no rights over the Forest, except to preserve it as an open space for the purpose of hunting deer and wild beasts; and as these rights are now of no value to the Crown except for sale, the suggestion that the Crown shall take measures for asserting its right, and for abating inclosures, would entail a heavy charge on the Land Revenues, which, under the Acts for their management, Her Majesty's Government would not be justified in incurring, as the expenditure would lead to no return for the profit of the State. Without entering, therefore, into the reasons which have led the Committee, on their final review of the question, to contradict the suggestion contained in a previous paragraph of their Report, My Lords hesitate to take any steps with a view to that object.

Their Lordships are even more unable to act upon the second alternative proposed by the Committee. Parliament, by the Act 14 & 15 Vict. c. 42, which separated the Departments of Woods, Forests, and Land Revenues, and of the Commissioners of Public Works, assigned certain Royal Parks in the neighbourhood of London to the management of the latter Department, in order that they might be maintained principally for the recreation of the inhabitants of the Metropolis; and left all other portions of the landed property of the Crown under the management of the Commissioners of Woods, &c., in order that, during Her Majesty's reign, the revenues should be administered for the benefit of the Exchequer. By this Act Parliament decided the extent to which the recreation of the inhabitants should be provided for from public funds, and it may be added, that it was very liberally provided by annual votes for the maintenance and embellishment of the Metropolitan Parks and Gardens.

Not only, however, does the Act of 1851 define the extent to which public aid should be afforded for this, but the Act 19 & 20 Vict. c. 112, s. 10, clearly throws on the Metropolitan Board of Works the duty of providing any addition to the public parks which circumstances may require.

My Lords, therefore, before they decide upon any further proceedings on this subject, wish to ascertain whether the Metropolitan Board of Works is disposed to take any measures for obtaining Parliamentary powers for the inclosure of Epping Forest as a place of recreation, under the authority of the enactment in question. If they should be disposed to do so, My Lords will be prepared to consider any arrangements for the cession of the rights of the Crown, which may be necessary for effecting the object in view.

I am, &c.
(signed) *F. Peel.*

The Chairman of
the Metropolitan Board of Works.

EPPING FOREST.

ACCOUNT of the Receiver and Inspector of Felons' Property Forfeited to the Crown, and Restored, in each Year, 1848 to 1857.

Note.—This Account is made up by the Receiver from the Returns sent in by the Sheriffs, Courts of Quarter Sessions, and other Courts. The Net Receipts are paid, with fines and penalties, to the Consolidated Fund, under the Act 1 Vict. c. 2, s. 2. The expenses are principally Poundage to the Sheriff allowed by the Commissioners of Audit in passing their Accounts
The Account is exclusive of the Duchy of Lancaster, and City of London, from which no Returns have been received. Other Corporate Bodies and Grantees under the Crown receive Felons' Goods, without considering themselves bound to make a Return.
In many instances, trifling sums and clothing are restored to prisoners on the expiration of their sentences, by order of the Magistrates.

Spring Gardens,
29 March 1864.

John Wilkin,
Receiver and Inspector of Fines and Penalties.

ACCOUNT of the Auditors of Sheriffs' Accounts of Felons' Property Forfeited to the Crown, and Restored, in each Year, 1858 to 1862.

Note.—This Account is made up by the Auditors from the Returns sent in by the Sheriffs, Courts of Quarter Sessions, and other courts. The net receipts are paid, with fines and penalties, to the Consolidated Fund, under the Act 1 Vict. c. 2, s. 2. The expenses are principally poundage allowed to the Sheriffs on passing their accounts.

This Account is exclusive of the County of Lancaster and the City of London, from which no Returns have been received. Other corporate bodies and grantees under the Crown receive felons' goods without considering themselves bound to make a return.

In many instances, trifling sums and clothing are restored to prisoners on the expiration of their sentences, by order of the magistrates.

FELONS' PROPERTY.

RETURNS of the Amount of Felons' Property Forfeited to the Crown in each County, City and Town in *England* and *Wales*, in each Year from 1848 to 1863; specifying the Amount of such Property restored, and the Expenses incurred on Account of the same (in continuation of Parliamentary Paper, No. 502, of Session 1848).

(*Mr. Charles Forster.*)

Ordered, by The House of Commons, *to be Printed*, 5 *April* 1864.

Under 2 *oz.*

FIRE INSURANCES.

RETURN to an Order of the Honourable The House of Commons, dated 9 June 1864;—*for*,

AN ACCOUNT "of all SUMS paid into the INLAND REVENUE OFFICE in *Great Britain* and *Ireland*, for Duty on INSURANCES against FIRE, for the Quarters ending severally the 25th day of March, the 24th day of June, the 29th day of September, and the 25th day of December 1863; distinguishing the Amount of Allowance made to each Office for Collecting the same in the Country, and in *London*, *Edinburgh*, and *Dublin* respectively, with the Dates of such Payment; together with an Abstract showing the Gross Amount of Duty collected in the Year by each Company:"

"And, like ACCOUNT of SUMS Insured by each Office on FARMING STOCK, for the same Period (in continuation of Parliamentary Paper, No. 381, of Session 1863)."

(*Mr. Charles Turner.*)

Ordered, by The House of Commons, *to be Printed*,
26 *July* 1864.

ENGLAND.

AN ACCOUNT of all SUMS paid into the INLAND REVENUE OFFICE in *England*, for DUTY on INSURANCES September, and the 25th day of December 1863; distinguishing the AMOUNT paid by each Company, and the Payments; together with an Abstract showing the Gross Amount of Duty collected in the Year by each

498. Friendly Societies' Registrar's Report, 8vo.

This Report is bound up with the 8vo. portions of Vol. 30.

FRIENDLY SOCIETIES.

RETURN to an Order of the Honourable The House of Commons, dated 11 March 1864;—*for*,

AN ACCOUNT "of all SUMS standing to the Credit of FRIENDLY SOCIETIES on the 20th day of November 1863, particularising the Gross Sums on which Interest was credited to that day, at the several Rates of Interest allowed under different Statutes, namely:

	£.	s.	d.	
The amount bearing interest at -	4	11	3	per annum,
„ „ „ - -	3	16	-½	„

and any other rate allowed."

On the 20th November 1863, the amount at the credit of the

	£.	s.	d.
99 Friendly Societies receiving 4 *l.* 11 *s.* 3 *d.* per centum interest was - - - - - - - - - - - - -	580,183	13	5
To which there was added on 21st November, to bear interest as capital from that date, 13,339 *l.* 5 *s.* 7 *d.*, being the interest due on the half-year ended 20th November.			
On the 20th November 1863, the amount at the credit of the			
352 Friendly Societies receiving 3 *l.* 16 *s.* 0½*d.* per centum interest, was - - - - - - - - - - -	1,232,691	8	2
To which there was added on 21st November, to bear interest as capital from that date, 23,616 *l.* 16 *s.* 8 *d.*, being the interest due on the half-year ended 20th November.			
On the 20th November 1863, the amount at the credit of the			
219 Friendly Societies receiving 3 *l.* 0 *s.* 10 *d.* per centum interest, was - - - - - - - - - - -	188,069	5	11
To which there was added on 21st November, to bear interest as capital from that date, 2,823 *l.* 15 *s.* 2 *d.*, being the interest due on the half-year ended 20th November.			

In addition to the above Friendly Societies depositing directly with the Commissioners for the Reduction of the National Debt, there were on 20th November 1863, 12,148 Friendly Societies depositing their funds in Savings Banks, with an aggregate amount at their credit of 1,999,950 *l.* The rate of interest credited half-yearly to this class, by the Savings Banks, depends upon the rules of the several Savings Banks in which the deposits are made, and therefore the books of the National Debt Office do not show how much of this sum was interest credited to 20th November; but as the sum due to this class of Friendly Societies by Savings Banks formed part of the capital credited to Savings Banks on 20th November, the interest which was credited to Savings Banks for those Friendly Societies on 21st November for the past half-year was (at the rate of 3 *l.* 5 *s.* per annum) 32,493 *l.*

National Debt Office,
16 March 1864.

A. Y. Spearman,
Comptroller General.

FRIENDLY SOCIETIES.

ACCOUNT of all Sums standing to the Credit of Friendly Societies on 20th November 1863, particularising the Gross Sums on which Interest was credited to that day, at the several Rates of Interest allowed under different Statutes.

(*Mr. Crawford.*)

Ordered, by The House of Commons, *to be Printed*,
18 *March* 1864.

REPORT of the PROCEEDINGS of the REGISTRAR of FRIENDLY SOCIETIES in *Scotland*, in his Office of Registrar, and of the principal Matters transacted by Friendly Societies which have come under his cognizance during the past Year.

THE Registrar of Friendly Societies, in preparing his Annua Report to Parliament for this year, may be permitted to begin it by quoting a passage from a communication which he very recently received from the secretary of a Friendly Society in a county-town in Scotland with a population of nearly 24,000 :—

"The accompanying Report of our Society shows a state of matters such as we have never before experienced; in fact, the distress of the past winter in this town is without a precedent in the memory of the living.

"The mortality, though heavy, is light in comparison to the sickness. Friendly Societies never more fully fulfilled the objects for which they were instituted than last year, and it ought to be a great inducement to many to secure their assistance."

The Registrar has had occasion to be much gratified by the very wise and prudent manner in which the business and affairs of a large proportion of both the Friendly Societies and the Co-operative Societies have been conducted and managed. This remark applies to both classes of these Societies with equal truth and justice; but inasmuch as there is more of a mercantile character in the case of Co-operative Societies, from the nature and mode of their transactions, their office-bearers deserve the greater praise and credit for resisting the temptation and conscientiously abstaining from taking advantage of many opportunities of investing the funds of the Societies with which they are connected under circumstances which, while apparently offering very desirable opportunities of increasing and benefiting the funds of the Societies, might by an unforeseen risk endanger their safety. The office-bearers are evidently fully impressed with a very deep sense of their personal responsibility.

A secretary of a Co-operative Society in a considerable country village has thus written to the Registrar: "As we pay all our accounts weekly, we have no liabilities."

The Registrar, a few months ago, received what he thinks a very interesting communication from the secretary of the "Nungate and Haddington Friendly Society." The rules of this Society are simple and judicious; over and above the usual objects of Friendly Societies, this Society provides a "Deposit" from "Savings," to provide a fund from which assistance may be given in cases of "peculiar exigencies" and "casualties," a provision often of very great importance to poor labouring men and women who, from their scanty wages, and frequently with large families of young children dependent on them, may be and are often for weeks and even months laid aside and disabled from work in consequence of some illness, or some sad accident received while at their work; for example, "miners," "quarryers," "masons," and other workmen who, from their employments or occupations, are exposed to sad and disabling accidents.

As the Registrar thinks that it may be useful, and may stimulate more and more the extension of Co-operative Societies in Scotland, that the knowledge of their success and extent in England may be circulated, he will therefore insert a copy of a paragraph which he copied from a newspaper, relative to "Industrial and Provident Societies in England":—"Industrial and Provident Societies.—A Return has just been issued of the general statement of the funds and effects of every Industrial and Provident Society in England registered under the Act 25 & 26 Vict. cap. 87, for the year ending 31st December last, transmitted to the Registrar of Friendly Societies. It appears that there were 332 Societies, with

90,458 members, of whom 24,308 were admitted during the year, and during the same period 11,529 members withdrew. The number of shares taken was 351,613; the amount received upon them was 111,347 *l.*, and during the same period 172,561 *l.* was withdrawn. The amount of share capital on the 31st December 1862 was 429,315 *l.*, and the loan capital was 54,207 *l.* The amount received on loans during the year was 24,328 *l.*, and the loans repaid were 12,062 *l.* The amount paid for interest was 20,401 *l.* The cash paid for goods bought in the year was 2,067,867 *l.*, and the amount received 2,331,650 *l.* The profit realised in the year was 165,770 *l.* The total amount of expenses, including wages, &c., was 135,588 *l.* The amount of cash in hand of bankers, &c., on 31st December, was 63,234 *l.* The total amount of assets and property of Societies was 584,766 *l.*, and the liabilities were 422,802 *l.*"

A Society exists which the Registrar thinks is deserving of special notice, "The West of Scotland Domestic Servants' Friendly Society." This is an excellent and very valuable Society. The formation and cordial support of many more similar Societies would be of very great importance to the class of persons for whose benefit such Societies are intended. There is, perhaps, no class in the community who more frequently need the support and protection of such Societies, and none who, from not being members of such Societies, are exposed to greater distress and anxiety of mind.

Although it is most desirable, in the case of all Friendly Societies, that the greatest possible exertions should be made to maintain the prosperity of their funds, and to increase them as much as possible, yet it is a most interesting fact, and worthy of the greatest praise, that some Societies of very small means, by their very prudent management of the funds at their disposal, very small though they appear to be, and really are, and for a number of years varying very little, yet, by very circumspect, frugal, and wise management, they are enabled to give a great amount of very valuable and important aid to their members, thus cheering many poor families who, without the assistance obtained from the apparently humble and, in some instances, scanty funds of the Friendly Societies of which they are members, would be bereft of all means of support.

It does occur occasionally that, in some cases, the statements as to the condition of the funds of Societies are too vague, and not easily intelligible to the men or women who are members of Friendly or Co-operative Societies, the members of which, in the aggregate, or considered as a body, though possessing many among their members who are very intelligent and well-informed persons, yet, as a class, and collectively, should have everything connected with the business and management of their Societies made as simply clear and intelligible to them as possible. It is most desirable that all members of the various and numerous Societies should thoroughly understand the subjects and causes of the discussions and, it may be, at times, the differences which may arise among them,—thus all will go on harmoniously, and what, under other circumstances, might be adverse and subversive of order, will become an auspicious and most happy cause of harmony and kind brotherly feeling.

A remark contained in the Return made to the Registrar by the secretary of the Kirriemuir Equitable Co-operative Society is well worthy of being inserted in this Report. He thus writes:—"It is now two and-a-half years since the Society adopted the Co-operative principle, and the directors are proud to state that it has succeeded far beyond their most sanguine expectations; and they still hope that it will go on and prosper. If followed out discreetly, it will serve to promote temperance, frugality, and many other virtues, and, in due time, give an entirely new aspect to the condition and prospects of the working classes."

It sometimes appears, from the correspondence of the Registrar with the office-bearers of some prudently managed Societies, that the office-bearers and members consider their funds in a good condition if their income is equal to their expenditure. Now, although it is certainly well, and a good cause of thankfulness to be free of debt, and "to owe no man anything," nevertheless every effort which can fairly be made should be made, in order to obtain a Reserved Fund, from which to be prepared for contingencies which the wisest foresight may often be unable to guard against; and thus also the members of Societies will be taught the importance of striving hard to save and provide a Reserved Fund, however small it may be,

be, for occasions of unexpected illness, or other painful need to which they, or some members of their families may be exposed.

It is gratifying to the Registrar to be able to report that the number of Societies now possessing a "Reserve Fund" for the provision of unexpected contingencies and need, is increasing, and some of the Societies who have exerted themselves to make this important provision are, in comparison with some who have not done so, in humble circumstances, with scanty means; yet, seeing and understanding the importance of such a fund, they do, although their circumstances are poor, what other Societies, with comparatively ample means, neglect to do.

All which is very humbly and respectfully reported by

A. Carnegy Ritchie,
Registrar of Friendly Societies in Scotland.

Edinburgh, 8, Broughton Place,
14 July 1864.

REPORT

BY THE

REGISTRAR

OF

FRIENDLY SOCIETIES

IN

SCOTLAND.

(Presented pursuant to Act of Parliament.)

Ordered, by The House of Commons, *to be Printed,*
25 *July* 1864.

HAINAULT FOREST.

RETURN from the INCLOSURE COMMISSIONERS, setting forth the several ALLOTMENTS of the 528 Acres of the KING'S WOODS in the late Forest of *Hainault* to the Parish of *Barking*, and of the 42 Acres to the Parish of *Dagenham*; showing the names of the Proprietors claiming Allotments, the nature of the Claim; &c.

(*Mr. Cox.*)

Ordered, by The House of Commons, *to be Printed*,
5 *April* 1864.

SUPERANNUATION.

COPY of TREASURY MINUTE granting a Special SUPERANNUATION ALLOWANCE to Sir *Rowland Hill*, K.C.B., Secretary to the General Post Office.

TREASURY MINUTE, dated 11 March 1864.

READ Letter from Sir Rowland Hill, K. C. B., dated the 29th February, stating that six months' absence having elapsed without any satisfactory results as regards the state of his health, he has now no course left but to resign his appointment as Secretary to the Post Office.

Read also letter from the Postmaster General of the instant, stating that Sir Rowland Hill has in consequence of the state of his health been compelled to retire from the public service, and bearing his testimony to the eminent services which Sir Rowland Hill has rendered.

The retirement of Sir Rowland Hill from the Office of Secretary to the Post Office would, if treated under the ordinary machinery of the Superannuation Act, afford to my Lords the power of granting him no more than a pension of 566 *l.* 13 *s.* 4 *d.*, or at the utmost 666 *l.* 13 *s.* 4 *d*, but it supplies, in the judgment of my Lords, an occasion of peculiar fitness for calling into action the 9th or special clause of the Superannuation Act, and thus, by a proceeding which marks their sense of his services, of drawing to those services the attention of Parliament.

The period during which Sir Rowland Hill has held office, either by a temporary or a permanent appointment, is but little in excess of 20 years; yet my Lords have to regret that while he remains full as ever of ability, energy, and resources, and of disposition to expend them for the public good, the state of his health due, without doubt, in great part to his indefatigable labours, compels him to solicit a retirement.

It is not, however, by length of service that the merits and claims of such a man are to be measured. It is not even by any acknowledgment or reward which the Executive Government, in the exercise of the powers confided to it, can confer.

The postal system, one of the most powerful organs which modern civilisation has placed at the command of Government, has, mainly under the auspices and by the agency of Sir Rowland Hill, been, within the last quarter of a century, not merely improved but transformed. The letters transmitted have increased nearly nine-fold, and have been carried at what may be estimated as little more than one-ninth of the former charge. In numerous respects convenience has been consulted and provided for even more than cheapness.

Upon the machinery for the transmission of letters there have been grafted other schemes, which, at a former period, would justly have been deemed visionary, for the transmission of books with other printed matter, and of money, and for receiving and storing the savings of the people.

While these arduous duties have been undertaken, the condition of the persons employed in this vast department has been improved, and, could attention be adequately drawn to what lies beneath the surface, my Lords are persuaded that the methods of communication by letter which are now in action have produced for the mass of the population social and moral benefits which might well have thrown even these brilliant results into the shade.

As respects purely fiscal interests, advantages so great as those which have been recited were, of course, not to be obtained without some effort or sacrifice. But the receipts on account of postal service, which on the first adoption of the change were reduced by above a million sterling, have now more than recovered themselves, and if computed on the same basis as under the old system, the gross sum realised is about 3,870,000 *l.* instead of 2,346,000 *l.*, and the net about 1,790,000 *l.* in lieu of 1,660,000 *l.*; at the same time contraband in letters may be stated to have ceased, and instead of a stationary revenue, such as that derived from letters between 1815 and 1835, the State has one which is steadily and even rapidly progressive.

My Lords do not forget that it has been by the powerful agency of the railway system that these results have been rendered practicable. Neither do they enter into the question, as foreign to the occasion, what honour may be due to those who, before the development of the plans of Sir Rowland Hill, urged the adoption of the uniform penny postage. Nor are they insensible to the fact that the co-operation of many able public servants has been essential to the work performed. But after all justice has been done to others, Sir Rowland Hill is beyond doubt the person to whom it was given to surmount every kind of obstacle, and to bring what had been theretofore matter of speculation into the world of practice, without whom the country would not have enjoyed the boon, or would only have enjoyed it at a later date, and to whom, accordingly, its enjoyment may justly be deemed due.

Nor is it in this country alone that are to be perceived the happy fruits of his labours; the recognition of his plans has spread with a rapidity to be accounted for only by their excellence from land to land, and truly may now be said to have met with acceptance throughout the civilised world.

Under these circumstances, it may justly be averred that my Lords are dealing on the present occasion with the case not merely of a meritorious public servant, but of a benefactor of his race; and that his fitting reward is to be found not in this or that amount of pension, but in the grateful recollection of his country.

But my Lords discharge the portion of duty which belongs to them, with cordial satisfaction, in awarding to Sir Rowland Hill, for life, his full salary of 2,000 *l.* per annum.

Let a copy of this Minute be laid before Parliament.

Transmit copy to the Postmaster General, with a request that it may be communicated to Sir Rowland Hill.

SUPERANNUATION.

COPY of TREASURY MINUTE granting a Special SUPERANNUATION ALLOWANCE to Sir *Rowland Hill*, K.C.B., Secretary to the General Post Office.

SIR ROWLAND HILL.

RETURN to an Order of the Honourable The House of Commons, dated 18 March 1864;—*for*,

COPY "of a LETTER and MEMORANDUM from Sir *Rowland Hill*, K.C.B., to the Commissioners of the Treasury, with reference to their Lordships' Minute granting him a Special SUPERANNUATION ALLOWANCE."

My Lords, Hampstead, 17 March 1864.

THE Postmaster General, as requested by your Lordships, has done me the favour to furnish me with a copy of your Minute of 11th instant, granting me a special superannuation allowance on retiring from my office as Secretary to the Post Office, and conveying to me this very favourable opinion, which your Lordships are pleased to express, of the manner in which I have discharged my duties.

It cannot be necessary to assure your Lordships of the deep gratification with which I have received so handsome and elaborate a recognition of my services. I have only to beg that you will be pleased to accept my most respectful thanks.

In a document so highly complimentary, I hesitate to notice what would appear to be an admission, inadvertently made, to the effect that the adoption of the uniform penny postage was urged by others before the development of my plans. This, I assure your Lordships, is an error; and, as uniformity of rate constitutes the main feature of my plan, I am naturally anxious to place before you the real facts of the case. I trust, therefore, you will pardon me if I request attention to the enclosed memorandum on the subject.

I need scarcely add, that should the expectations of my medical friends, of improved health from rest, be realised, and any occasion arise in which it may appear to your Lordships that my assistance or advice in further postal improvements may be of advantage, I shall feel honoured by being permitted to place them at your disposal.

I have, &c.
(signed) *Rowland Hill.*

The Right Honourable the Lords Commissioners
of Her Majesty's Treasury,
&c. &c. &c.

MEMORANDUM.

A LOW and uniform rate of postage forms the most essential feature of my plan of postal reform, and I have no hesitation in stating that its conception originated wholly with myself. To guard against future error, I ask permission to place on record a brief statement of facts.

The principle of uniformity of rate, now that it has been in successful operation for nearly a quarter of a century, appears, perhaps, simple and obvious; but so far from its having been, as it is sometimes supposed, the happy thought of a moment, it was the result of most laborious investigation

on my part. Indeed, a slight consideration will show that its conception necessarily involved a previous discovery, viz., that the cost per letter of mere transit within the limits of the United Kingdom was practically inappreciable, or, at least, that it was not dependent mainly on distance, being, in fact, quite as much dependent on the number of letters contained in the particular mail, as on the distance that mail was carried. Indeed, it was shown from careful investigation, that the cost of mere conveyance, even for so great a distance as from London to Edinburgh, was only the 36th part of a penny per letter. From this and other facts it followed that a uniform rate was more just than one varying according to distance. The convenience of uniformity was obvious.

I may add that when I first entered on the investigations preparatory to the construction of my plan, I myself had no conception of the practicability of a uniform rate; and that the discovery referred to above was as startling to myself, as it proved when announced to the public at large.

A reference to my original pamphlet, a copy of which is, I presume, still in your Lordships' possession, or to my evidence before the Select Committee of 1838, appointed to inquire into the practicability of my plans, will show the various steps by which I arrived at the conclusion that a uniform penny rate was at once just and practicable.

There is but one other person, so far as I am aware, to whom the suggestion of a uniform penny rate has, with even the slightest plausibility, even been assigned—I refer to the late Mr. Wallace, formerly Member for Greenock, and Chairman of the Select Committee on Postage in 1838; but though Mr. Wallace frequently urged, among other useful reforms, a great reduction in the postal charges, I can say from personal knowledge that he had no idea whatever of a uniform rate until after the publication of my pamphlet. Indeed, this sufficiently appears from his speech in Parliament in July 1836, the last occasion on which, before the publication of my pamphlet, he referred to the rates of postage. The following is an extract from "Hansard" (vol. 35, 3d series, p. 422):—

* * * * * * * *

"At the same time the rates of postage ought to be reduced. It would be proper not to charge more than 3 *d.* for any letter sent a distance of 50 miles; for 100 miles, 4 *d.*; 200 miles, 6 *d.*; and the highest rate of postage ought not to be more than 8 *d.* or 9 *d.* at most."

* * * * * * * *

Further evidence upon this point is also in my possession, which can be submitted, should it be deemed necessary.

(signed) *Rowland Hill.*

Hampstead, 17 March 1864.

Fred. Gripper,
Chief Accountant for Taxes.

Inland Revenue Office,
25 July 1864.

INCOME AND PROPERTY TAX.

RETURNS showing the Number of Persons charged to the INCOME TAX in *Great Britain*, for the Years ending 5 April 1862 and 1863, under Schedule (D.), distinguishing the Number charged in each Class; also, the Net Amount of PROPERTY and INCOME TAX for the same Years, classed under the several Schedules; and, similar RETURN for *Ireland* (in continuation of Parliamentary Paper, No. 526, of Session 1863).

(*Mr. Moffatt.*)

Ordered, by The House of Commons, *to be Printed,*
28 *July* 1864.

INCOME AND PROPERTY TAX.

RETURN to an Order of the Honourable The House of Commons, dated 11 May 1864;—*for*,

A RETURN "showing the Annual Value of all REAL PROPERTY (including RAILWAYS and CANALS) rated under Schedule (A.) of the INCOME and PROPERTY TAX ACT for the Year ending the 31st day of March 1862, in all PARLIAMENTARY CITIES and BOROUGHS in the UNITED KINGDOM, and in all COUNTIES or PARLIAMENTARY DIVISIONS of COUNTIES, exclusive of Cities and Boroughs":

"And, similar RETURN for the earliest Year subsequent to the imposition of the INCOME TAX in 1842, for which the Return can be given."

13 *July* 1864.

INCREASE AND DIMINUTION (PUBLIC OFFICES).

ABSTRACT OF ACCOUNTS

Of every INCREASE and DIMINUTION which has taken place, within the Year 1863, in the Number of Persons employed in all PUBLIC OFFICES or DEPARTMENTS, or in the Salaries, Emoluments, Allowances, or Expenses which may have taken place, or been paid, granted, received, or incurred for and in respect of all Officers and Persons belonging to, or employed in or by, or in the Service of, all Public Offices or Departments, specifying the Amount and Nature thereof; and distinguishing in such Account every Increase and Diminution in the Amount of all Allowances or Compensations granted or allowed as Retired Allowances or Superannuations to any Person or Persons having held any Office, Place, or Employment in any Public Services under any such Office or Department; and also specifying in every such Account the Grounds upon which every such Increase or Diminution in the Establishment of any such Public Office or Department, or of any such Salary, Emolument, Allowance or Compensation, or Superannuation as aforesaid, shall have been made, granted or allowed.

(*Presented pursuant to Act 4 & 5 Will. 4, c. 24.*)

Ordered, by The House of Commons, *to be Printed,*
5 *April* 1864.
